

Bretherton Residents' Questionnaire Results October 2022

BRETHERTON NEIGHBOURHOOD PLAN WORKING GROUP

Table of Contents

Introduction	5
General Questions	5
Question 1 What do you like about Bretherton?	5
Question 2 What do you dislike about Bretherton?	6
About you:.....	7
Question 3 How old are you?	7
Question 4 If there are children under the age of 16 in your household how old are they?	7
Residence in Bretherton	8
Question 5 How long have you lived in Bretherton?	8
Question 6 Do you see yourself still living in Bretherton in 5 years' time?	8
Additional comments are summarised below	9
Question 7 If you moved here from elsewhere, what brought you here?	11
Question 12 Is your dwelling in Bretherton your main residence?	11
Employment.....	12
Question 8 Employment status.....	12
Question 9 Is your work full or part time?	12
Question 10 Where do you work / volunteer / care?.....	13
Question 11 If your work is wholly or partly home-based as a result of Covid do you expect this arrangement to continue?	14
Planning and Development.....	14
Question 13 Thinking about the next 10-15 years, how many new homes should be built in Bretherton?.....	14
Question 14 If there was to be new housing in Bretherton how should they be grouped?	15
Question 15 If there were to be new housing in Bretherton, priority should be for?	16
Question 16 If there was to be new housing in Bretherton, priority for its location should be?.....	16
Question 17 If there were to be new housing in Bretherton, what aspects are most important?	17
Other aspects that were considered important are	17
Question 18 Thinking about the needs of Bretherton in terms of employment, sustainability, health, education and amenities what other developments do you think are needed now?	19
Question 19 In Bretherton there are some listed buildings and structures which are protected. Which buildings, structures or places in Bretherton do you think should be protected?	21
Question 20 Which special views within the village or from the village do you think should be preserved eg Bank Hall, Winter Hill, Harrock Hill or others?.....	23
Question 21 What do you think about the size of our conservation area?.....	24
Environment and Landscape.....	26
Question 22 Please rate the refuse collection / recycling in Bretherton	26
Question 23 Please assess litter / fly tipping / dog waste	28
Question 24 Nuisance	28

Bretherton Residents' Questionnaire Results October 2022

Question 25 Problems with invasive vegetation	31
Question 26 Problems with unauthorised discharges to water courses / ditches	33
Question 27 Flooding / standing water issues.....	35
Question 28 Are pavements within the village safe?	38
Question 29 Street lighting	40
Question 31 Wildlife and landscape – how important is the presence of wildlife and nature to your quality of life in Bretherton?.....	43
Question 32 Increase / decrease in the number and variety of species you have seen in your garden or more widely in Bretherton	43
Question 33 Have you noticed any increase or decrease in the presence or number of a particular species in the parish?.....	44
Trends in mammals:.....	44
Trends in amphibians and insects:.....	44
Trends in plants.....	45
Trends in birds:.....	45
Question 34 Do you think our community needs to take more action to make the local community more welcoming to wildlife?	47
Question 35 Based on your experience are the agricultural areas and / or natural areas being well managed and maintained?	50
Safety and Security	52
Question 36 How could road safety be improved in Bretherton parish?.....	52
Question 37 How could traffic noise and volume on the B5248 and B5247 through the village be reduced?	54
Question 38 Are there other specific roads or locations within Bretherton that cause you concern?.....	55
Question 39 Do existing public pavements provide adequate pedestrian safety in Bretherton?	56
Question 40 Are there any Public Rights of Way (eg footpaths/bridleways) in Bretherton that cause you concern and what could be done to improve these?	57
Question 41 Are you concerned about any of the following in Bretherton?	59
Community and Leisure Activities.....	62
Question 42 Are you a member of any of these organisations?	62
Question 43 How often do you use village footpaths, bridleways, or lanes for leisure?	62
Question 44 Do you ever encounter any problems when using these routes?	63
Question 45 Do you have other hobbies that make use of the village environment?	64
Question 46 How often do you use these village facilities?	66
Question 47 Are you involved in any of these village initiatives / events?	66
Question 48 Would you like to see any new leisure activities in Bretherton?.....	68
Economic Development and Enterprise	69
Question 49 Do you think that there should be commercial units available in and around Bretherton to provide facilities for businesses?	69

Bretherton Residents' Questionnaire Results October 2022

Question 50 If you are self-employed or a business owner in Bretherton, what would enable you to sustain and develop your business?	71
Question 51 Are there any barriers preventing you establishing your business in Bretherton or working from home in Bretherton?	71
Question 52 As a resident in Bretherton, are there any business services that you require to make your life easier?	74
Energy	76
Question 53 What measures could Bretherton Parish Council explore that could reduce the impact of our carbon footprint?	76
Question 54 What could you personally or the residents of Bretherton collectively do to make the transition from a carbon-based world to a renewable energy world?	77
Question 55 What are your personal concerns about energy?	78
Question 56 Bulk purchasing of energy: which ones of these bulk purchasing opportunities might you be interested in if it was organised at a community level?	80
Question 57 Would you support action to explore the scope for energy supply to be owned and produced locally?	82
Question 58 Would you support action to explore what renewable energy projects in our area could viably be developed by and for the benefit of our community?	84
Question 59 If a community owned renewable energy project could be built to 'an appropriate scale' and 'sensitively' in our landscape, which of these technologies might you support?	86
Utilities and Other Services.....	88
Question 60 If you use the internet, are you satisfied with the connection speed you get in Bretherton?	88
Question 61 If you don't use the internet, what is the reason?	90
Question 62 If you don't know how to use the internet but would like to, would you be interested in lessons in Bretherton?	90
Question 62a (there are two question 62s on the questionnaire) What internet speed do you usually get on a weekday?	91
Question 63 Do you have access to full fibre broadband (FTTP)?	92
Question 64 If you have a mobile phone, please name your service provider	93
Question 65 How good is the mobile telephone signal inside your house in Bretherton?	94
Question 66 Do you use a landline in your home?	96
Question 67 If you use a landline phone, is the service adequate and reliable?	96
Question 68 If you watch satellite transmitted TV, is the signal quality good?	97
Question 69 If you watch terrestrial TV, is the signal quality good?	97
Question 70 How is the quality and reliability of your mains electrical supply?	97
Question 71 Is your property connected to mains gas?	98
Question 72 If you are connected to mains gas, how is the reliability of your supply?	98
Question 73 Are you satisfied with waste water / mains drainage in Bretherton?	98
Question 74 How is the quality and reliability of your mains water supply?	100
Question 75 What do you think about the Royal Mail delivery and collection service in Bretherton?	100

Bretherton Residents' Questionnaire Results October 2022

Question 76 As a small community, Bretherton does not have an NHS health facility in the village. Do you have any issues with access to local health facilities in neighbouring areas?	101
Question 77 Bretherton has a kindergarten and a primary school, and access to secondary education and adult / further / higher education in neighbouring villages and towns. Do you have any issues with access to education facilities in Bretherton or neighbouring areas?	103
Transport, Parking, Roads and Highways.....	105
Question 78 How often do you use the local bus service?	105
Question 79 Do you use the bus service to link with trains from Croston station?	107
Question 80 How could the bus service in Bretherton be improved? Eg routes, timetable, cost, bus stop location, access, reliability	109
Question 81 Do you cycle on the roads in and around Bretherton?	110
Question 82 Is road signage adequate in Bretherton?	112
Question 83 What do you think of the standard of winter gritting, snow clearance and leaf fall clearance in Bretherton?	114
Question 84 Are you aware of any problems with the maintenance of roadside verges, ditches and drains in Bretherton?	115
Question 85 Have you any other comments on roads, highways, and transport in Bretherton?.....	117
Have you any other comments that you feel would be useful to the Neighbourhood Plan Steering Group?	118

Introduction

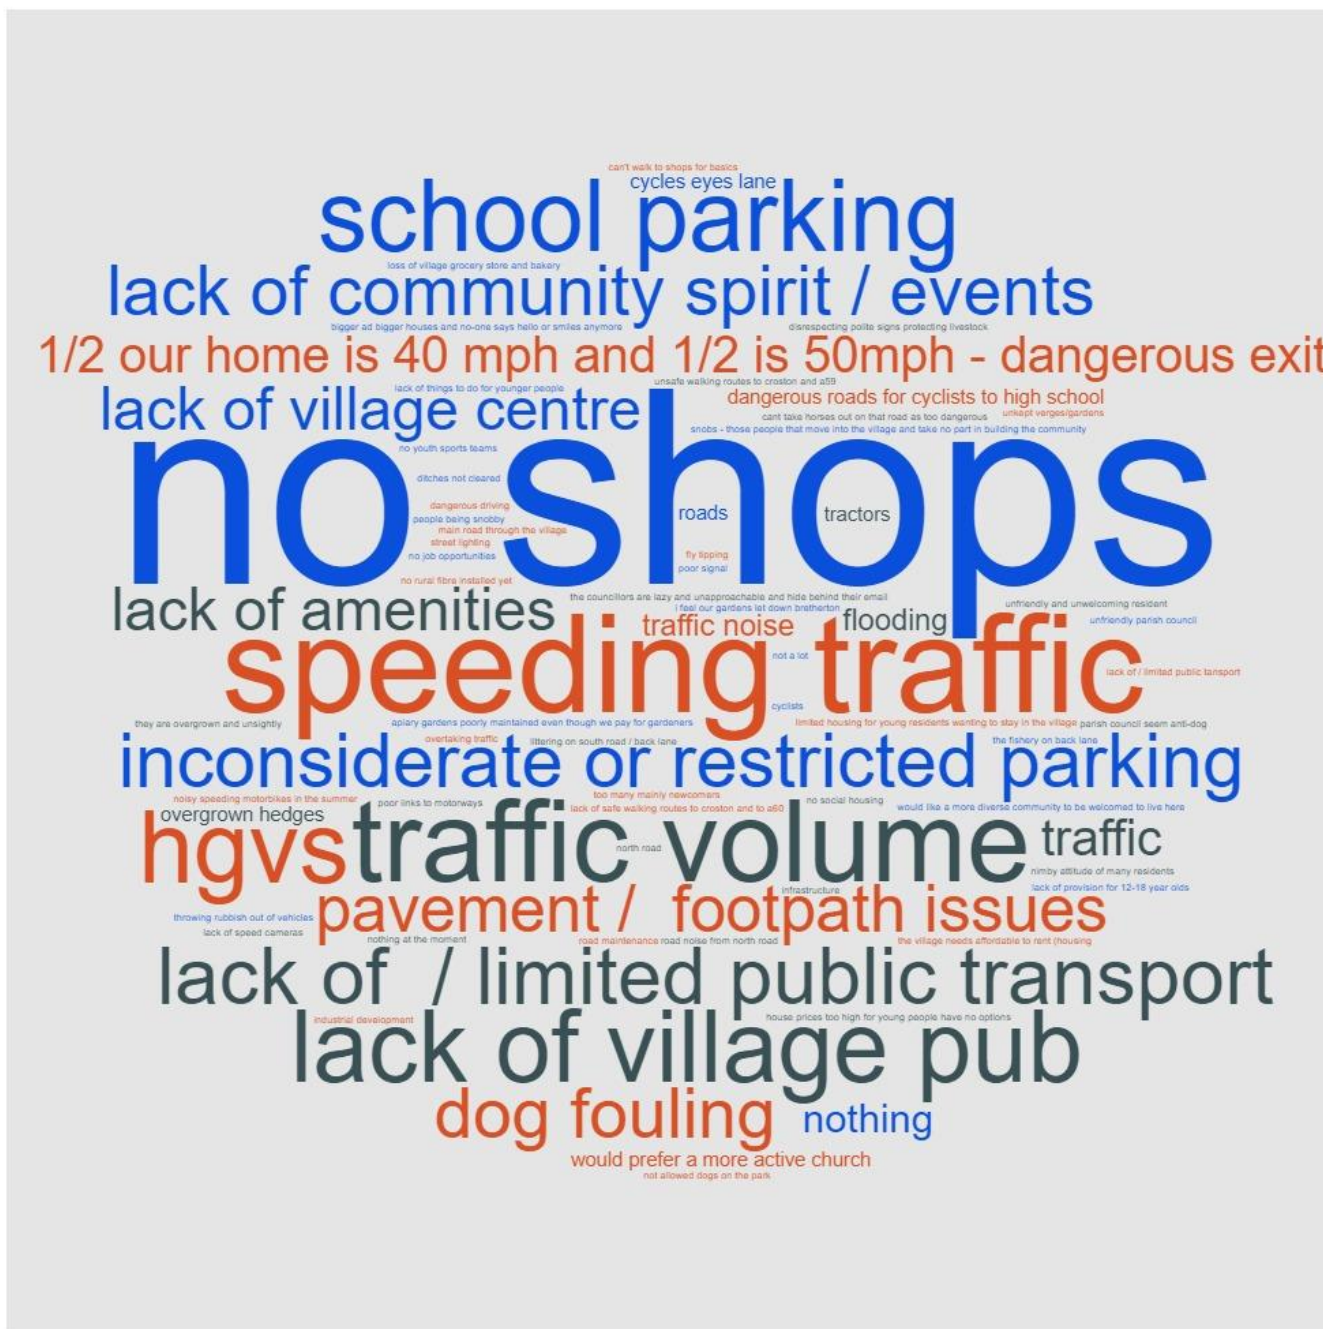

About the charts:

The pie charts show both the counts of responses and the percentage of the total eg for Question 3 the pie chart shows that 12 people were in the 76+ age range, and that this group made up 6% of all responses.

General Questions

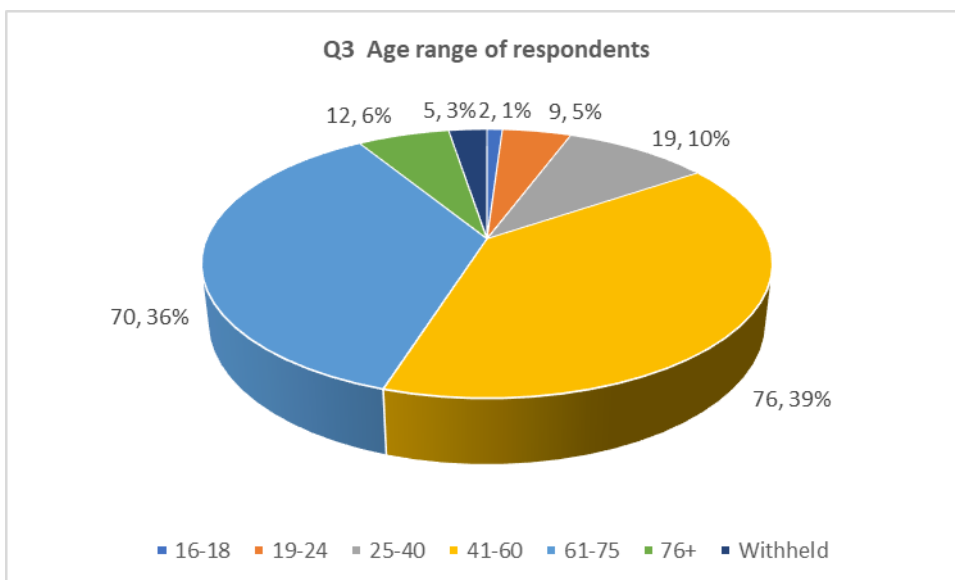

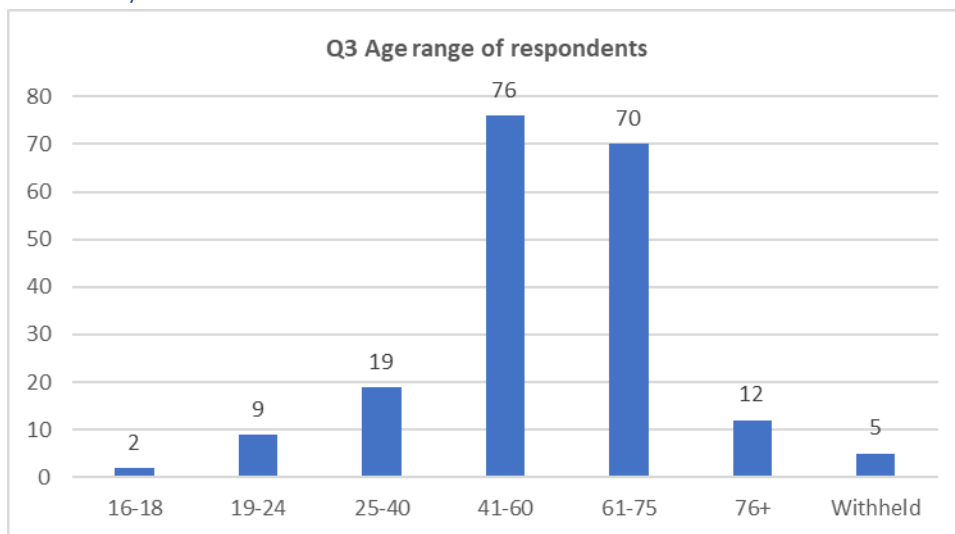

Question 1 What do you like about Bretherton?

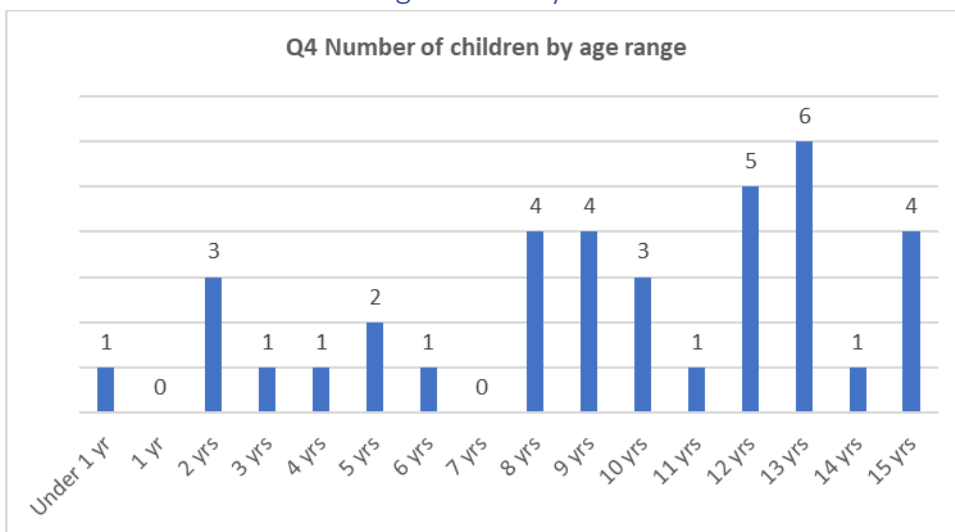

About you:

Question 3 How old are you?

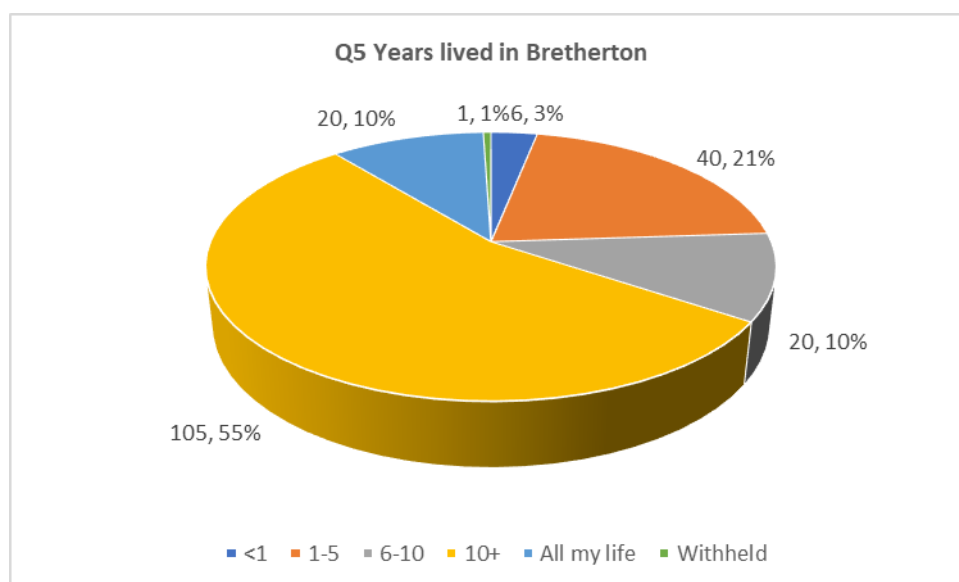

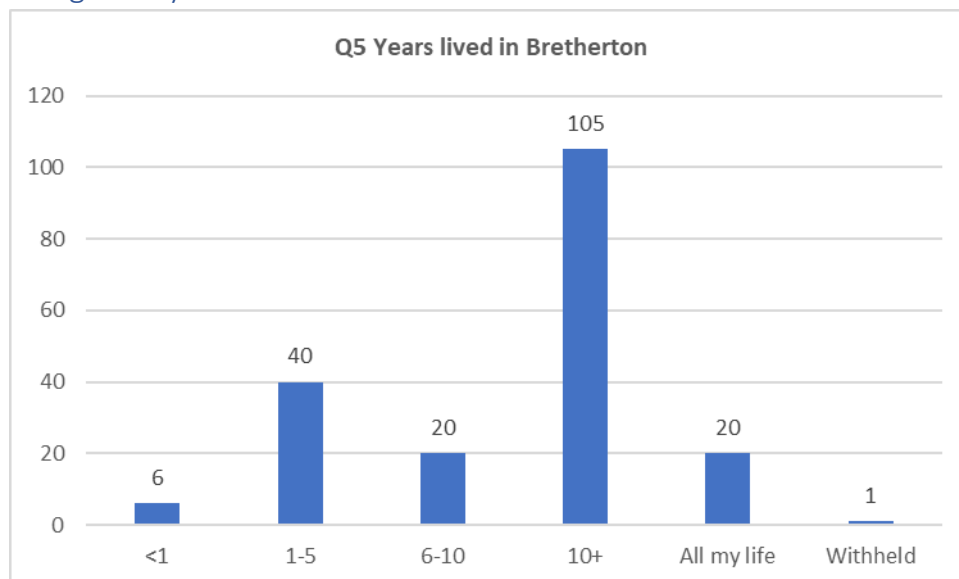

Question 4 If there are children under the age of 16 in your household how old are they?

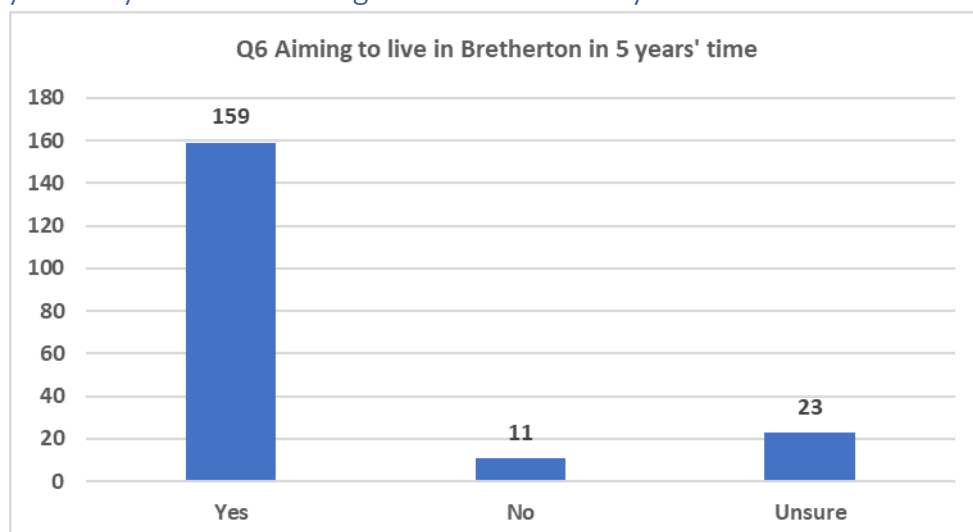

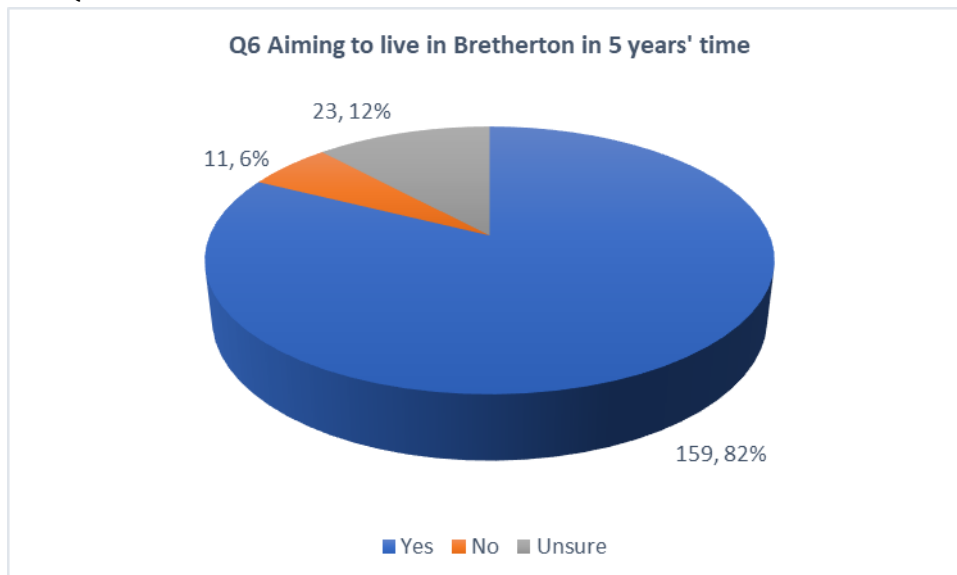

Residence in Bretherton

Question 5 How long have you lived in Bretherton?

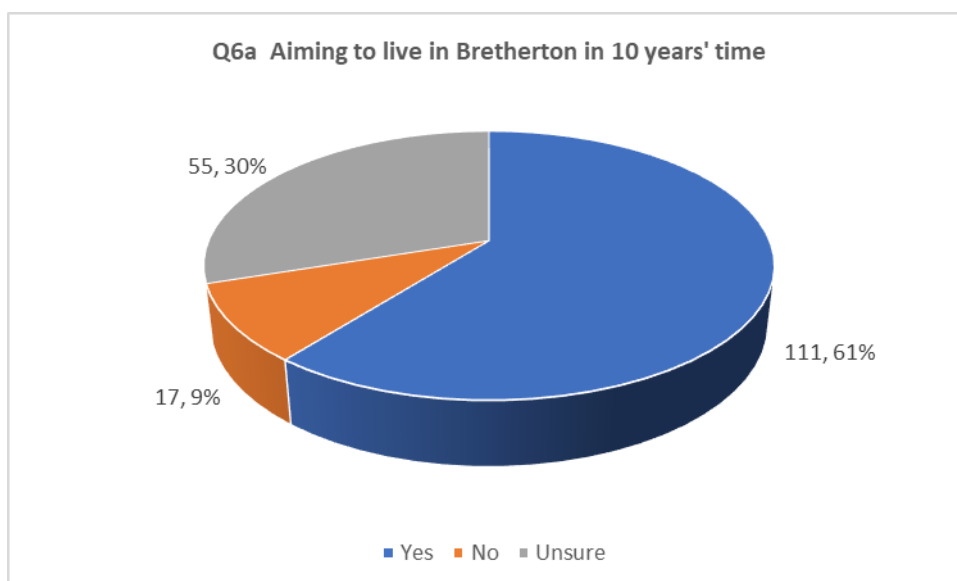

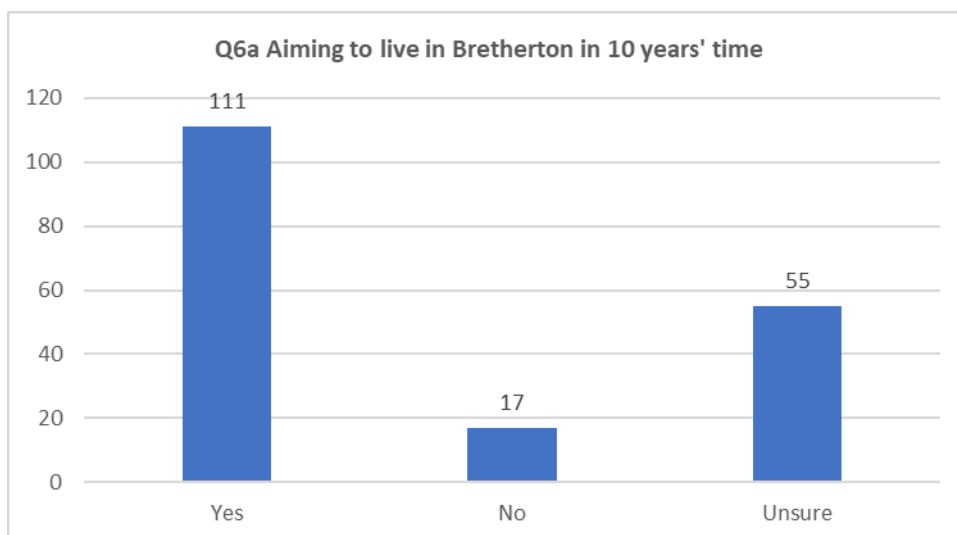

Question 6 Do you see yourself still living in Bretherton in 5 years' time?

The responses to Question 6a Do you still see yourself living in Bretherton in 10 years are summarised below

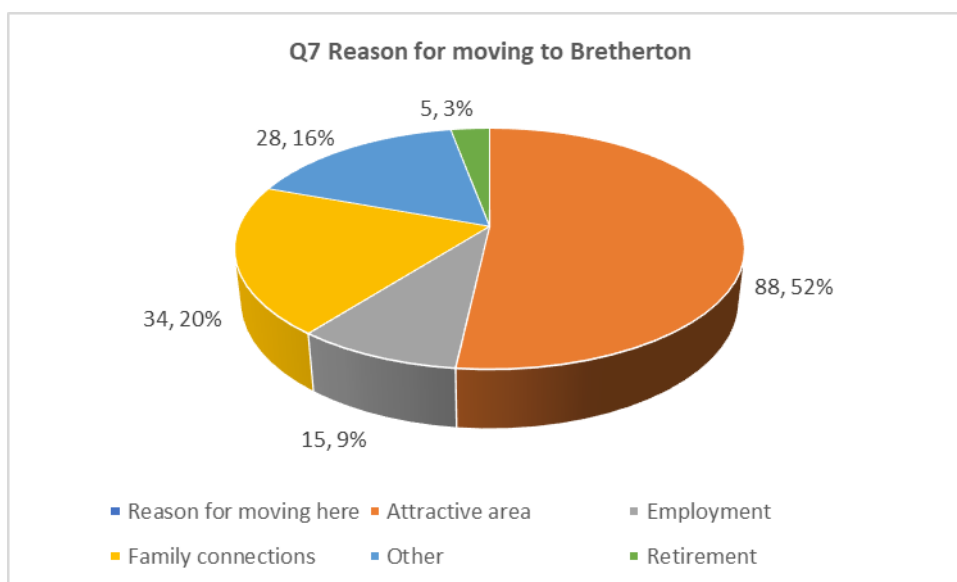

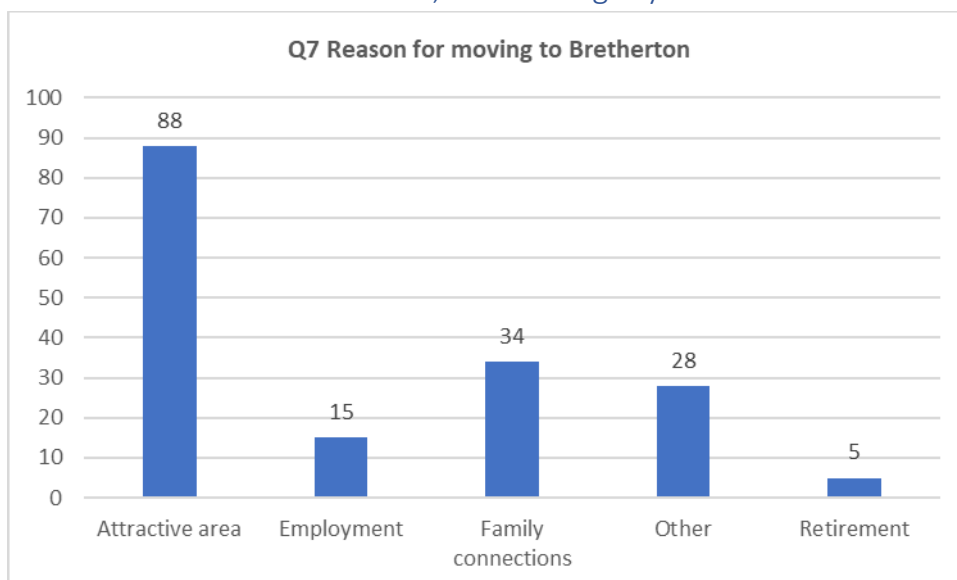

Additional comments are summarised below:

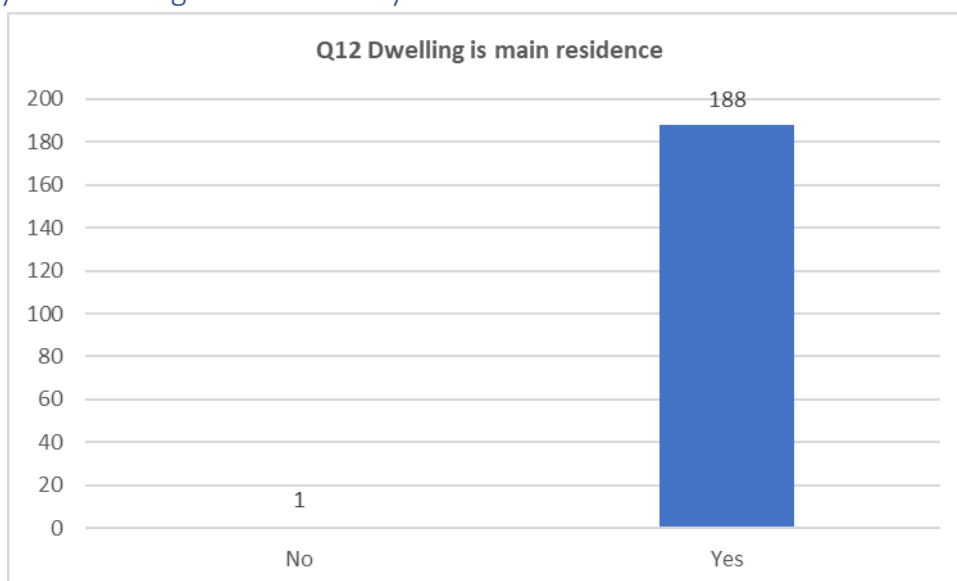

hopefully but not if gets built up
i feel for those who cannot afford to buy
hopefully. at my age nothing is certain
i plan to live here for the rest of my life hope to retire in spain
may not still be driving in 10-15 years time
will depend on any health issues, mobility etc s a lovely place to live
would need own transport to remain in bretherton if i'm still alive
lack of good public transport, raising issues as i get older
it depends on energy costs and need to downsize prematurely as long as possible
in 10 years time may need different accommodation though currently living with parents
we chose to live here in 2013 with a view to long-term retirement love the village
depends on future over-development
family live 1 hour or more drive away and i may need to move nearer to them
at some point our house will be too large for us after our adult children leave home
depends on whether housing built - as no infrastructure improved eg sewers, health care and traffic
i am currently studying at university & i am planning to move my permanent address after i finish my course
once my child goes to university i will look for somewhere to live where i can walk to a pub / restaurant / bar / shop etc and where there is stuff going on
family connection also a factor in coming to bretherton
i would love to but i am renting now and property prices are very high in bretherton
it will depend on health and mobility and ability to drive and maintain our garden
driving ability and ability to maintain house and garden will affect my decision
who knows where life takes you but no intentions to move at the moment
hopefully will end my days here i hope so
until i die i like the area but a young adult i would prefer to life in the city
here for life as i get older may need to downsize to a village with shops etc
if no facilities supplied no i am nearing retirement and plan to stay in bretherton
set up my family home here would not like to be dependent in bretherton
unless decide to downsize i am fortunate enough to own my own home
retired here for the quiet peaceful location
due to my age may need care and help
if nothing disturbs the peace and quiet
i will not afford a house of my own here
overall a wonderful place to live

Bretherton Residents' Questionnaire Results October 2022

Question 7 If you moved here from elsewhere, what brought you here?

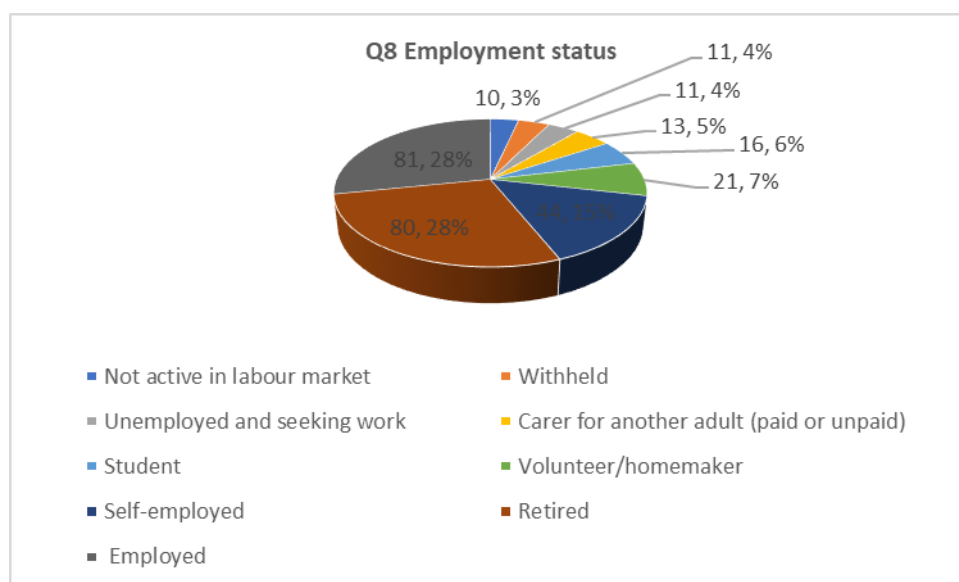

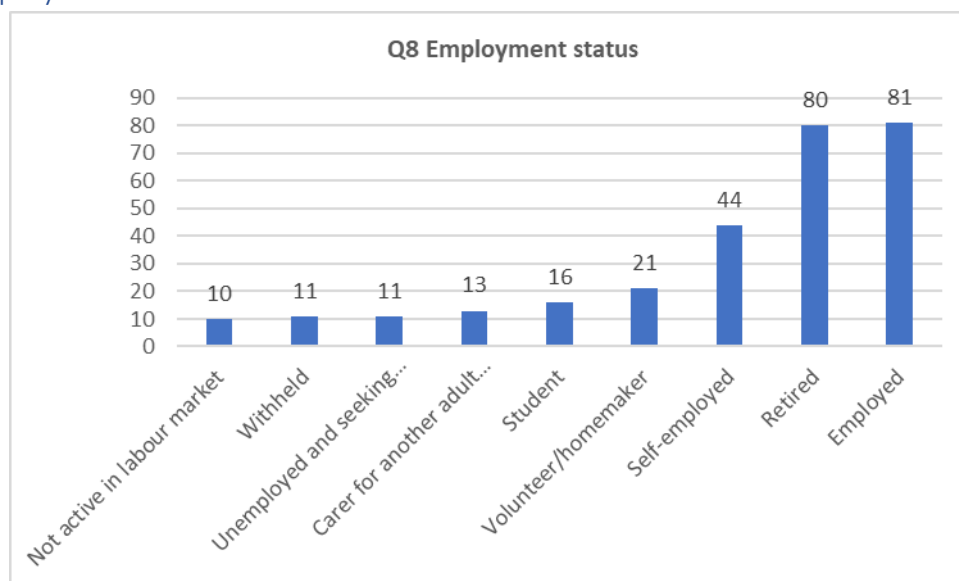

Question 12 Is your dwelling in Bretherton your main residence?

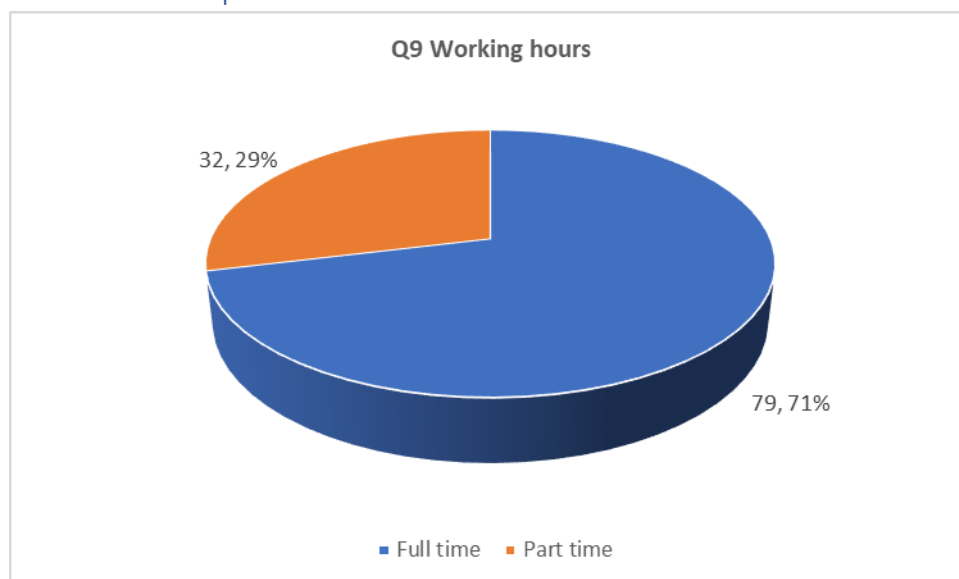

Employment

Question 8 Employment status

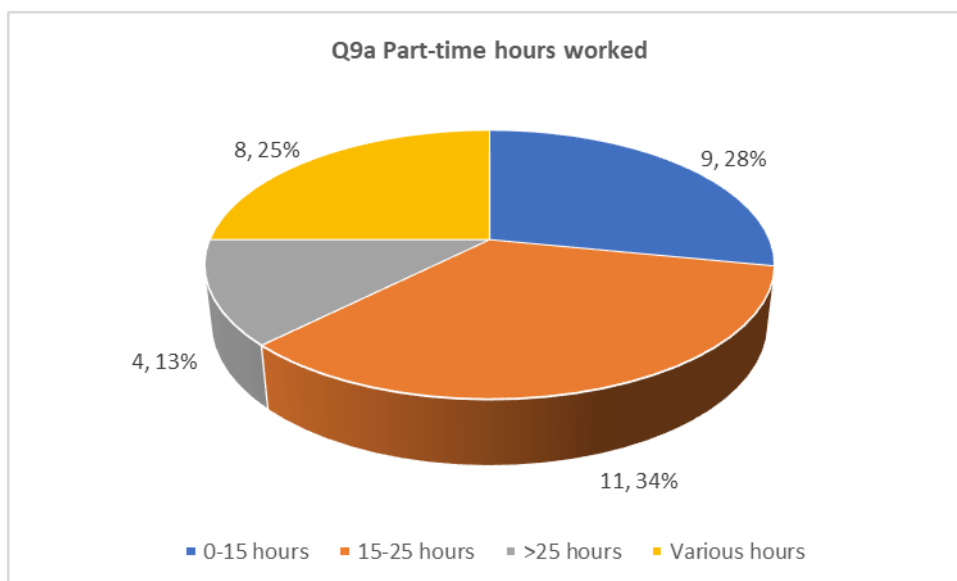

Question 9 Is your work full or part time?

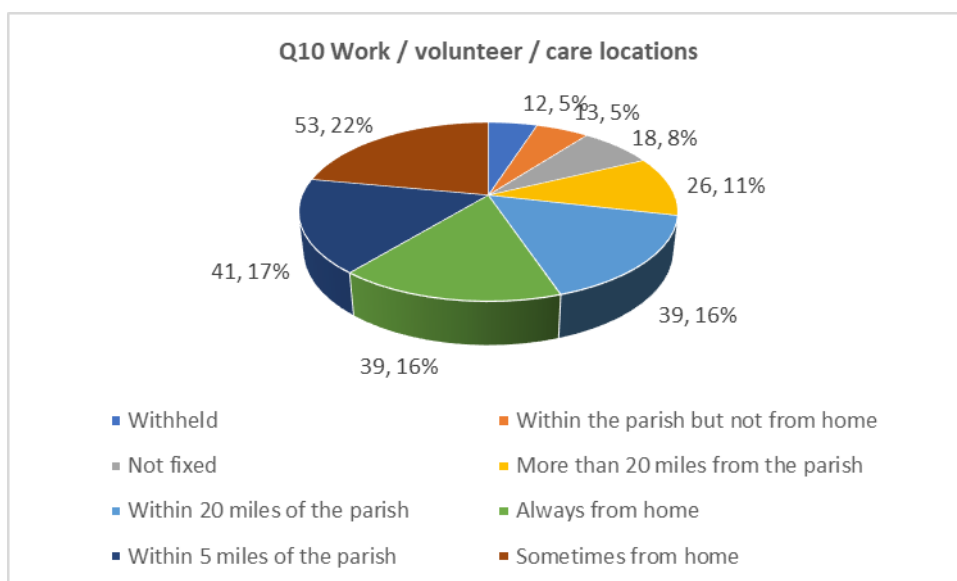

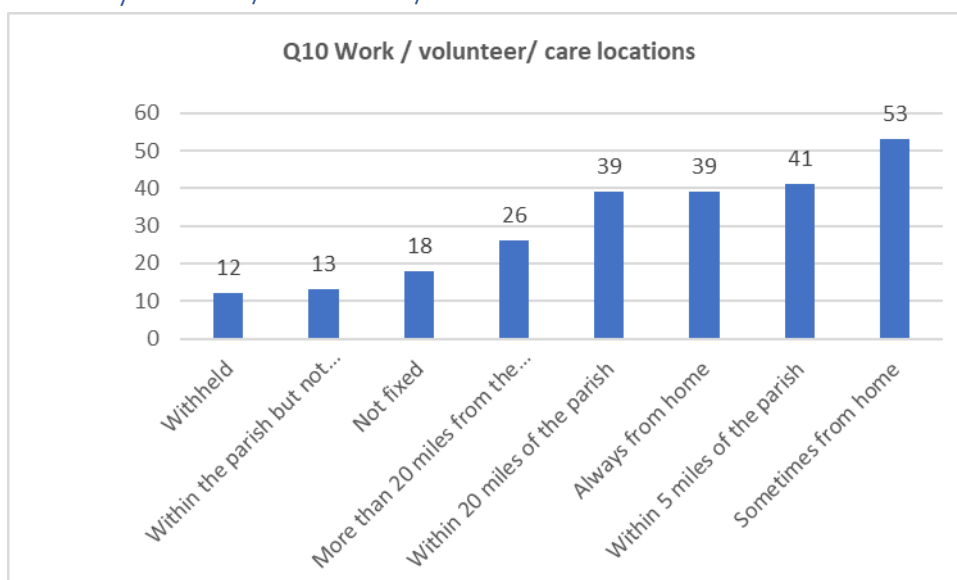

Bretherton Residents' Questionnaire Results October 2022

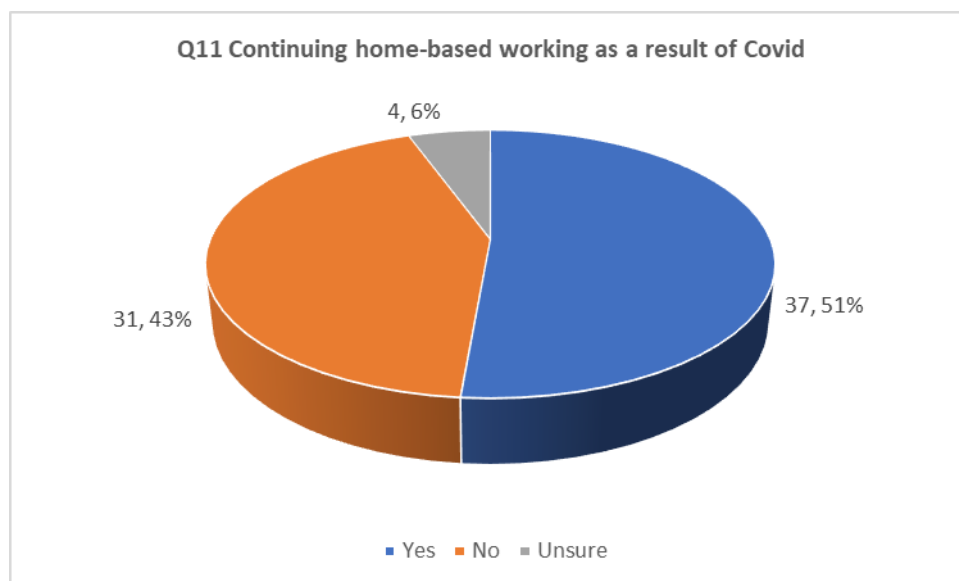

32 respondents work part-time with their hours worked summarised below:

Question 10 Where do you work / volunteer / care?

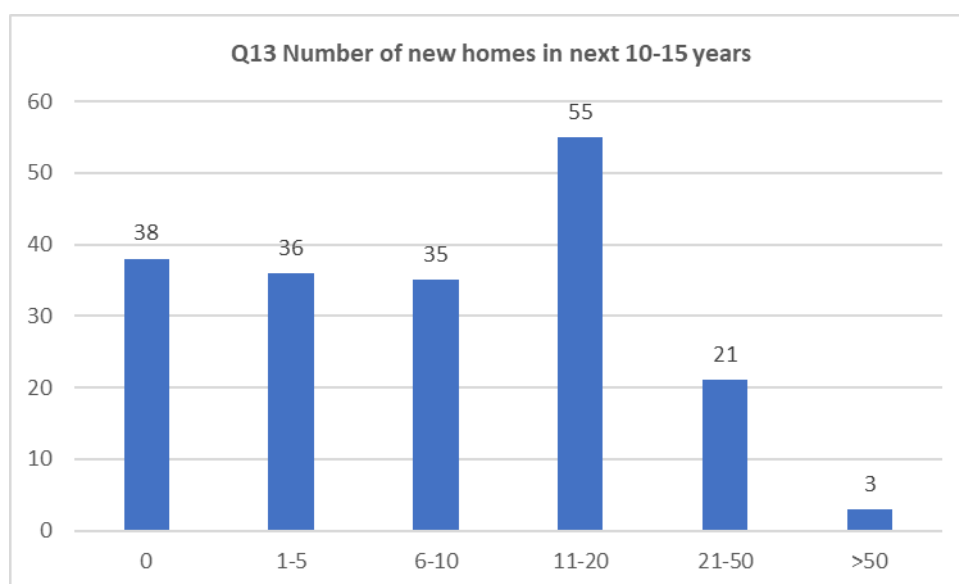

Question 11 If your work is wholly or partly home-based as a result of Covid do you expect this arrangement to continue?

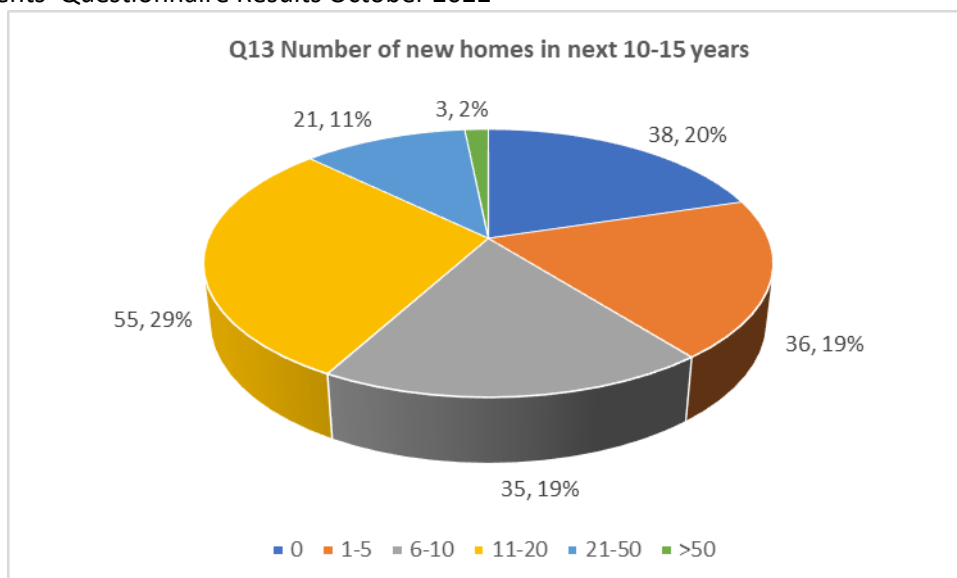

Planning and Development

Question 13 Thinking about the next 10-15 years, how many new homes should be built in Bretherton?

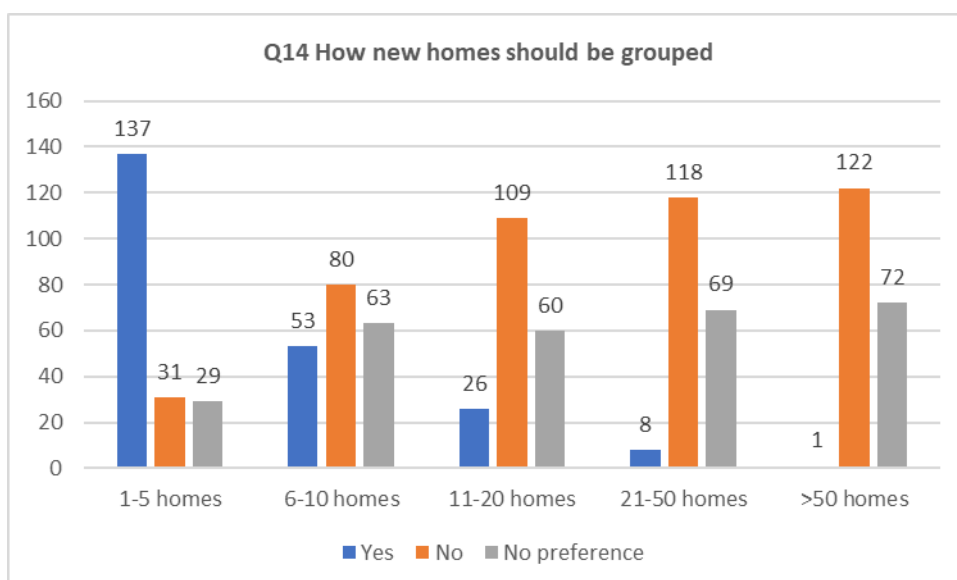

188 respondents commented on the number of new homes. Nearly 80% thought new homes should be built in Bretherton broken down as follows:

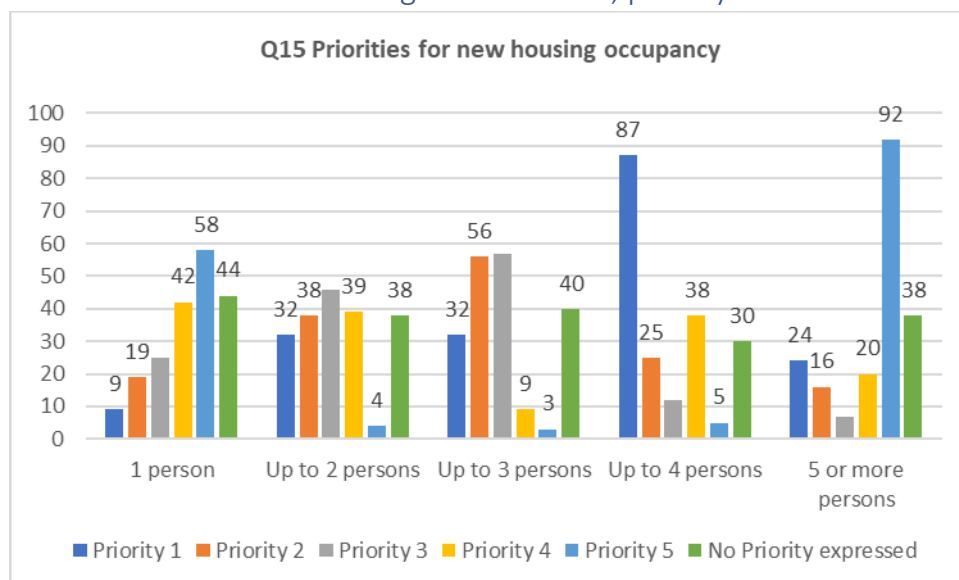

Question 14 if there was to be new housing in Bretherton how should they be grouped?

Respondents were asked to express “Yes” or “No” for each housing size group eg Yes to groups of 1-5 homes, No to groups of >50 homes etc. The responses are summarised here:

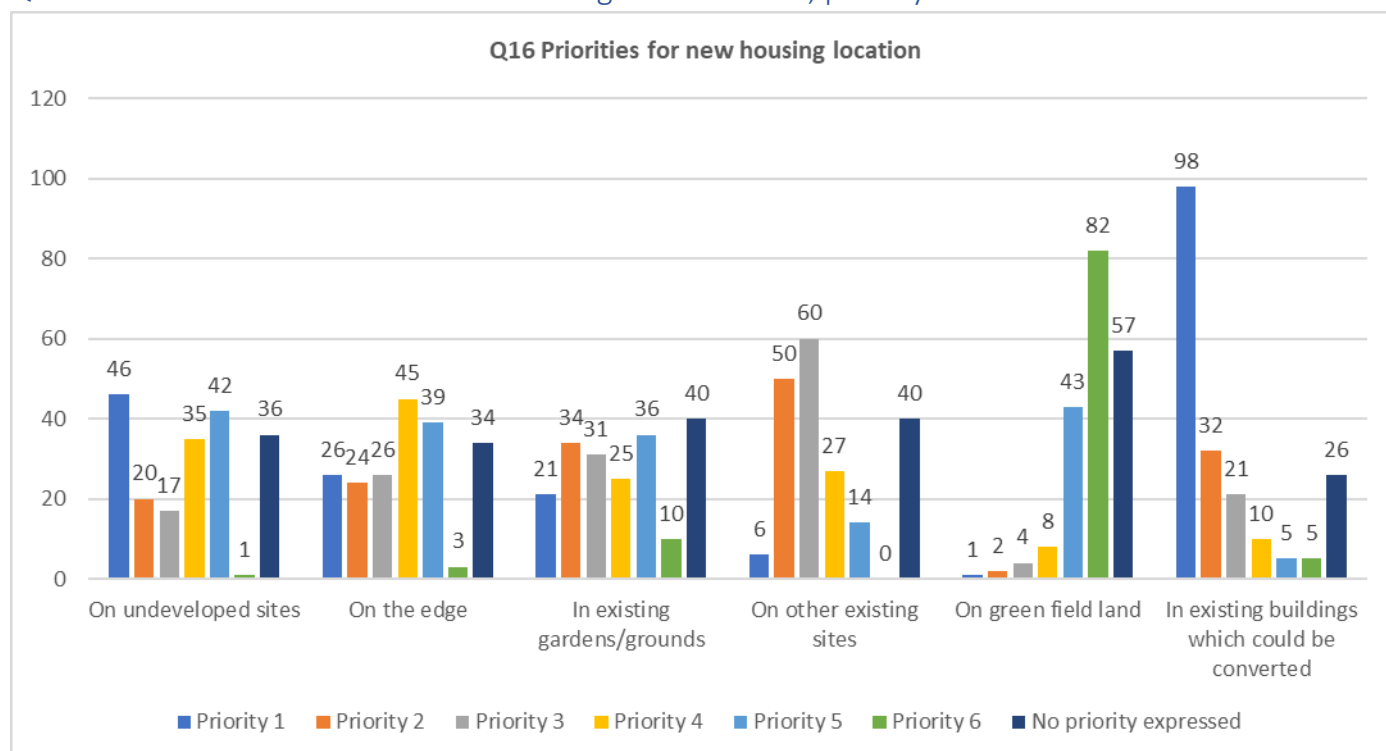

Bretherton Residents' Questionnaire Results October 2022

Question 15 If there were to be new housing in Bretherton, priority should be for?

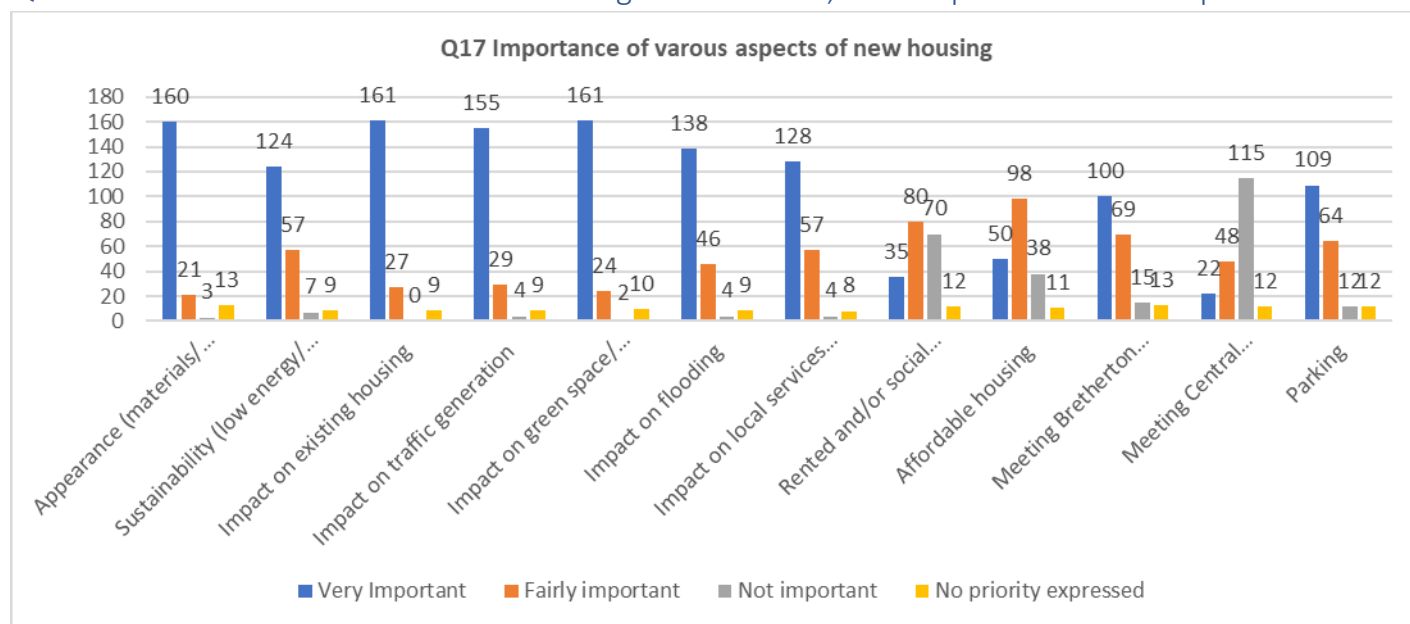

Question 16 If there was to be new housing in Bretherton, priority for its location should be?

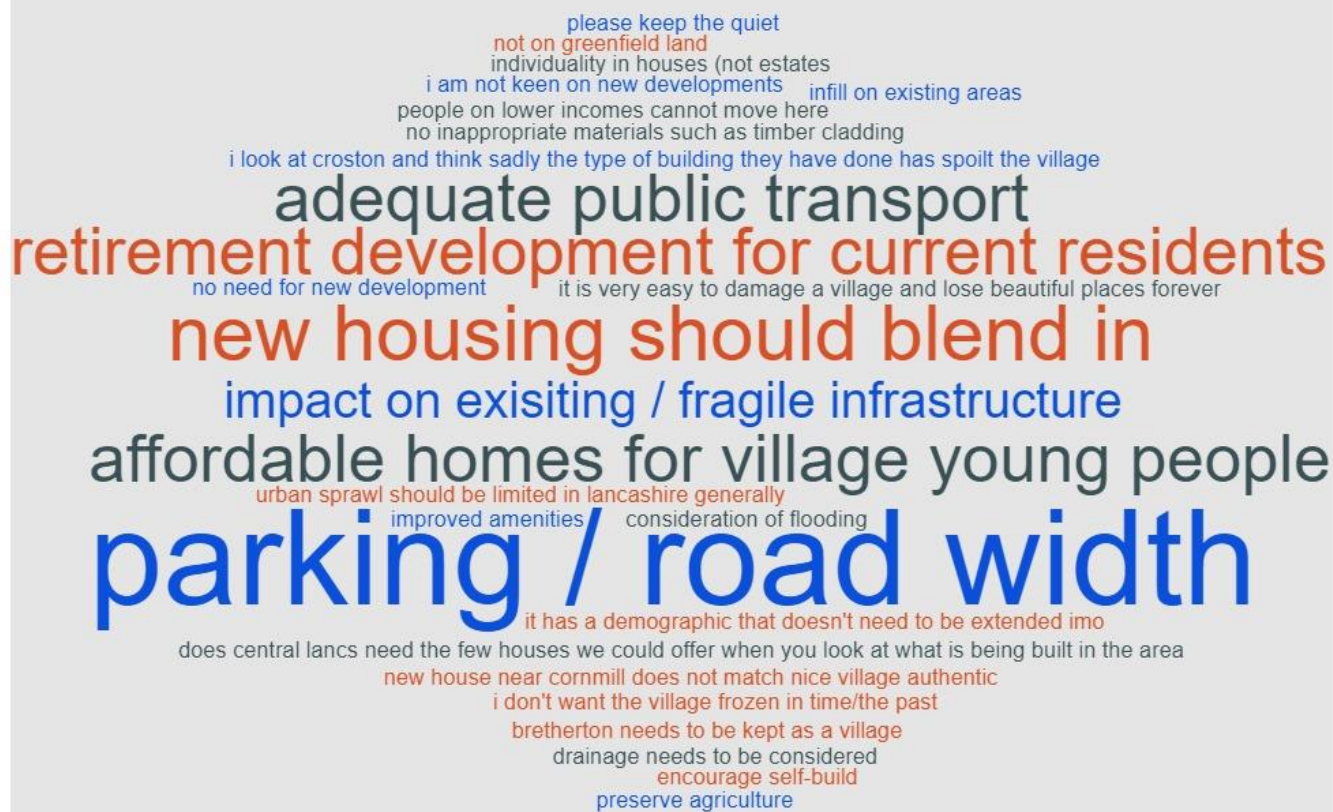

Bretherton Residents' Questionnaire Results October 2022

Question 17 If there were to be new housing in Bretherton, what aspects are most important?

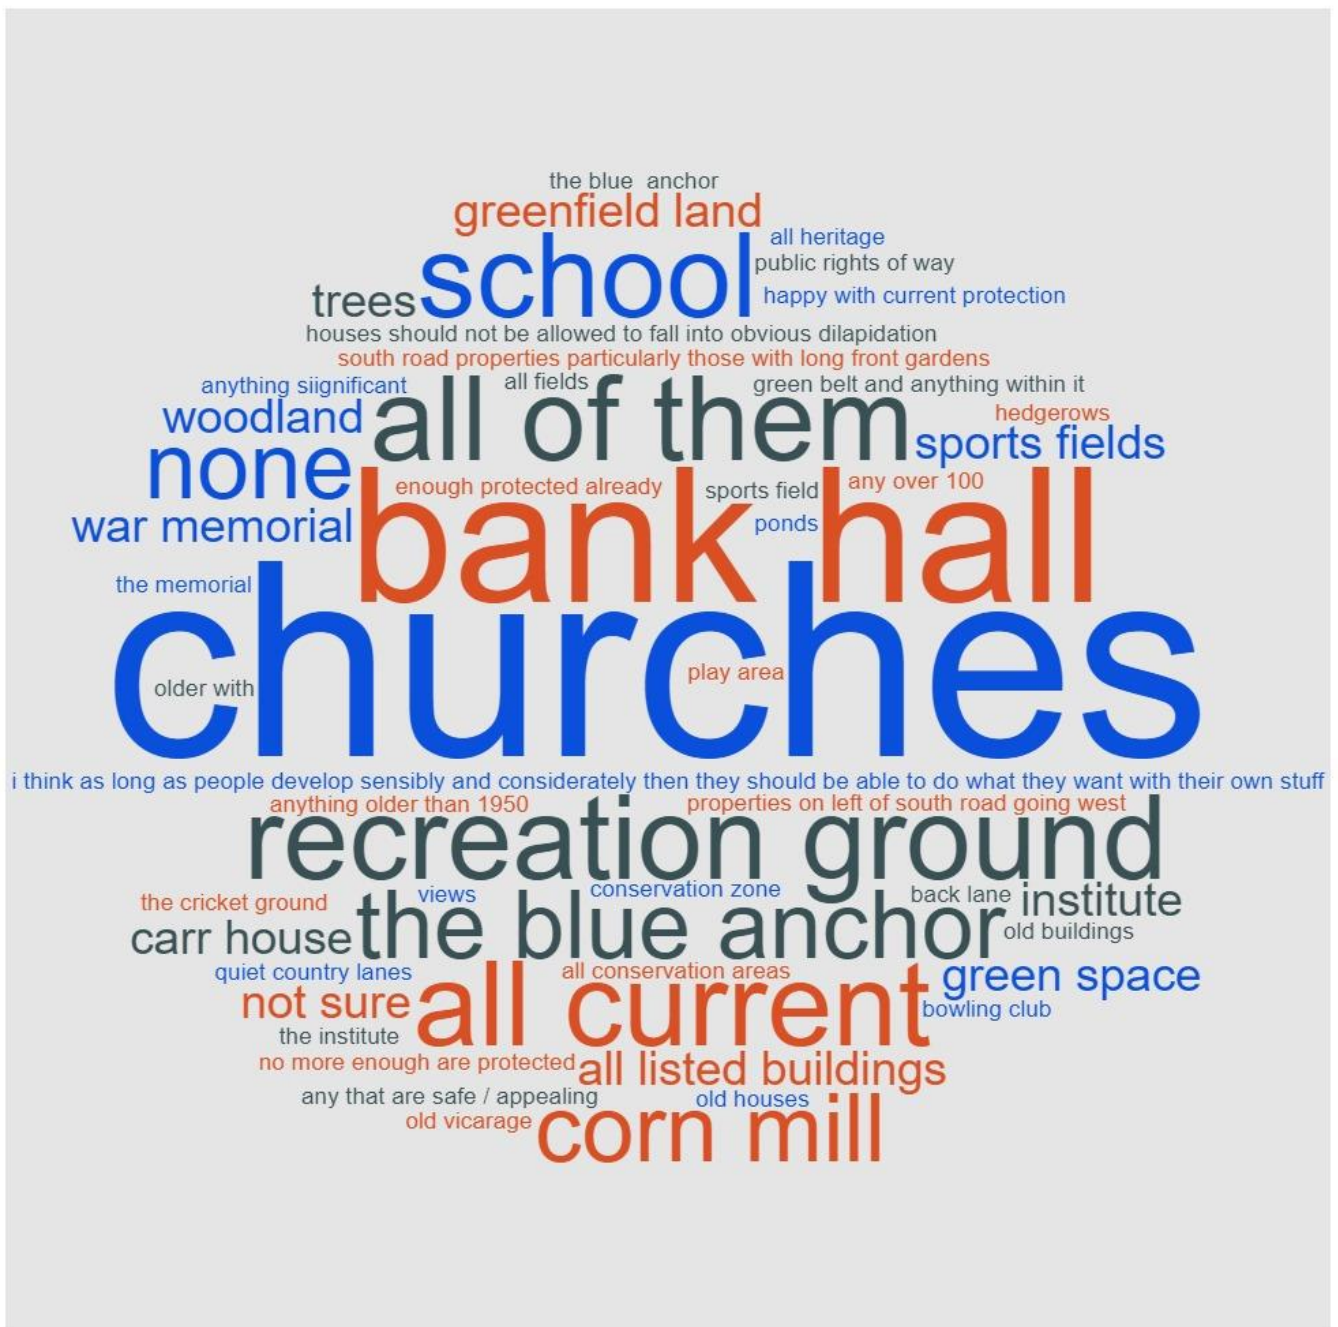

Other aspects that were considered important are:

Question 18 Thinking about the needs of Bretherton in terms of employment, sustainability, health, education and amenities what other developments do you think are needed now?

Page 21 of 118

those places make our village special
respect for those who gave their lives
jacobean architecture all these need protecting
so appreciative of what people did to save bank hall
it could be made into a local hub
village made up by residents but it's also the sum of open land
bring in a change or alternative and that will be the new norm they aren't being built any more
institute for the needs of the village
corn mill is a distinctive building & could be used for a variety of purposes if upgraded
the conservation area and listed building regulations provide the needed protection if churches were to close
housing needs to be adaptable to become economically sustainable with rising bills
just look at the difference between bank hall and the new build where croston hall used to be - says it all really
regardless of their usage within the community in the future the structure of these building should be listed (therefore potentially repurposed if need be in the future)

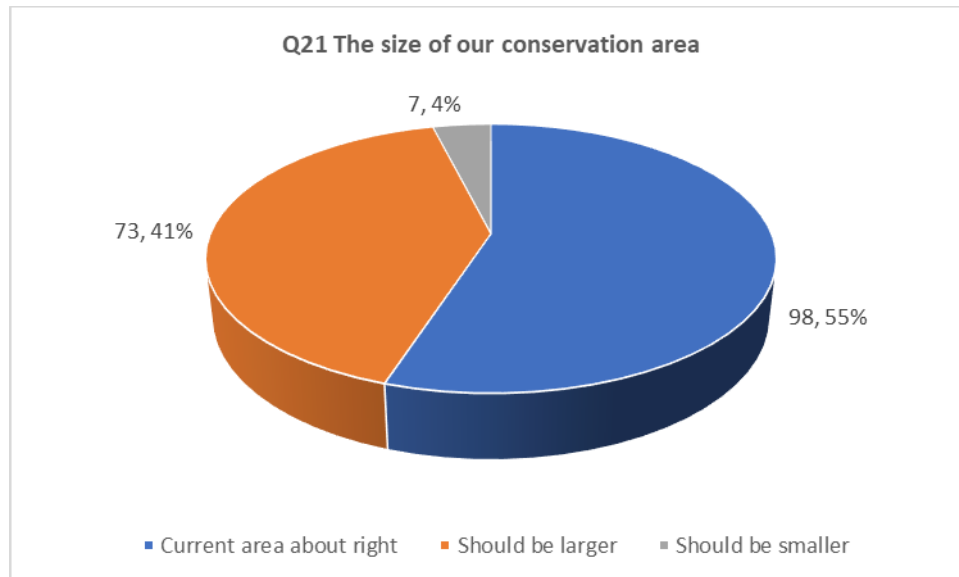

preserve village character
to preserve the look aesthetics
preserve heritage and history
to maintain a healthy and attractive environment why not preserve culture
preserve the village identity

not all the owners of listed buildings can be trusted to maintain the integrity of them - which in turn helps to maintain the integrity and ambience of bretherton
corn mill has scale and character because they are protected for a reason
open space in the heart of the linear village is a key characteristic of bretherton and should be retained
important focal points for the community
they should stay club provides social interaction and activity for older members of the community
attracts crime and looks untidy not protecting them would change the feel of the village/community
to preserve the semi-rural aspect and ensure green space for all
to help maintain a diverse ecosystem somewhere for children to play and engage in sports safely
contains history and wildlife the village shouldn't change to allow for affordable housing
tress and green space give character to village
if they go we will not get them back again
for residents it is a special place there are so few and they are insignificant
protect against housing development

Question 20 Which special views within the village or from the village do you think should be preserved eg Bank Hall, Winter Hill, Harrock Hill or others?

Question 21 What do you think about the size of our conservation area?

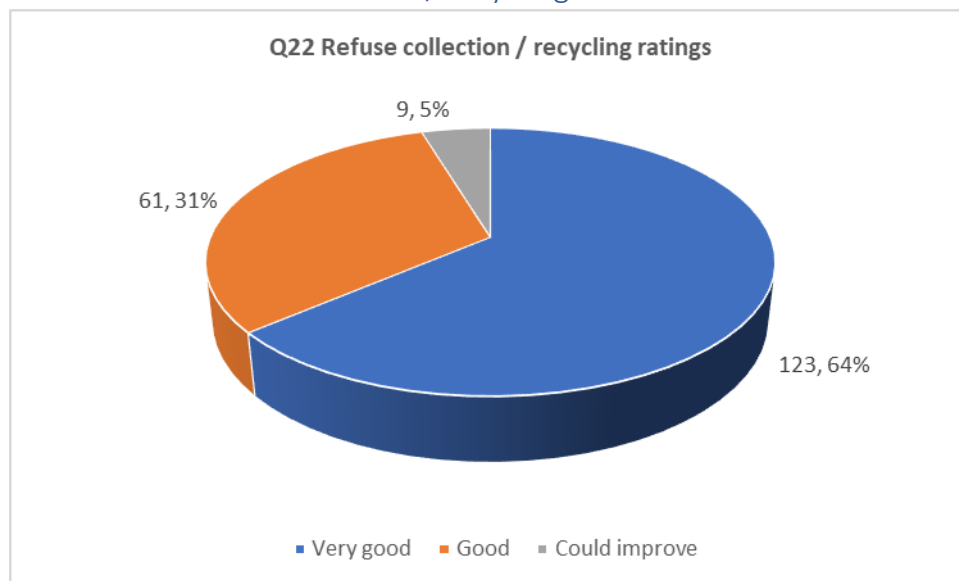

Additional comments included

seems illogical in terms of buildings
i see no reason for this area to be a "conservation area
centre" village section excluded as is only pub
some of the cottages and buildings will have considerable history
this in my view is merely to protect existing residents from being overlooked
think it would be better if it covered the area and buildings up to the bend (over hall farm) not sure why it doesn't
it should stretch between south and north road
carr wood would be perfect
hard to see on map

Environment and Landscape

Question 22 Please rate the refuse collection / recycling in Bretherton

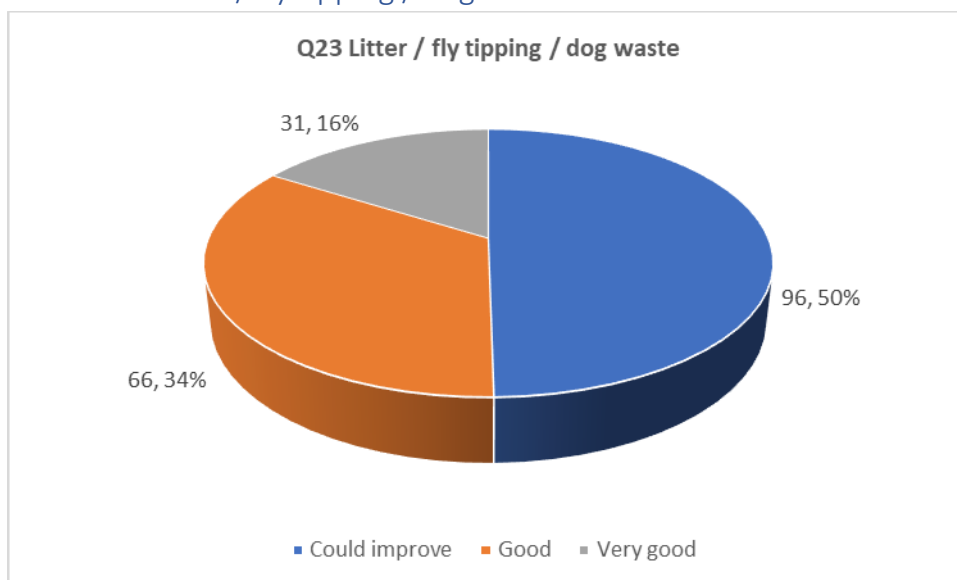

Comments / suggestions for improvement

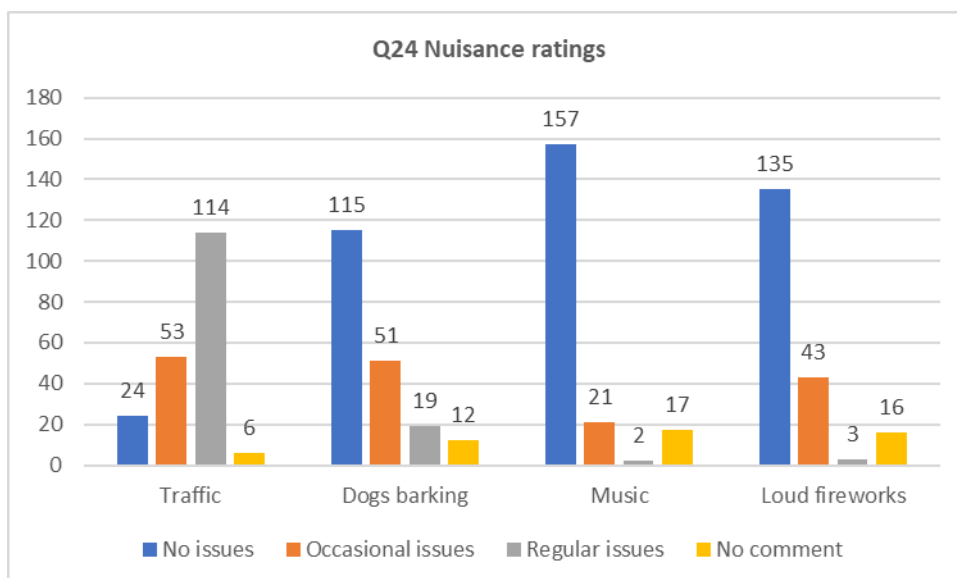

A word cloud visualization of feedback from Bretherton residents regarding waste collection services. The words are arranged in a roughly circular shape, with larger text indicating more frequent or prominent feedback. The colors of the text (blue, orange, and grey) correspond to different categories of feedback: blue for general service and recycling, orange for specific collection requests and issues, and grey for general satisfaction and accessibility.

start food waste collection
more litter bins
more village clean up days
works well thanks to chorley bc
more bins needed take more care with broken glass
good bin collections
red bridge bin sometimes gets left behind
more "skip days"
they collect every week including bank holidays
much valued and efficient overall from chorley refuse collection good
more cardboard collections
litter dropping / fly tipping still a problem
empty more often in summer
recycling should be top priority; recycling should be top priority
start compostable waste recycling; start fabric recycling
we get very good service compared to elsewhere
start tetrapak recycling
village collection bin quite adequate on several occasions our bins go missing
start community garden waste recycling
very happy with this bins are always returned neatly
improve dog waste collection
clean due to local litter pickers
return bins to right place
council tip very accessible

Question 23 Please assess litter / fly tipping / dog waste

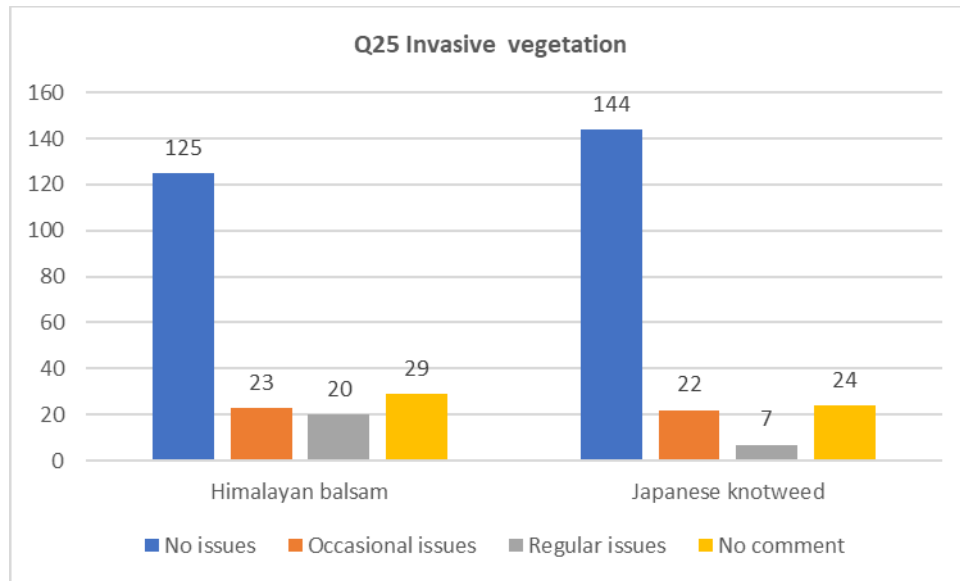

Question 24 Nuisance

Other

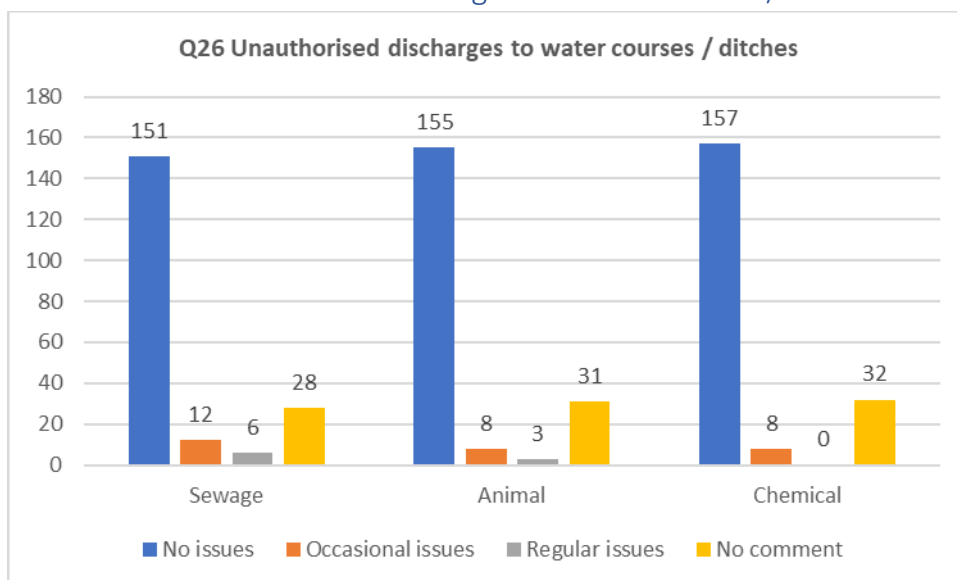

Question 25 Problems with invasive vegetation

Other

hedges not sure
ragwort none
mare's tail
himalayan balsam in back lane
overgrown trees/ hedges
ivy is damaging to many trees and could be controlled easily
giant hogweed looks like cow parsley but is a serious skin irritant
himalayan balsam is altering the environment in the back lane / sarah lane area
lots of himalayan balsam on riverbank along the moss
giant hogweed is becoming established on the yarrow/douglas, as is floating marsh pennywort on lostock and wymott brook too
giant hogweed down thornfields road, back lane, public footpaths cause serious burns if contact with sap
impossible to control but although harmful to other native vegetation is benefit to insects
himalayan balsam encroaching from croston side and becoming very widespread
pathway down side of holly farm
action to stop its grow, wherever it appears is essential
heights of overgrown leylandii(often dead in parts
ditched not maintained nor water courses - serious
unknown cause localised flooding
unsure mare's tail weed
on sarah lane

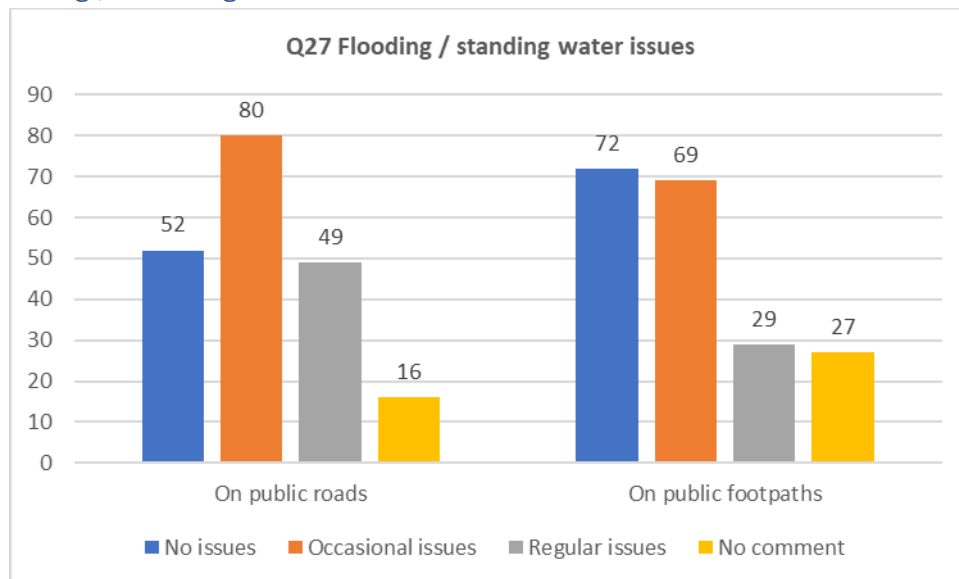

Question 26 Problems with unauthorised discharges to water courses / ditches

Other

not known
unsure
unaware of any
pollution to water courses, rats etc
main sewer unable to cope with heavy rainfall - a major issue if housing expanded
sewage system no longer adequate for the number of houses and the frequency of heavy rainstorms
none as far as i am aware but not really qualified to comment
mainly from domestic animals: not adequate cleaning areas
not noticed any of above
not that i am aware of
on the moss
unknown
not sure

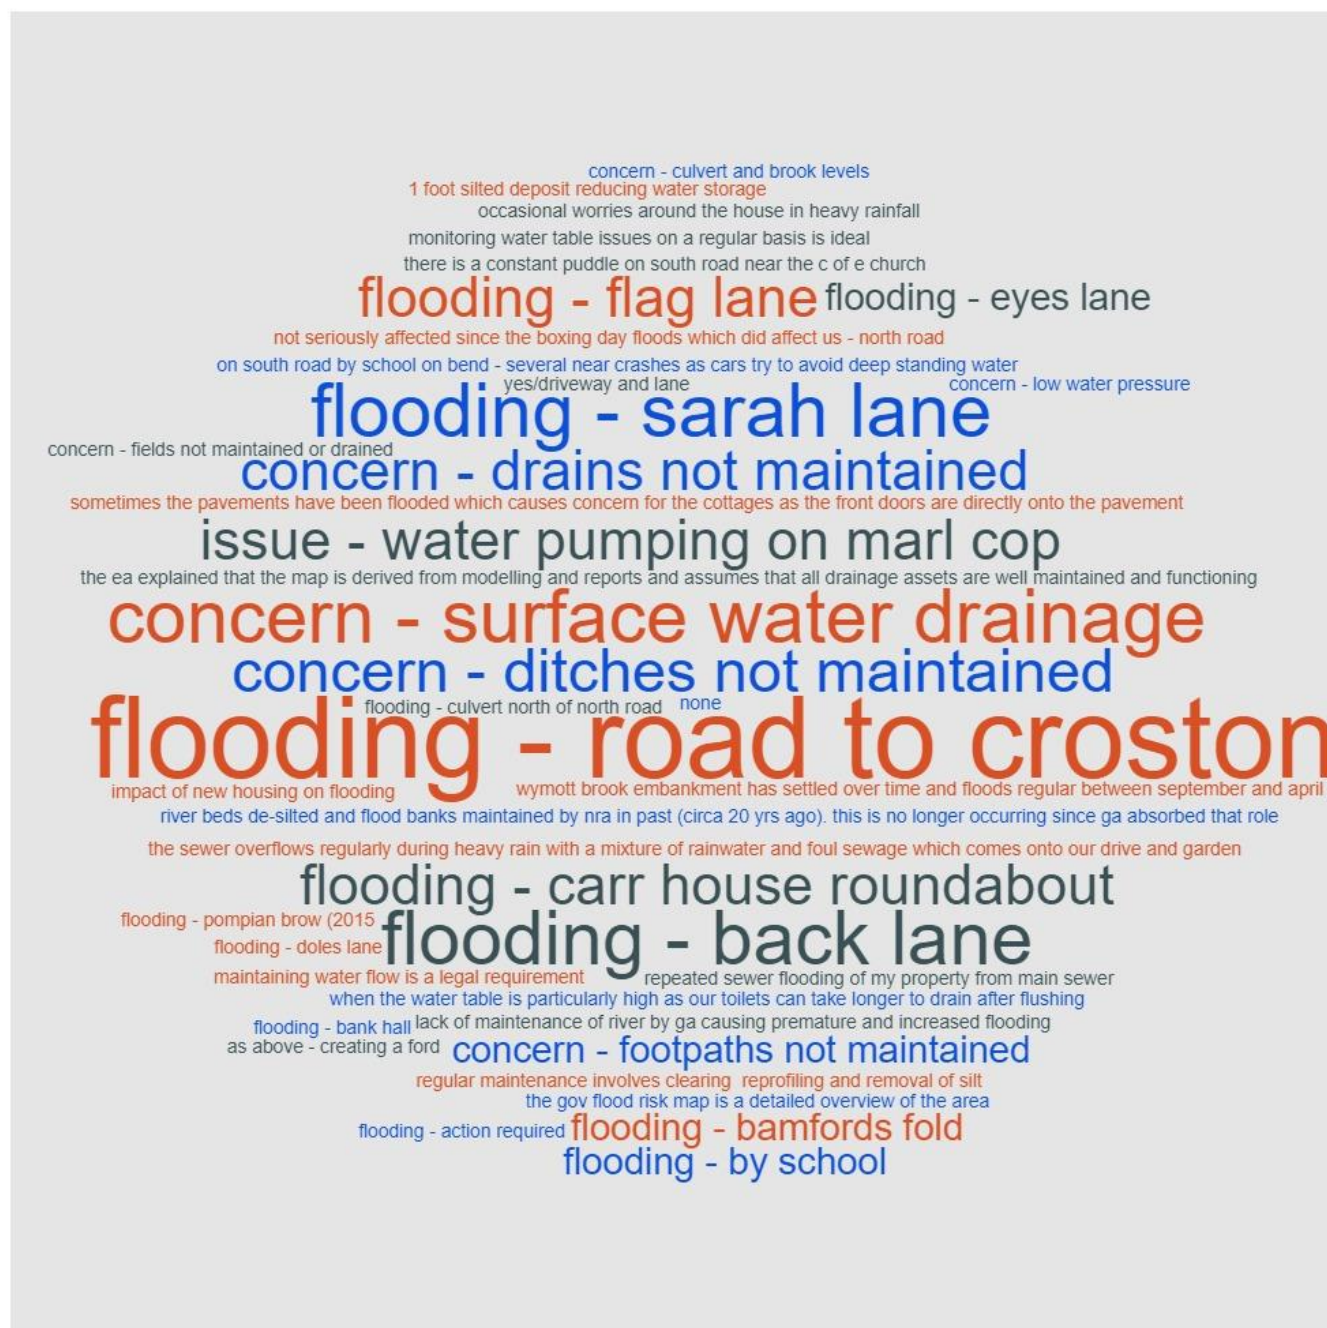

Question 27 Flooding / standing water issues

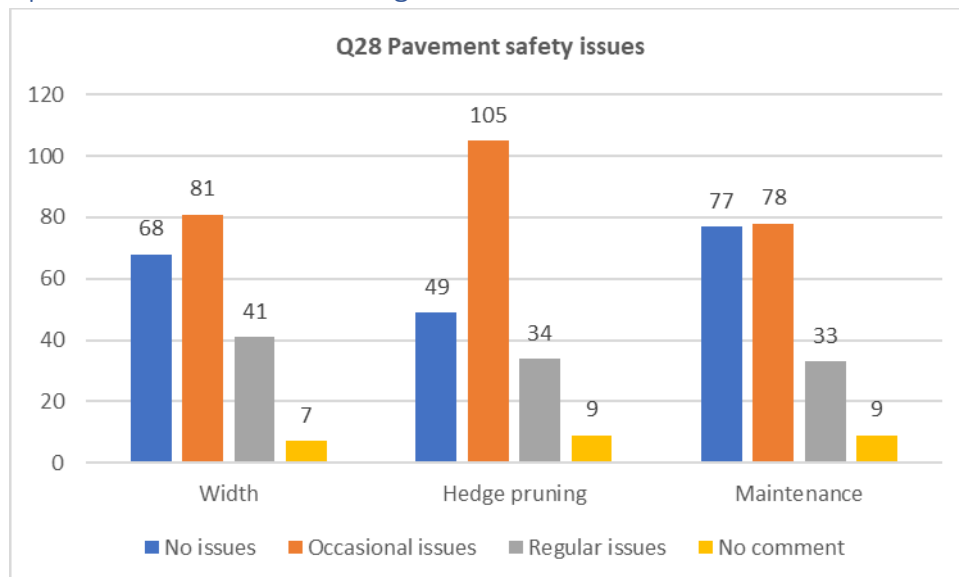

Other

road out of bretherton to croston
property grounds regularly flood
paths off eyes lane flood quite often
footway between 95 and 97 south road
ditches around the village need clearing
the road to croston occasionally floods
ditches not regularly (?) drained
sarah lane the road into croston floods badly
flag lane between s bends and ardlea (mid-point) by the school on road
sarah lane / back lane flooding during wet periods
road drain at "old school" keeps blocking and flooding
sarah lane often floods as does flag lane into croston south view
south road, corner near school with heavy rainfall
water gathers at the entrance into bamfords fold in bad weather
the long straight road that goes past ardlea on flag (lane) rain floods
sarah lane needs some work to prevent the flooding causing damage
too many ditches have been filled in or are allowed to become overgrown
when ducted pipes are too narrow. hard standing at house and extra properties have exacerbated situation
agricultural land floods over 15 acres regular of prime arable land due to ea neglect to wymott banking
outside my property road camber is incorrect, water drains to my driveway
after heavy rainfall the bottom of north road always has large puddles
road to croston occasionally under water after heavy rain
on south road, drainage most footpaths get muddy but it is not really a problem
on the connecting road between croston and bretherton
road between croston and bretherton - but passable
muddy footpaths particularly on corner of north road/carr house lane
regular flooding on road by ardlea / fishing ponds
public footpaths around south view heading away from village
sarah lane is liable to flooding junction of bamfords fold and south road
flooding at end of north road **back lane** north road/ carr house junction
field and road prior to the croston bridge
specifically the corner near the school
junction bamfords fold - south road
overflowing drain floods garden

Any comments concerning these or other water issues, particularly if you have been affected by localised flooding around Bretherton

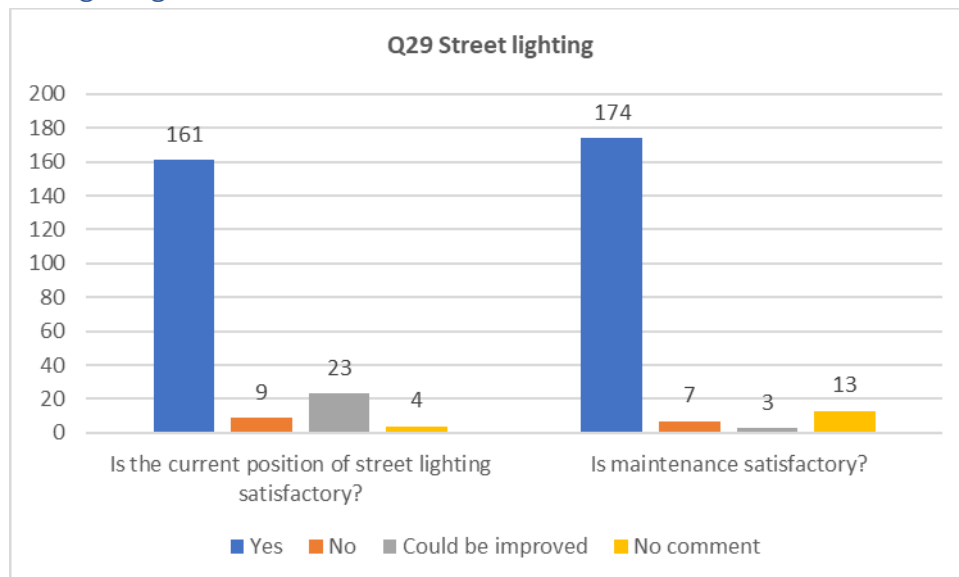

Bretherton Residents' Questionnaire Results October 2022
Question 28 Are pavements within the village safe?

How can these be improved?

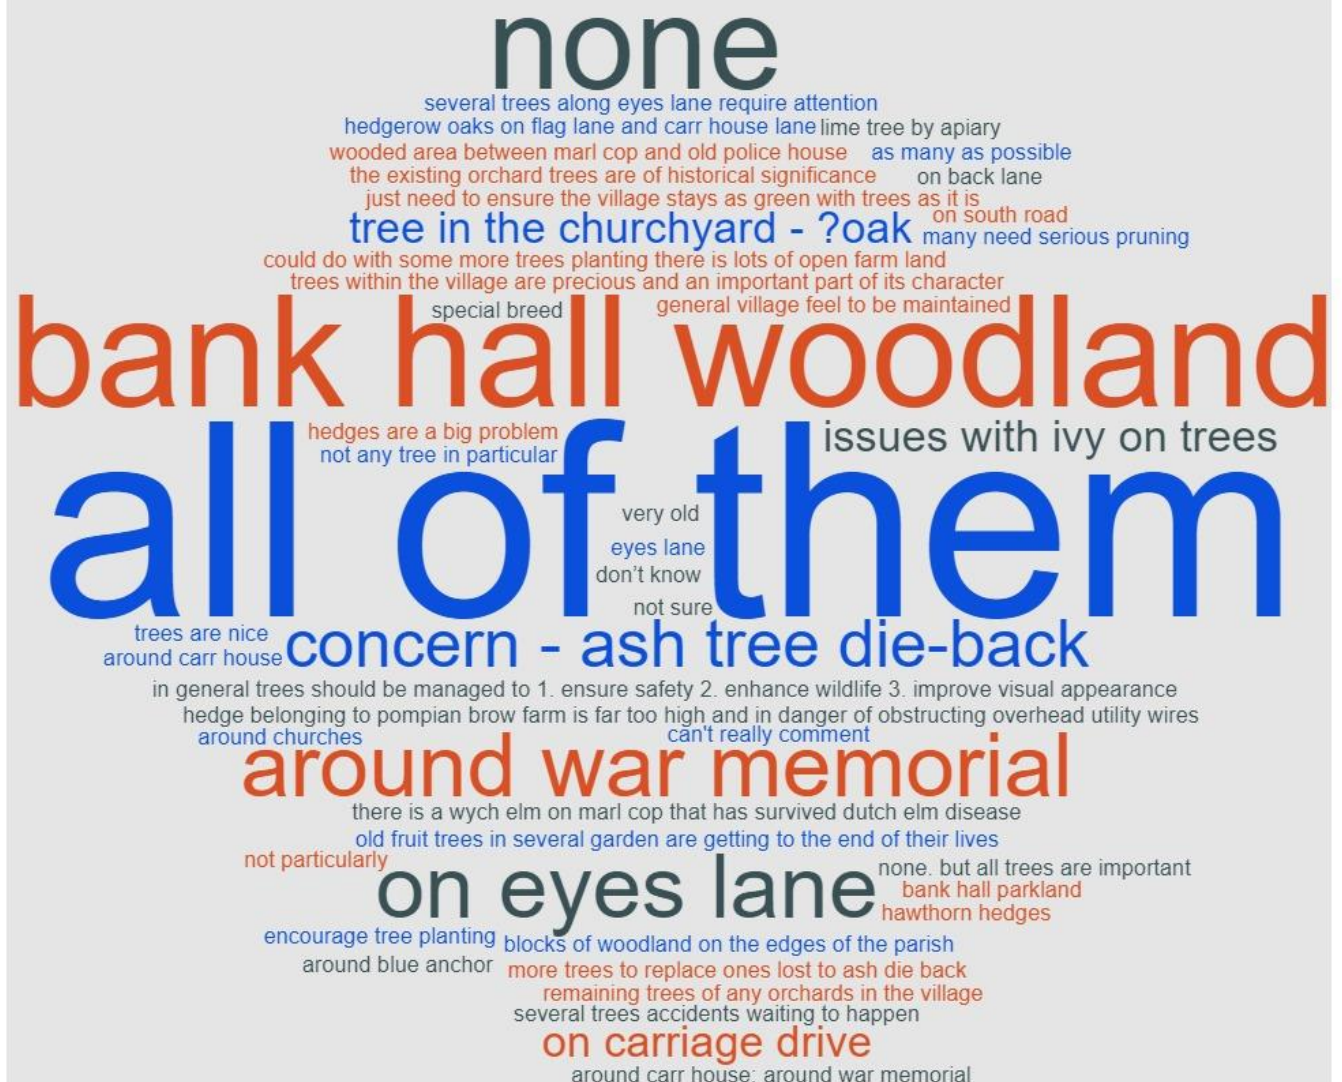

Question 29 Street lighting

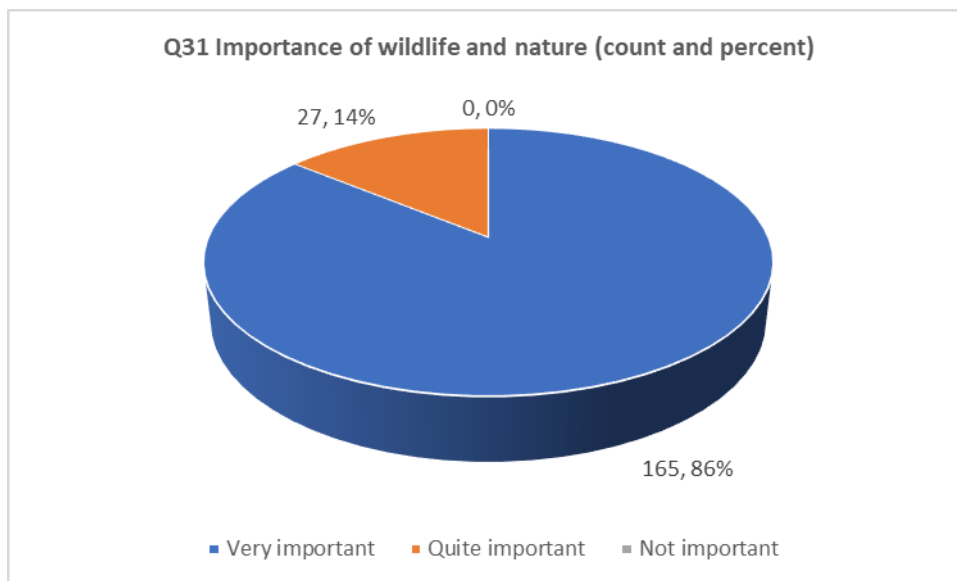

overgrown hedges and trees
visibility can be obscured at night
new lighting does not give off much light
no lighting on large bends around rural roads
its dark in winter but we are a rural village and don't
eyes lane has few " street " lights - totally unsatisfactory
led lighting does not give off adequate pavement illumination
footpath to croston is unlit, unsafe for children walking to high school
not safe to walk from the other end of the village to croston except in daylight
lighting should be switched off at 12.30 (energy saving) and also to allow star gazing
lights could be positioned to cast more light towards the ground rather than skywards
several light have the "lantern" obscured by trees preventing light falling onto the footway
impacts on times i would feel safe going out eg vehicles not seeing me as it goes dark (as a runner)
lights should be switched to solar to lower energy use for local taxpayer even if part solar/part mains
improve lighting routes to croston to encourage people to walk to amenities especially in winter
we are a rural village and as such don't need the lights they have on suburban estates
none
low light levels on north road make passage in the dark impractical without a torch
sufficient street lighting but in some places the light is restricted by hedges etc
north road - street lighting is insufficient especially in the 40 mph zone
lighting not strong enough to make walking safe in the dark
lighting could be switched off at 12.30 a.m to save energy
from carriage drive to red bridge there is one lamp
no street lights between croston and bretherton
street lighting not necessary in many areas
it is not safe to walk from the war memorial to the a59
street lighting ends abruptly
t want too bright lights

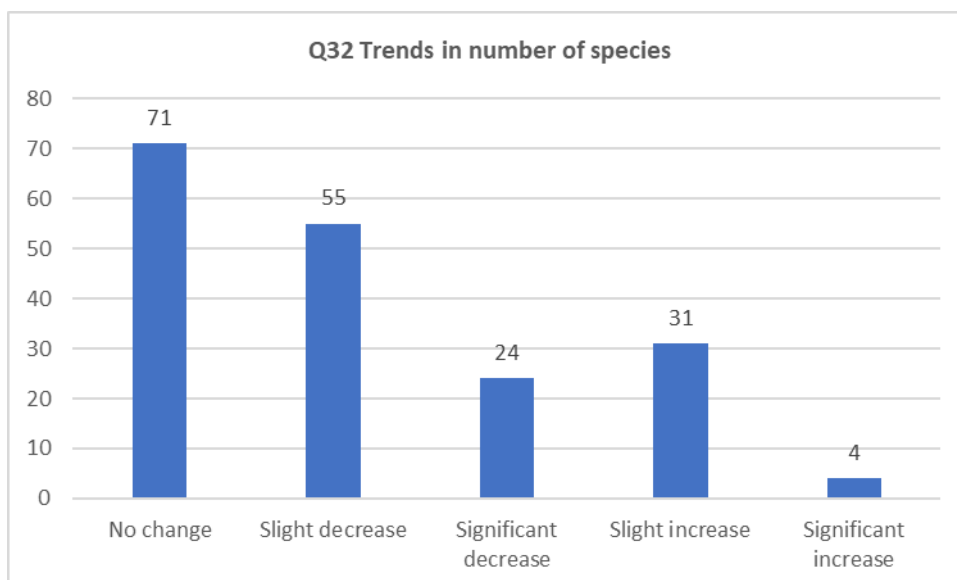

Question 30 Trees – are there trees that you feel are important in Bretherton and need preserving and / or need some attention?

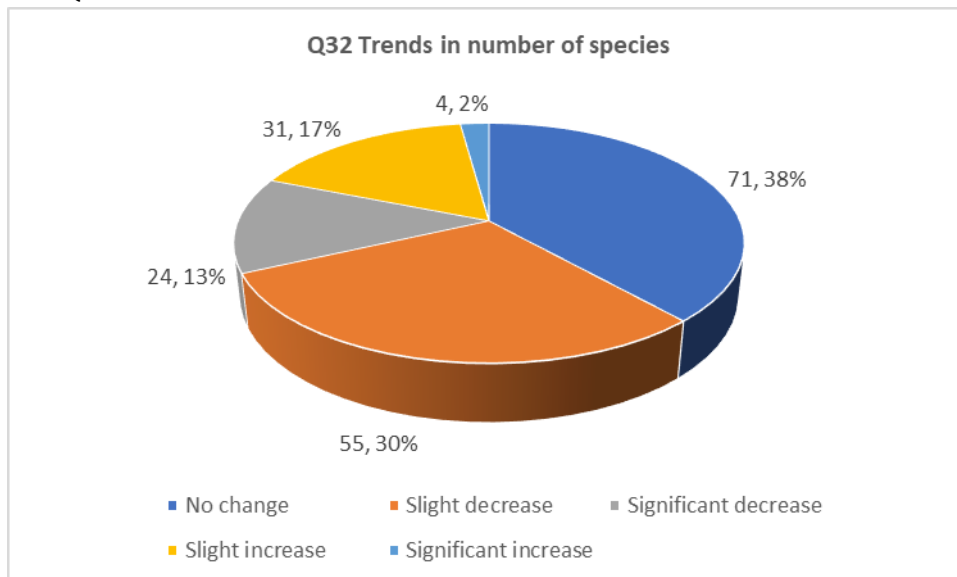

Question 31 Wildlife and landscape – how important is the presence of wildlife and nature to your quality of life in Bretherton?

Question 32 Increase / decrease in the number and variety of species you have seen in your garden or more widely in Bretherton

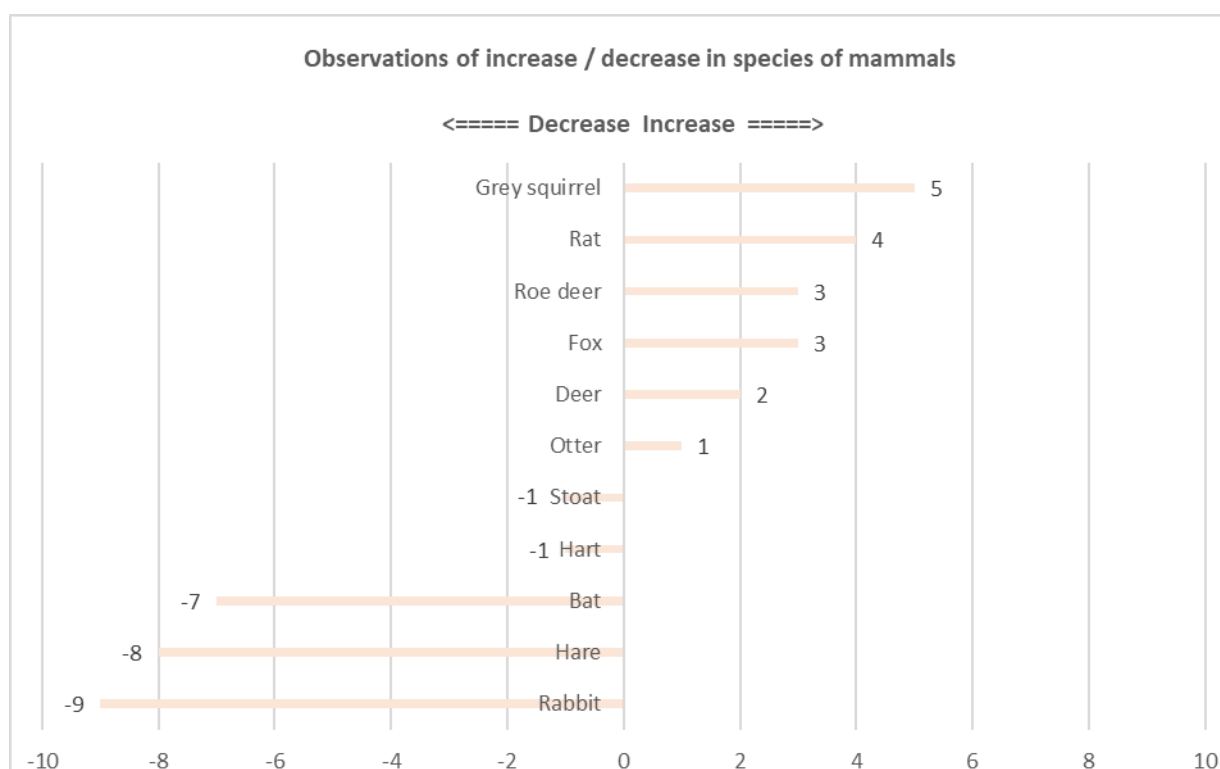

Question 33 Have you noticed any increase or decrease in the presence or number of a particular species in the parish?

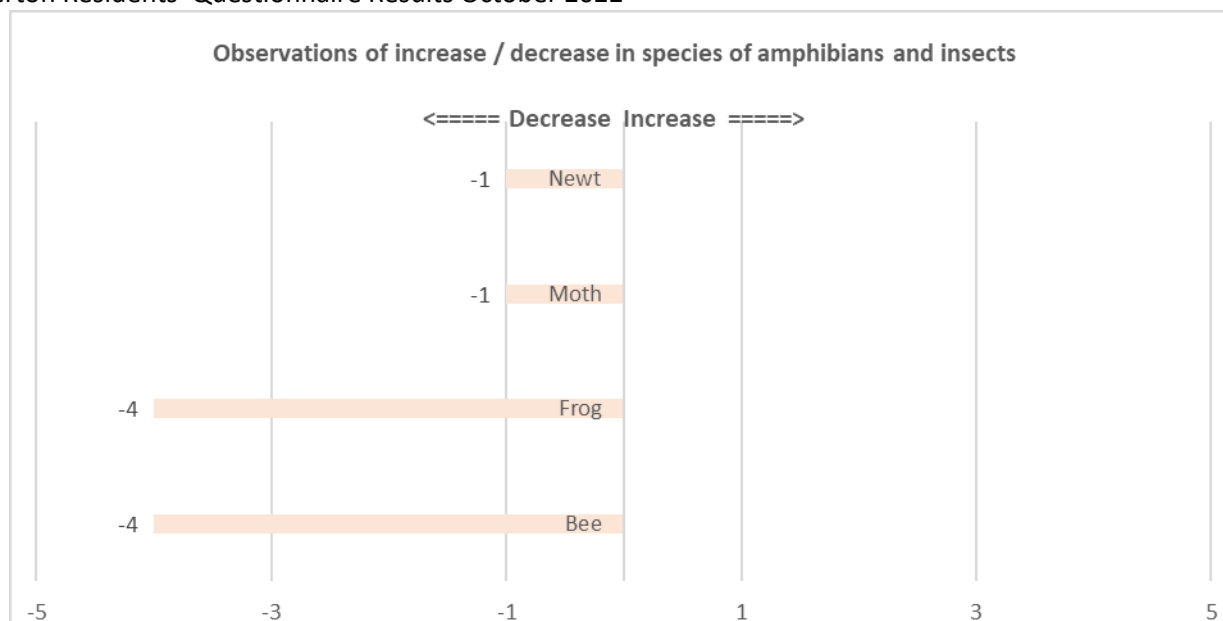

Respondents noted whether they had observed an increase or decrease in species – they were not asked to count animal or plant numbers, just to record the trend (decrease or increase) that they noticed.

Trends in mammals: A marked decrease in hedgehogs was observed (43 respondents observed a decrease, five respondents observed an increase).

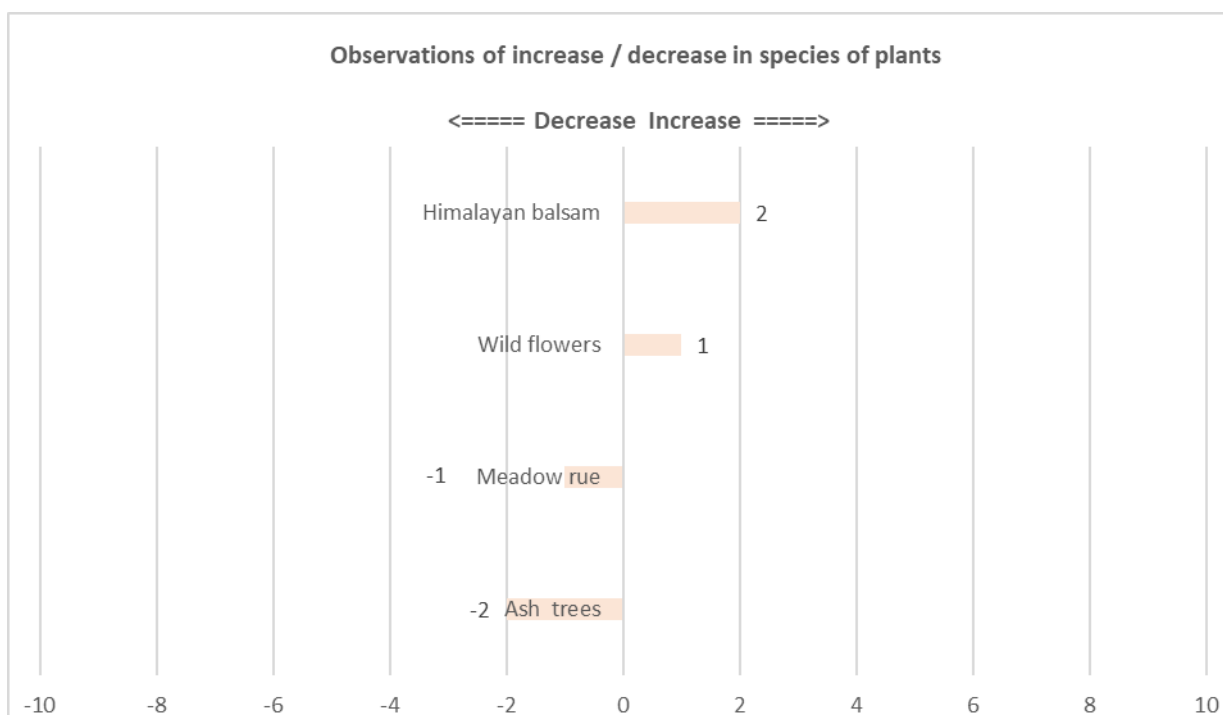

Trends in amphibians and insects: A marked decrease in butterflies was observed (24 respondents observed a decrease, four respondents observed an increase).

Bretherton Residents' Questionnaire Results October 2022

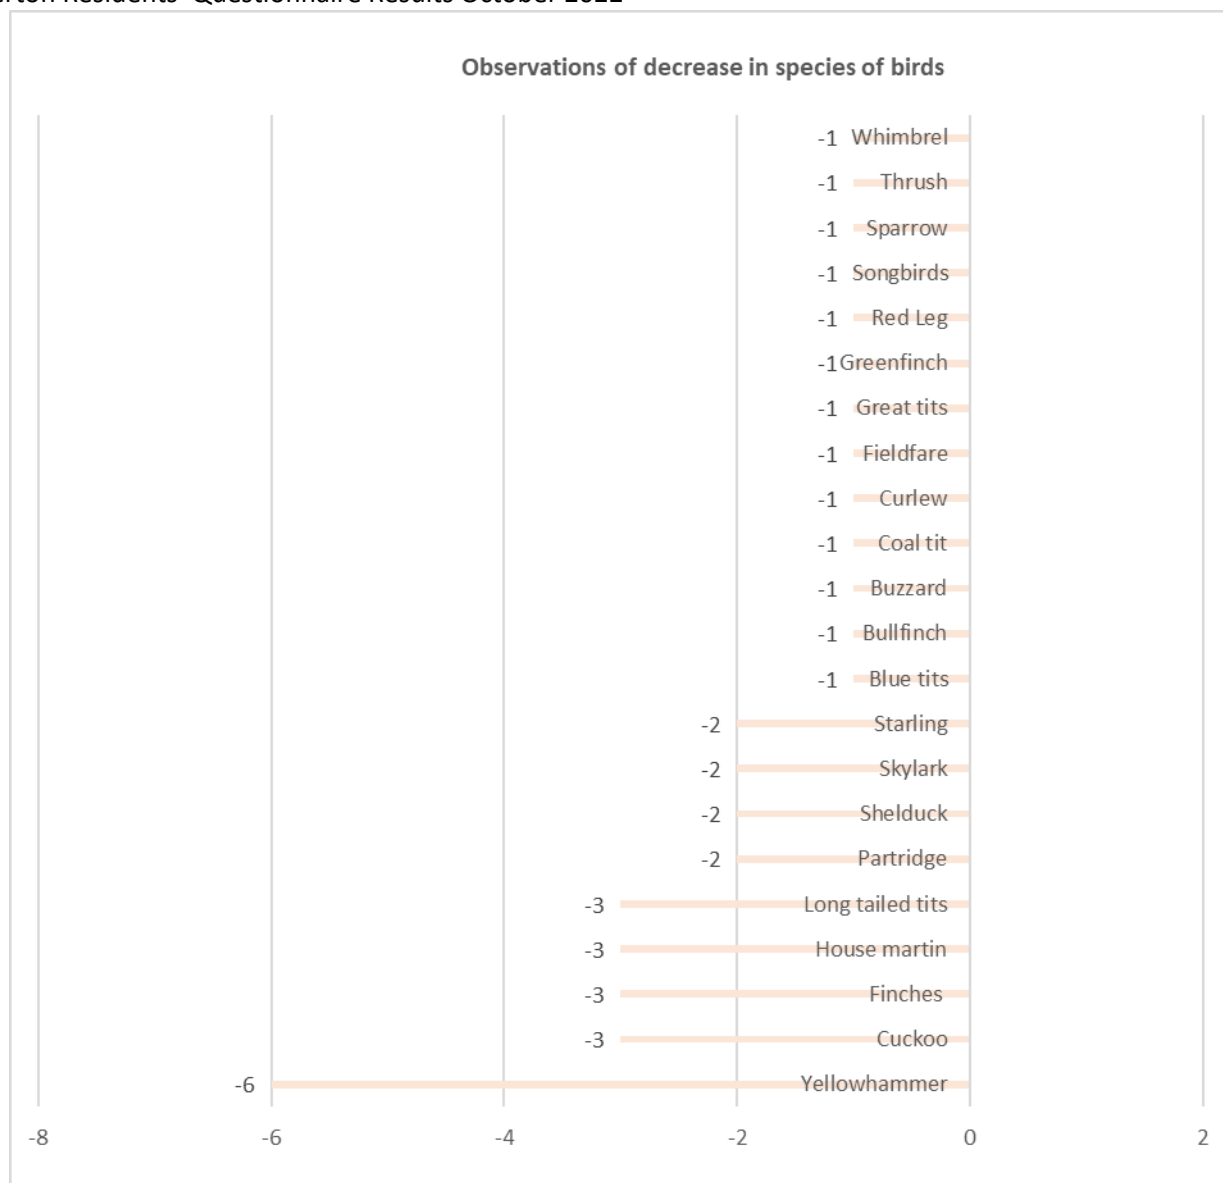

Trends in plants

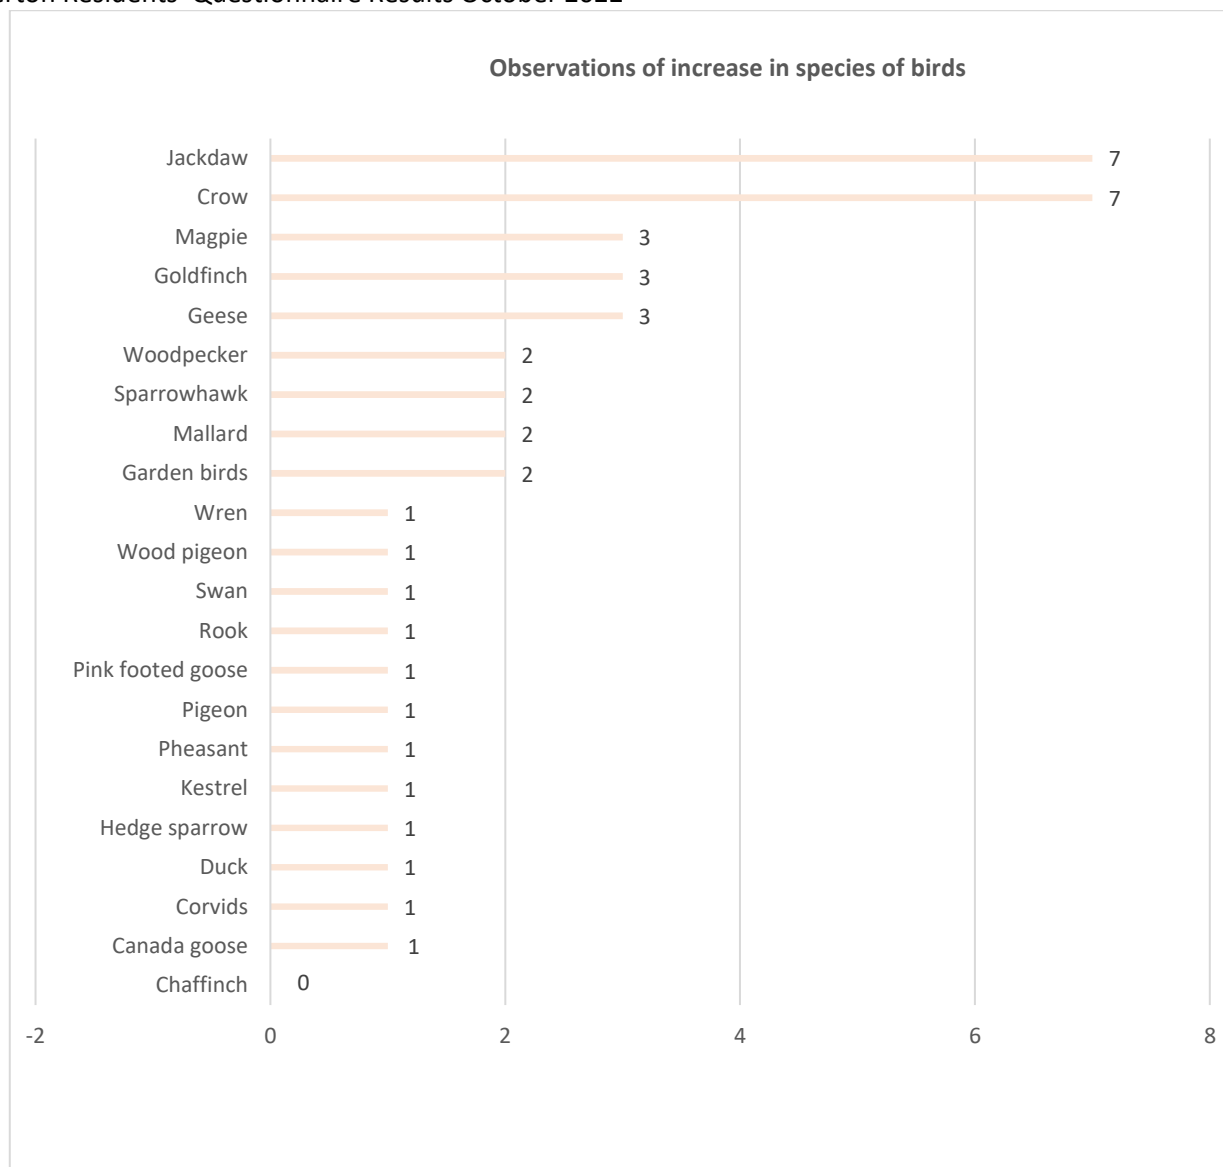

Trends in birds: A marked decrease in some species was observed:

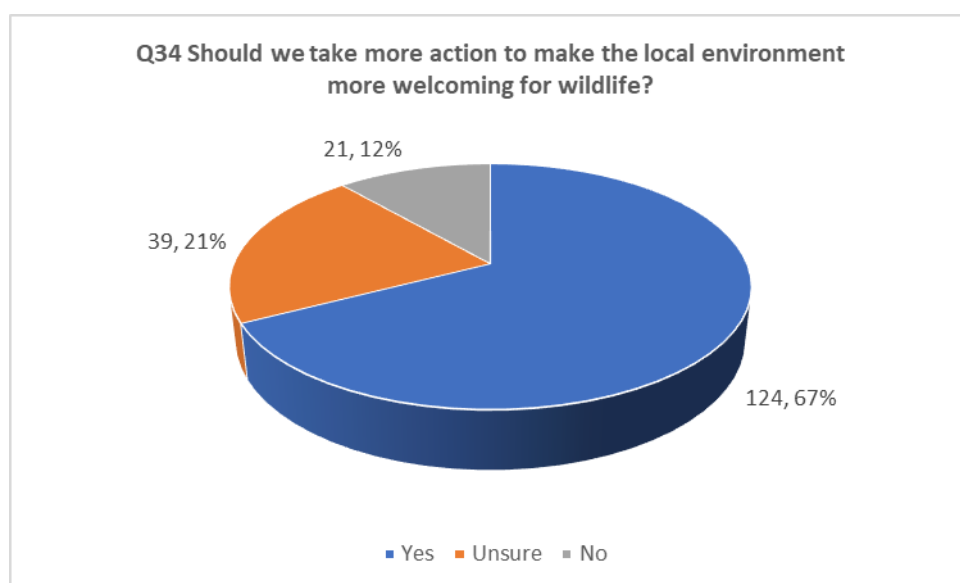

Species	Observers recording a decrease	Observers recording an increase
Lapwing	12	1
Owl	36	8
Swallow	11	1

Respondents recorded trends in many bird species. The results have been split between net decrease and net increase charts:

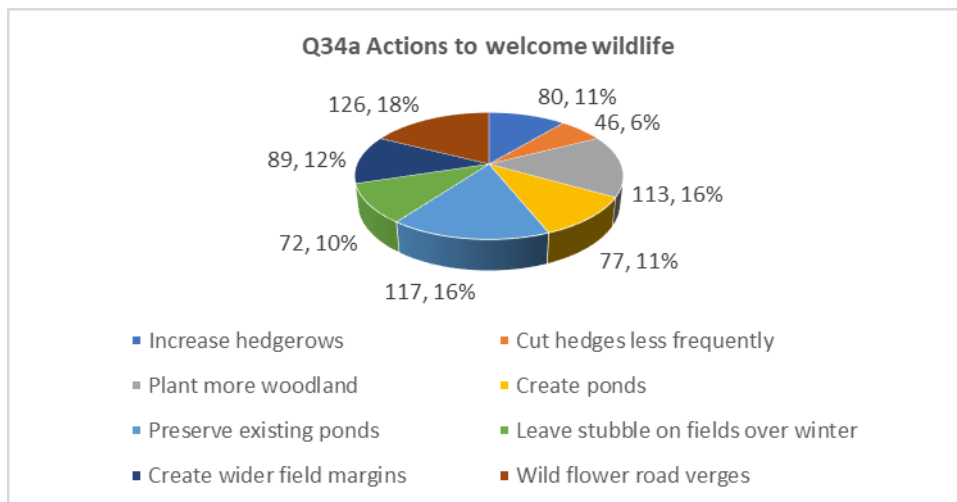

Question 34 Do you think our community needs to take more action to make the local community more welcoming to wildlife?

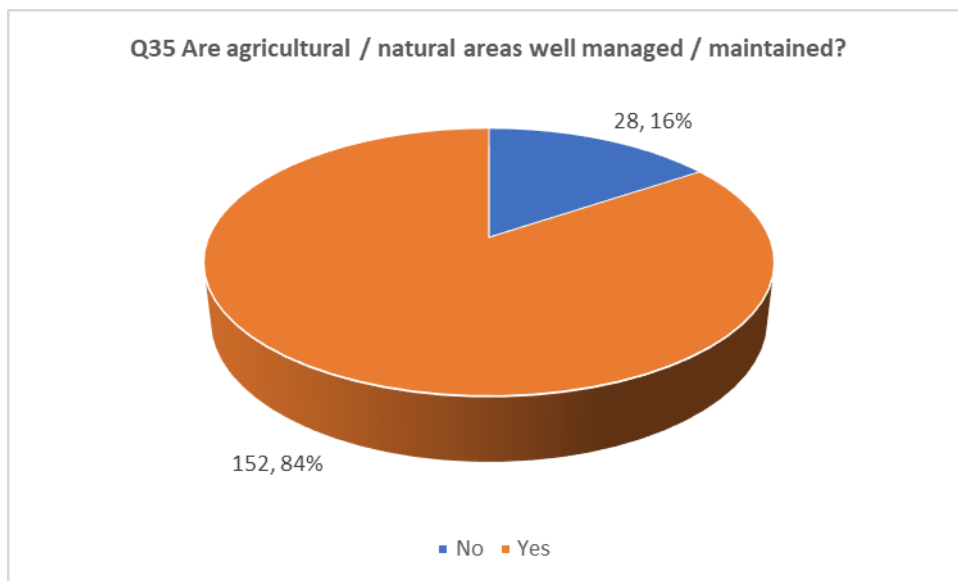

And if yes, what would you like to see happen?

Other suggestions

more wild flower areas for wildlife
stop pet cats catching songbirds
the rat problem needs looking into ditches clean regularly
leave logs to rot down to provide habitats
planting sunflowers for the finches as per 2021
field margins and footpaths need to be looked at extension of ga scheme
most of the above are beyond community control none
public footpaths maintained and easily accessible encouraging to feed birds
but ensure hedges, verges etc do not become dangerous no-mow movement
bat boxes lay hedges correctly instead of slashing them with tractors reinstate old ponds
bug hotels consider how disabled friendly we are on our public footpaths safety must be paramount
cut hedges less frequently as long as they are not obstructing pavements bird boxes
community environmental projects in collaboration with local farms and businesses
planting of new woodland can have an adverse rather than a positive effect if planted inappropriately
at this time we need food and we should seek to jointly work to protect the wildlife and continue to grow food
encourage hedges on boundaries to residential properties as they are attractive, permeable for hedgehogs, and can be cut to a suitable height
hedges that create problems for footpath, brow and bridleway can be cut back at any time of the year including garden hedges and trees
there is scope for the creation of wetland areas for birds adjacent or near the river on the land that usually floods in the winter anyway and grows out autumn sown cereal crops
not over-knowledgeable about this but do feel in the fields up to red bridge there are very few hedges and feel that things have deteriorated now this is farmed more
ground-nesting birds and wintering pink-footed geese/whooper swans can be displaced through ill-considered planting schemes
initiatives such as wildflower road verge designation fail after a very few years through poor communication or record keeping
increased use / encouragement of government general licence for control of vermin and non-native species
do not dig up trees, hedgerows, fill in ponds to make bigger fields and so people can have a big lawn
an ideal site is down eyes lane approaching the river which is generally flooded more ponds
i'd support anything that would help or advice we can take forward ourselves
clean out ditches protect their habitat in particular create wetland areas
ban on pesticides
plant wild flowers everywhere more dogs to be kept on leads whilst walking footpaths
ban hunting as scares wildlife encourage vermin control eg gamekeeper operations
stick to the footpaths no third person destroying/reducing greenbelt land bird hide
more help / protection of bees links to community gardens and linked projects
chemical-free farming methods make residents aware that they can contribute
organic fertilizers only enforce land lying fallow every few years
wild flowers please more protection of bees - maybe hives
hedgehog homes around the village
we should take better care of where we live
think it is about right amenity
bird hide - around back lane area

Question 35 Based on your experience are the agricultural areas and / or natural areas being well managed and maintained?

Comments

fields north of north road in good shape
 depends whether you are a farmer or not
 generally ok but hedges are cut too much
 some of the public footpaths are overgrown
 agri fields maintained - do spray with insecticide
 dredge and maintain local rivers - especially bretherton

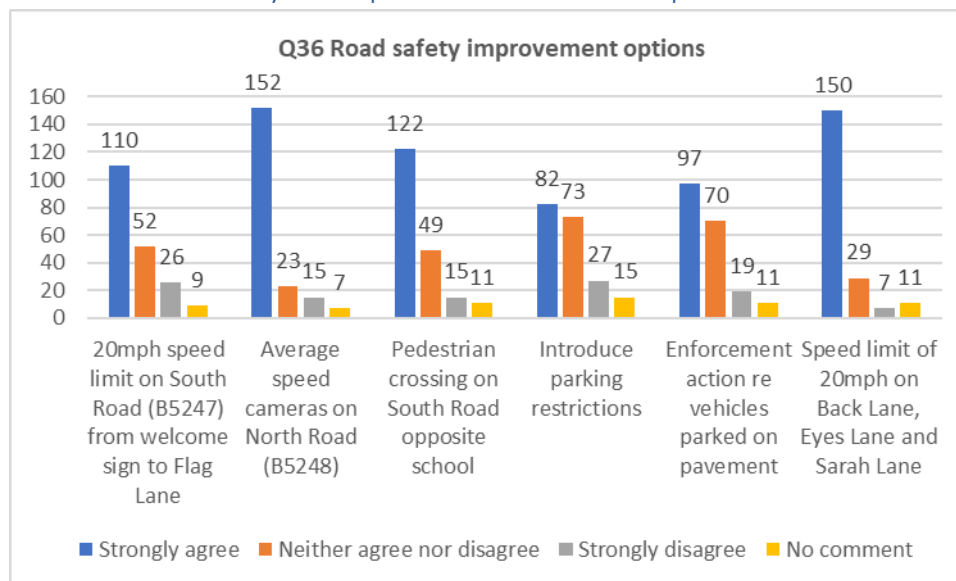

bretherton residents and agriculture are two separate issues maintain and clean out ditches
 some footpaths are overgrown and unsuitable during summer
 some public footpaths are virtually impassable due to overgrowth
 field hedges are often cut unnecessarily hard, should be left for wildlife aside from hedge cutting
 generally yes, but some crops are being planted up to the field margins t know
 public footpaths (particularly in fields could be maintained much better
 farmers plough over prows and block or lock stiles and gates in some areas footpaths overgrown
 mainly yes- some fields not maintained eg on marl cop and near bungalows
 there was probably more songbirds on the banks 30 years ago especially larks

some woodland is in need of thinning - eg around bank hall , east of war memorial
 some farmers are planting crops across public footpaths, so unable to see path location
 i am not an expert but they seem to be managed ok but there is always room for improvement
 internal hedge rows are routinely "butchered" by flailing often at the wrong time from a wildlife perspective
 yes and no none
 managed for profit, but government regulations play a part. changes since brexit and cap- and continuing to change
 agricultural land is subject to flooding due to lack of dredging and river bank maintenance by environment agency
 don land drainage maintenance is poor
 generally, but planting often up to the field edges which can overlap the footpaths causes problems

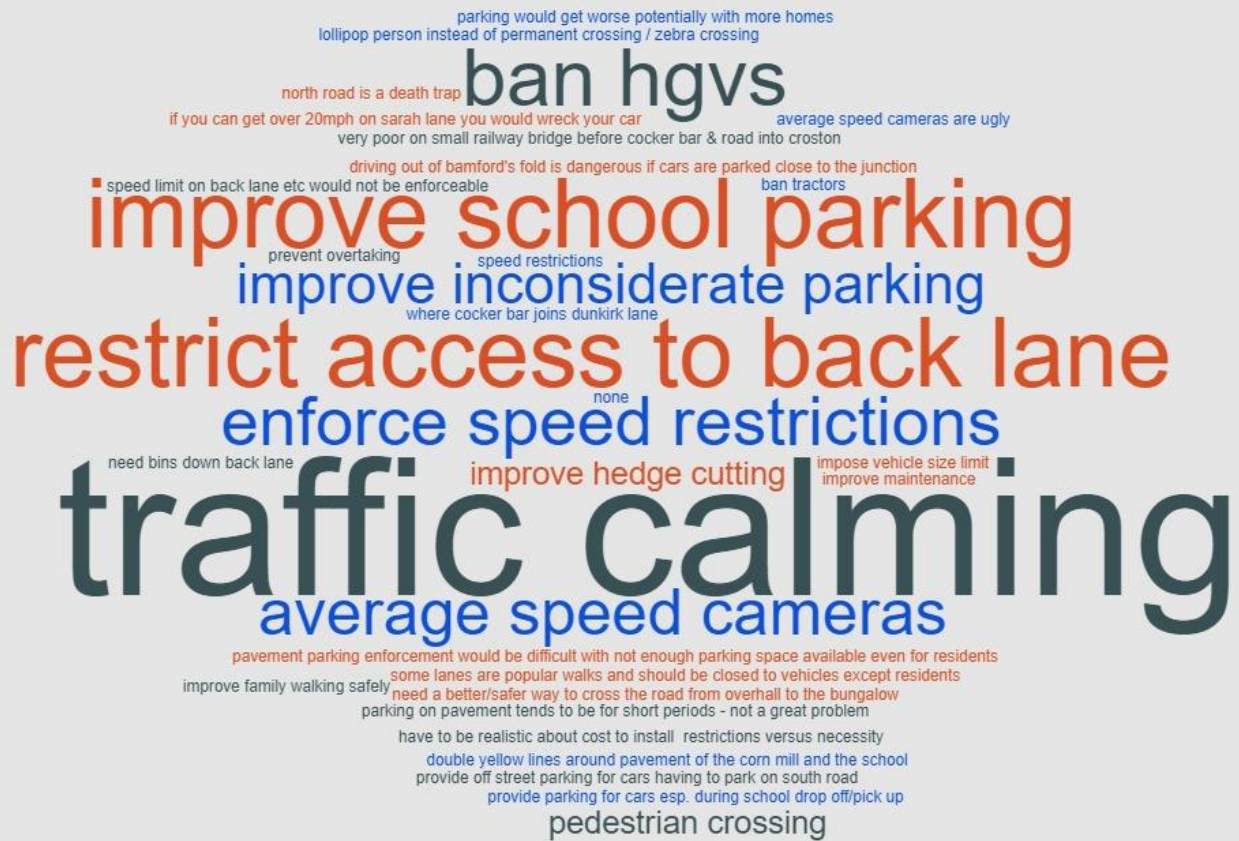

more severe penalties for farmers/land owners who plough up prows or block stiles or gates
 predominance of autumn-sown cereals etc not conducive to breeding lapwing/skylark
 apart from planting over prows the farmland behind the apiary is not maintained and the hedges are overgrown
 excessive flail cutting of hedges reducing blossom/fruiting, and hedge structure
 paper waste is poor tractor drivers need to take more care on narrow lanes and grass verges
 local farmers are diligent local farms already provide field margins and leave over wintered stubble
 always room for improvement lapwing/skylark nests are "harrowed in" annually with no consideration
 some not marked little/no evidence of environmental farm stewardship schemes in village
 footpaths poor waste product from golden acres often left in fields unploughed
 ditches not being maintained number of tracks being created through fields is concerning
 fields around bretherton are cultivated and appear well kept
 some uncropped grassland areas require ragwort removal
 its not necessary to flail internal hedgerows annually
 tractors go too fast on highways farm land should be used to grow crops for food
 public footpaths could be more maintained
 public footpaths often hidden by planting
 ditches are not kept free-flowing
 public rights of way not accessible

Safety and Security

Question 36 How could road safety be improved in Bretherton parish?

Other (please specify)

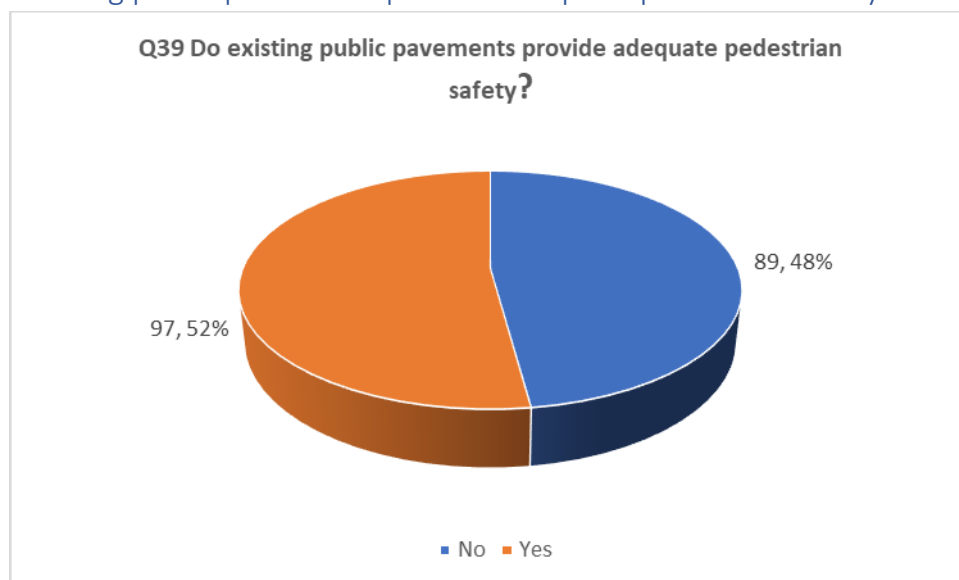

Question 37 How could traffic noise and volume on the B5248 and B5247 through the village be reduced?

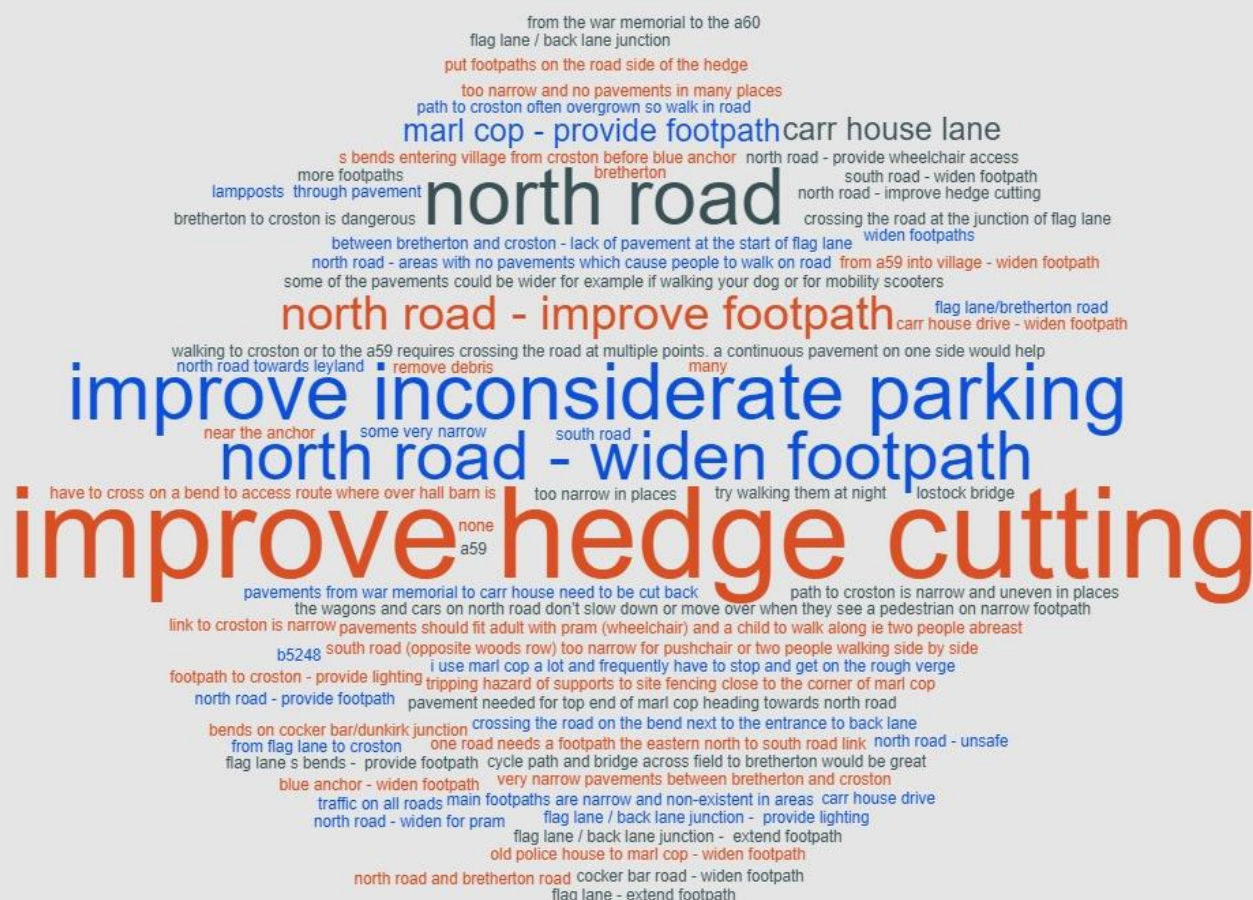

Question 38 Are there other specific roads or locations within Bretherton that cause you concern?

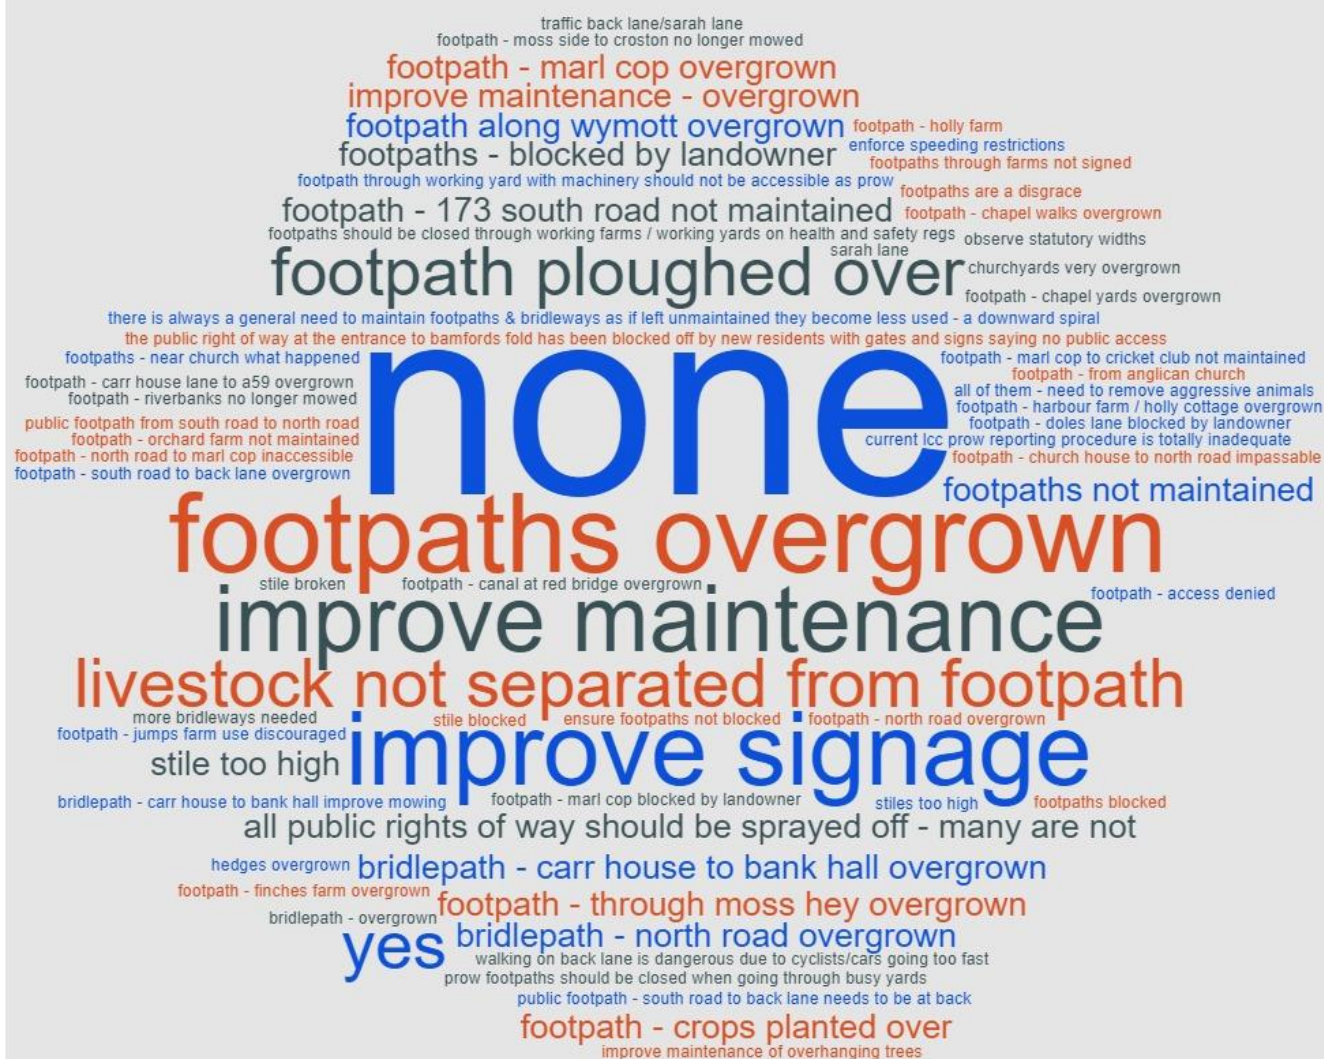

Question 39 Do existing public pavements provide adequate pedestrian safety in Bretherton?

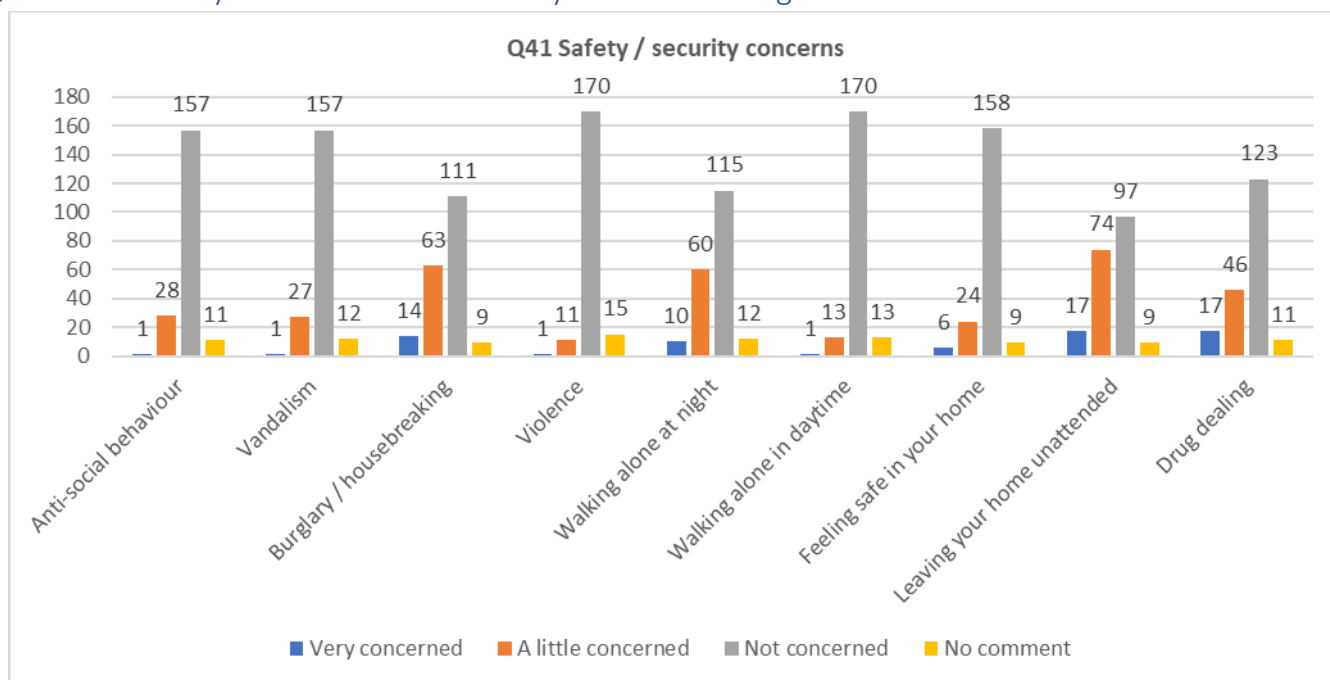

If no, are there specific pavements within Bretherton that cause you concern and what could be done to improve safety?

Question 40 Are there any Public Rights of Way (eg footpaths/bridleways) in Bretherton that cause you concern and what could be done to improve these?

Question 41 Are you concerned about any of the following in Bretherton?

Other (please specify)

A word cloud on a light gray background. The words are arranged in a roughly circular shape. The most prominent words are 'drugs - back lanes' in large blue font, 'speeding traffic' in large orange font, and 'walking alone at night' in large orange font. Other words include 'poor street lighting' in blue, 'some strangers' in orange, 'escalation of drugs' in blue, 'i feel safe here' in blue, 'using green lane for off-roading' in blue, 'none' in orange, 'i have not been affected by any of the issues above' in blue, 'only concerned walking at night in winter - poor lighting and busy fast roads' in blue, 'scrambling bikes and quads using our roads for pleasure' in blue, 'only all as "not concerned" due to village being unspoilt' in blue, 'using unsafe / unclean hardcore on fields' in orange, 'eyes lane / red bridge suspicious activities' in blue, 'bank hall needs security cameras' in blue, 'unaware of any of above issues' in blue, 'police intervention' in orange, 'litter - eyes lane' in orange, and 'road traffic accidents' in blue.

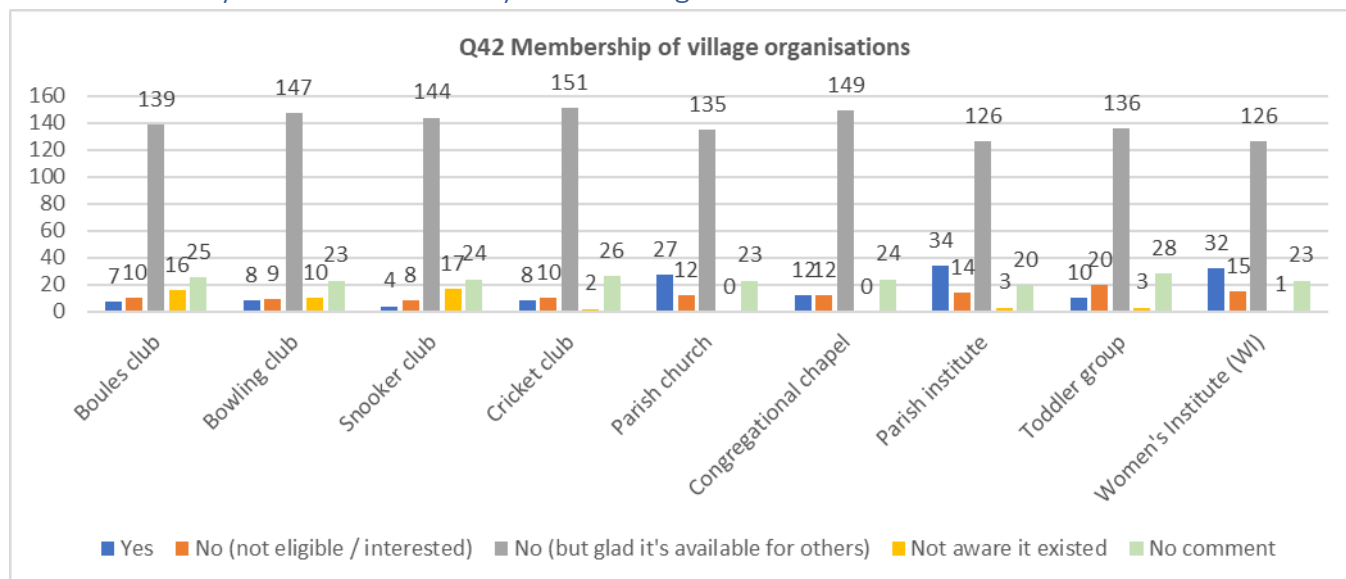

some strangers
escalation of drugs i feel safe here
using green lane for off-roading
poor street lighting
walking alone at night
speeding traffic
drugs - back lanes
none
i have not been affected by any of the issues above
only concerned walking at night in winter - poor lighting and busy fast roads
scrambling bikes and quads using our roads for pleasure
only all as "not concerned" due to village being unspoilt
using unsafe / unclean hardcore on fields
eyes lane / red bridge suspicious activities
bank hall needs security cameras
unaware of any of above issues
police intervention
litter - eyes lane
road traffic accidents

If you have identified any of the above, please specify the location and comment on any solutions that may alleviate your concerns

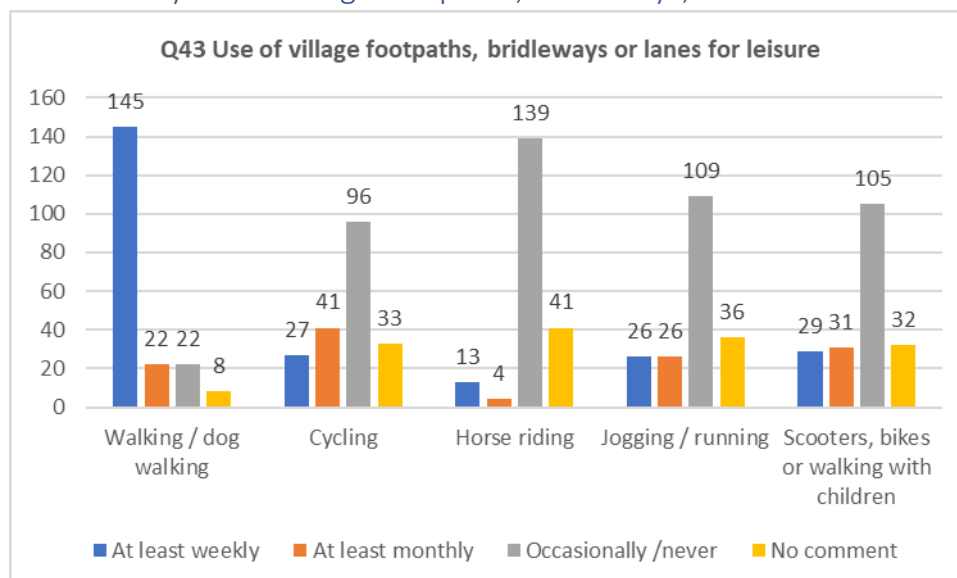

Community and Leisure Activities

Question 42 Are you a member of any of these organisations?

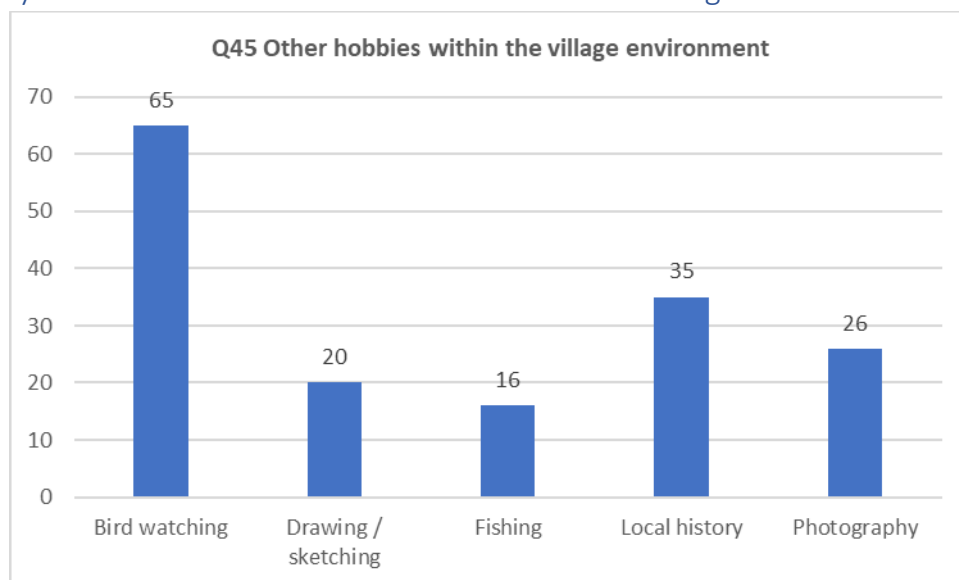

Question 43 How often do you use village footpaths, bridleways, or lanes for leisure?

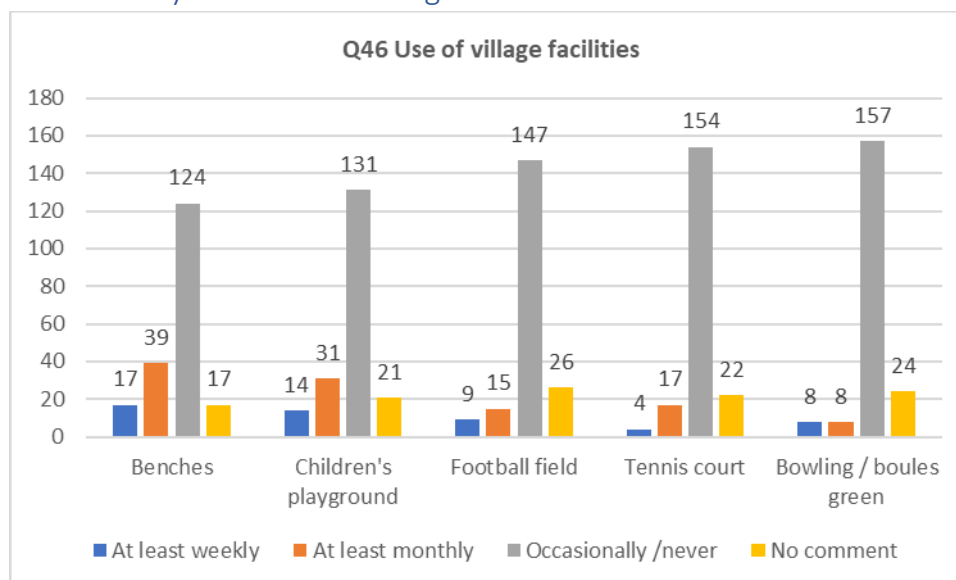

Question 45 Do you have other hobbies that make use of the village environment?

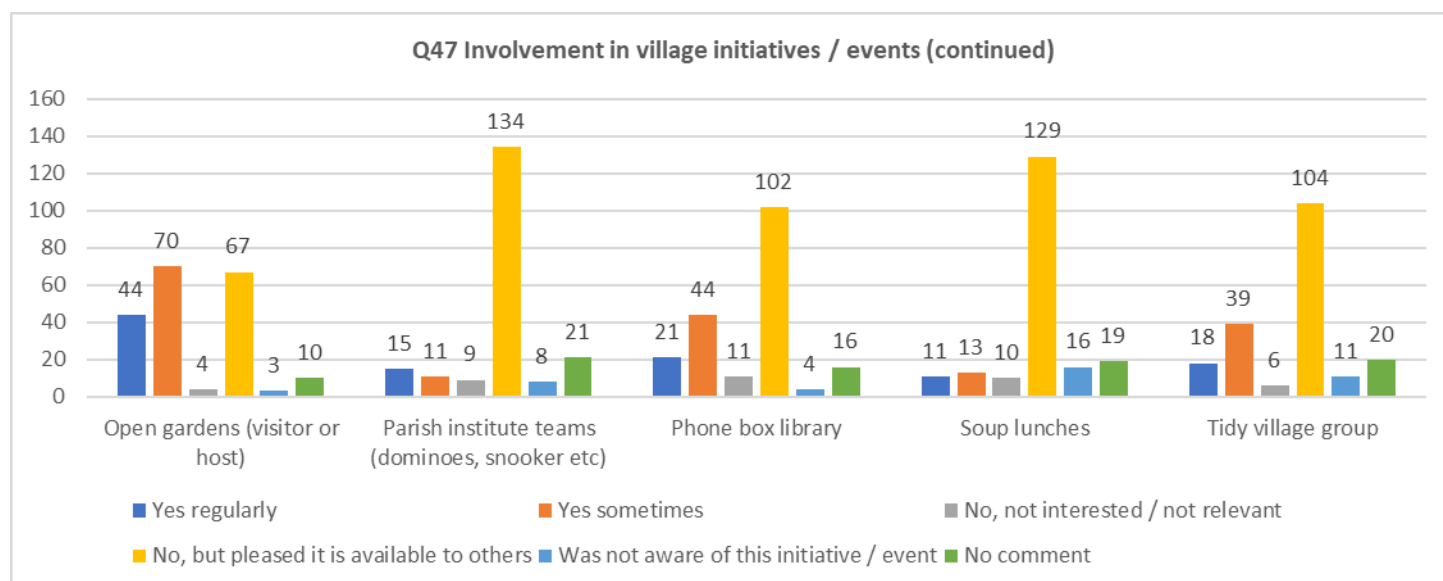

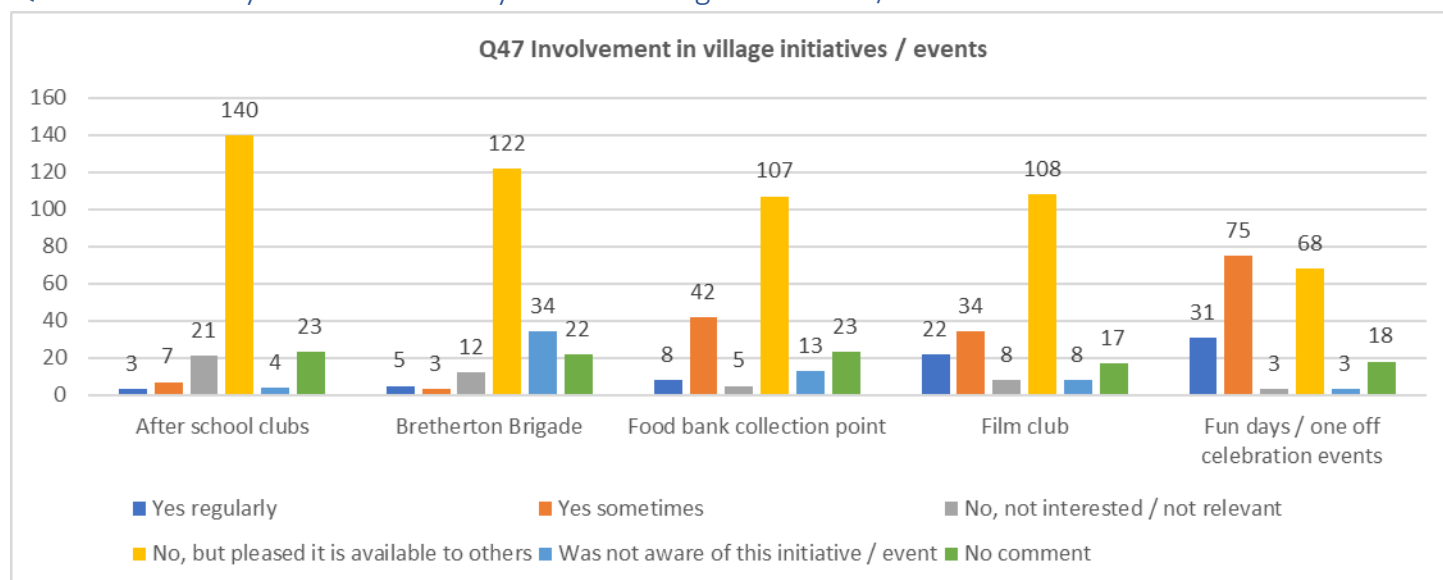

Other (please state

Question 46 How often do you use these village facilities?

Question 47 Are you involved in any of these village initiatives / events?

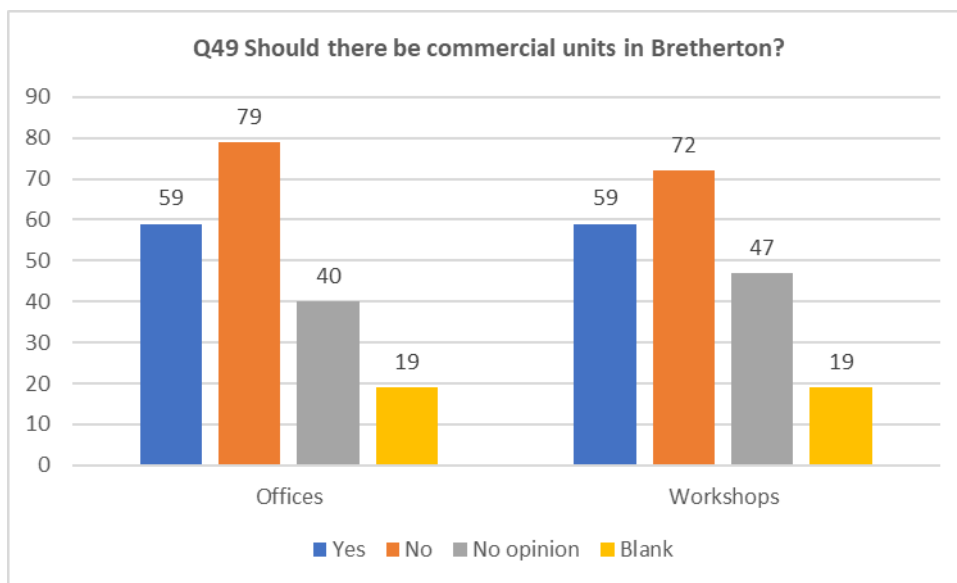

book club none
hope the film club can restart
i intend to look at books in the phone box
when were younger we were more involved in groups
very involved in events in mawdesley. the village has far better facilities
wish there was more village events and celebrations to bring community together
feel i would like to be more involved - time is limited, but hopefully not in the not too distant future
mawdesley and surrounding villages is our u3a and would love to hold some groups here if facilities were available and affordable
i wish the scarecrow even was stopped - it doesn't "enhance" the look of the village. sorry to be negative on this one
not aware of existence of bretherton brigade, food bank collection point or fun days
used to use bretherton brigade and toddler group in previous years
we pick up litter - but not a member of the tidy village group
we regularly pick litter in eyes lane - interesting
i appreciate the wi doing activities
love the phone box libraries

Economic Development and Enterprise

Question 49 Do you think that there should be commercial units available in and around Bretherton to provide facilities for businesses?

Comments

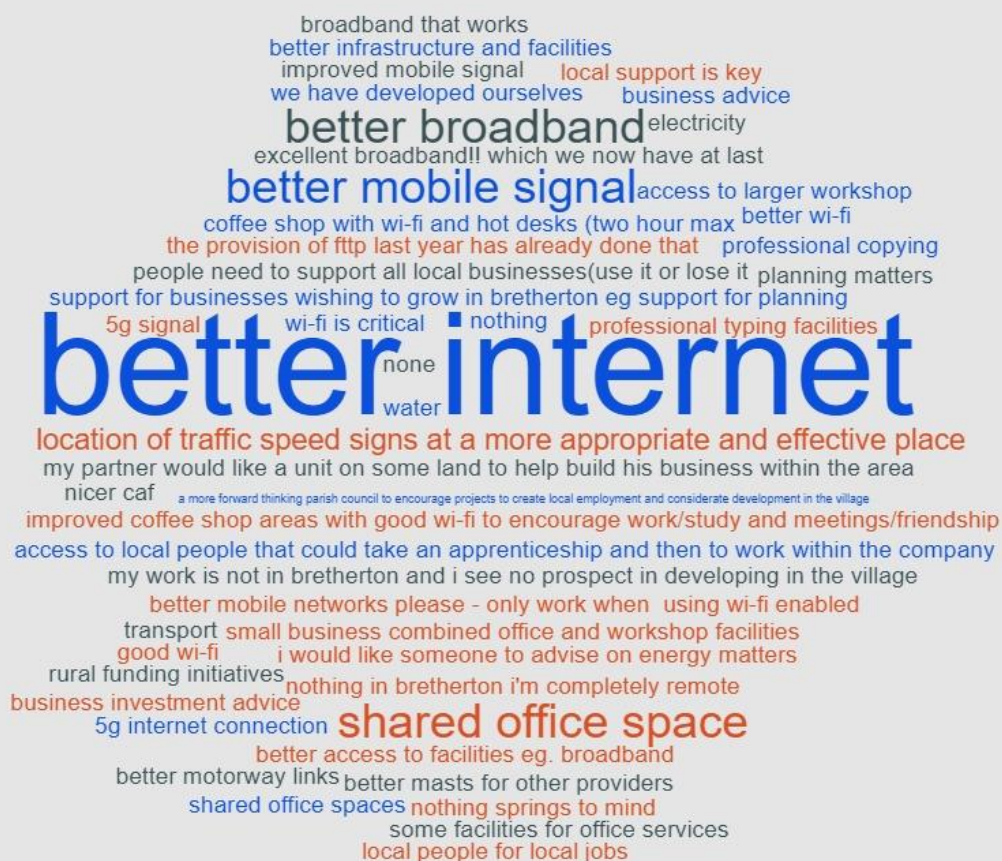

small units where d&c autos were on north road
small starter units would be a good thing
would encourage small niche businesses
t know where they would / could be located
there's also a concern about increased commercial traffic here
t detract from the attractiveness of the village be careful that they don
but small scale on outskirts of village due to traffic
employment for the local young people is important residential area
not suitable for rural village they could be designed to look like 'rural workshops' wouldn
why not? it might encourage village growth, diversity must fit with the look of the village
as a business owner i appreciate it can be hard to start up absolutely not
stick to residential not appropriate for the village but required in close proximity a good idea in principle but i don
see the development at cedar farm mawdesley for studio space to rent on a small scale
any derelict/unused buildings could be used for shared office spaces currently available nearby
yes if they could be installed in a sensitive way to preserve the character of the village
a small number would be fine (no more than 5) if done in a sympathetic style and which wouldn
would bring more traffic and noise, bretherton not set up for current volume of traffic and hgvs let alone more
it seems "workshops" are being set up for this purpose but with planning application for a house/bungalow in mind
yes there should be a small commercial estate adjacent to ribble feeds/bamfords on north road. that could be situated to the north of north road

depends where located regarding traffic
with the move to working from home this may be a positive step

any commercial activity should be complementary to the environment and premises should be in keeping
the village does not seem to me to need these in view of its size, and is available elsewhere
t become cube like structures that lay empty and encourage anti social behaviour
no more as the village has no parking and is already busy with traffic in moderation
only if within existing units/buildings wouldn't fit the village in addition it would be a bad spot for them
reduces travel and commuting and provides local employment it isn't a business park
for people in the village only sme facilities would allow more residents to work in the village
as long as they are tastefully done make bretherton an attractive work to live, work, play there are enough in our vicinity
local people need to work i think it depends on how, why and where this is done saves on fuel
yes but limited in size start-up digital offices with hot desks and small offices
not enough infrastructure in discreet locations with satisfactory screening
would ruin countryside yes - it is important to keep the village active
keeps people in the village workshops eg woodwork / artists / designers
to provide local employment opportunities
roads not suited to heavy commercial traffic
there are some private ones available
t say there is a demand for this

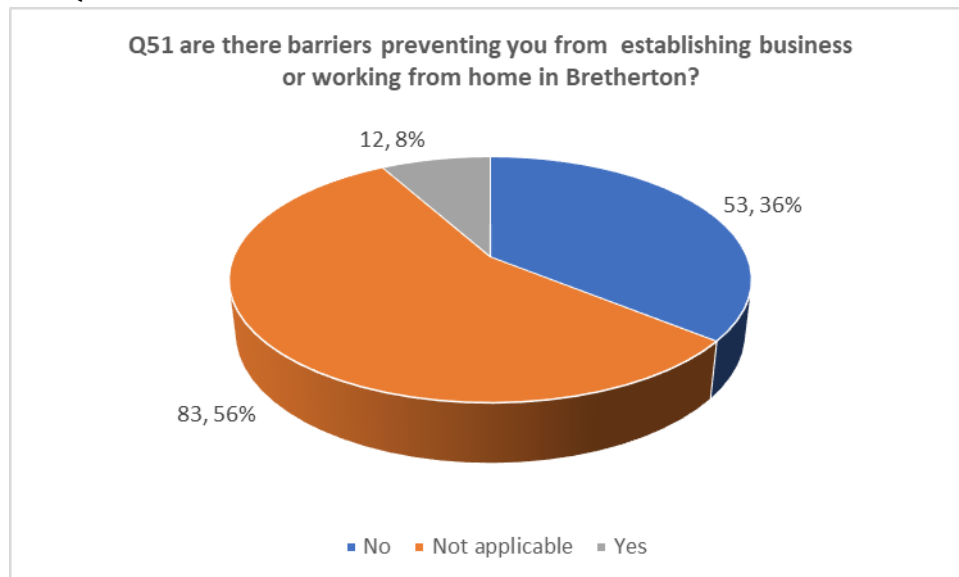

Bretherton Residents' Questionnaire Results October 2022

Question 50 If you are self-employed or a business owner in Bretherton, what would enable you to sustain and develop your business?

Question 51 Are there any barriers preventing you establishing your business in Bretherton or working from home in Bretherton?

Bretherton Residents' Questionnaire Results October 2022

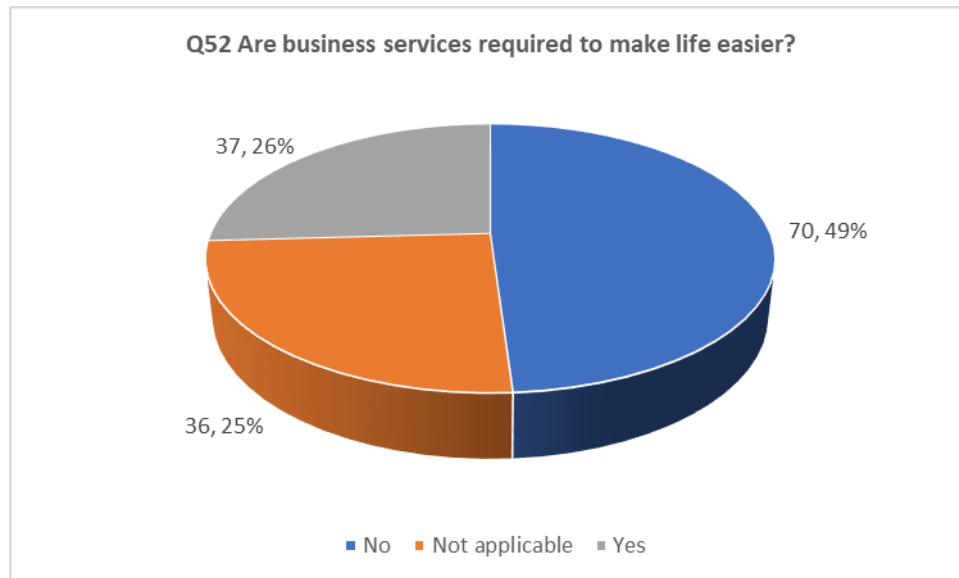

Comments

A word cloud of feedback from Bretherton residents. The words are arranged in a roughly circular shape. The most prominent words are 'internet' (large, blue), 'no fibre broadband but just having a 5g mast would be enough' (blue), 'better mobile networks would help' (orange), '5g internet connection' (black), 'lack of facilities' (orange), 'poor wi-fi' (orange), 'we recently located our business during lockdown' (black), 'there are no facilities to operate a business within bretherton' (blue), 'relocate to bretherton from city centre during covid' (blue), 'planning and ? forward? looking people' (orange), 'only if the wi-fi gets worse' (blue), 'no facilities / infrastructure' (orange), 'fitness facilities - we are a gym owner but would love to have one close to home' (small, black), 'cannot establish business from home as stated in conditions when house purchased from acland & bracewell' (small, black), and 'poor internet - not available to houses on flag lane despite recent bt changes' (small, black). The number '33' is also visible next to 'poor wi-fi'.

lack of facilities
poor wi-fi none
poor wi-fi 33
5g internet connection
better mobile networks would help
we recently located our business during lockdown
no fibre broadband but just having a 5g mast would be enough
fitness facilities - we are a gym owner but would love to have one close to home
cannot establish business from home as stated in conditions when house purchased from acland & bracewell
poor internet - not available to houses on flag lane despite recent bt changes
there are no facilities to operate a business within bretherton
relocate to bretherton from city centre during covid
planning and ? forward? looking people
only if the wi-fi gets worse
no facilities / infrastructure
internet

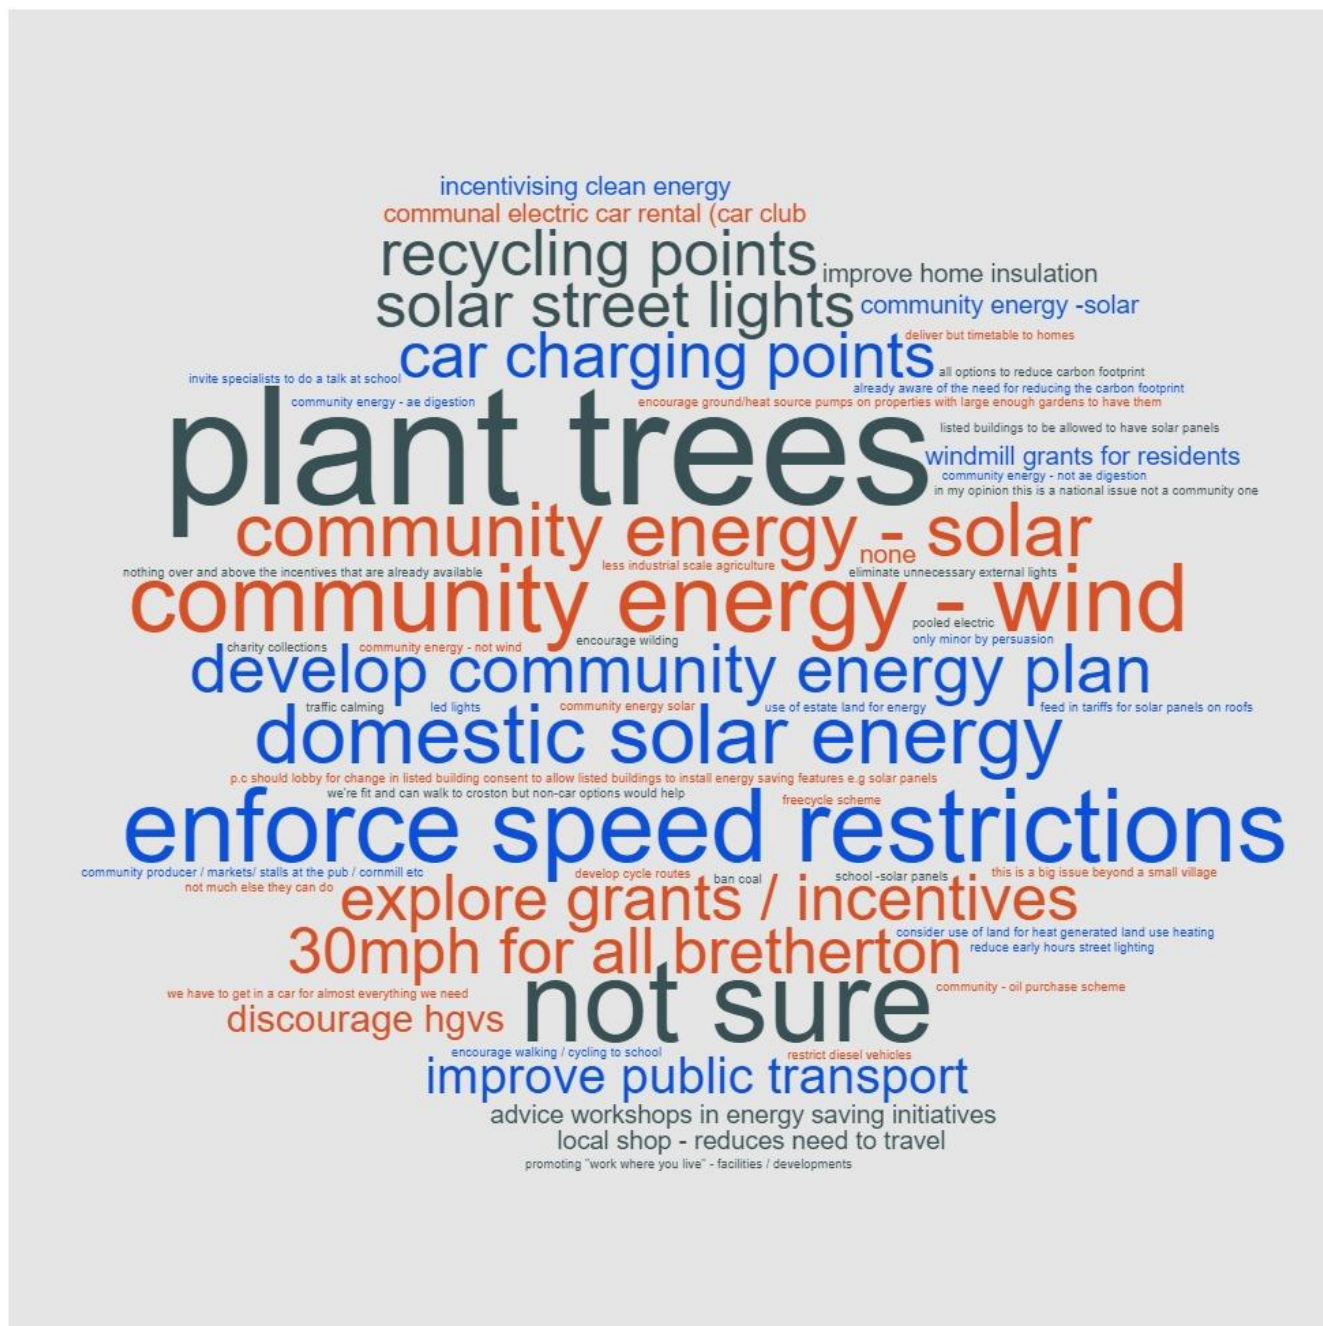

Question 52 As a resident in Bretherton, are there any business services that you require to make your life easier?

If so, what are they and why?

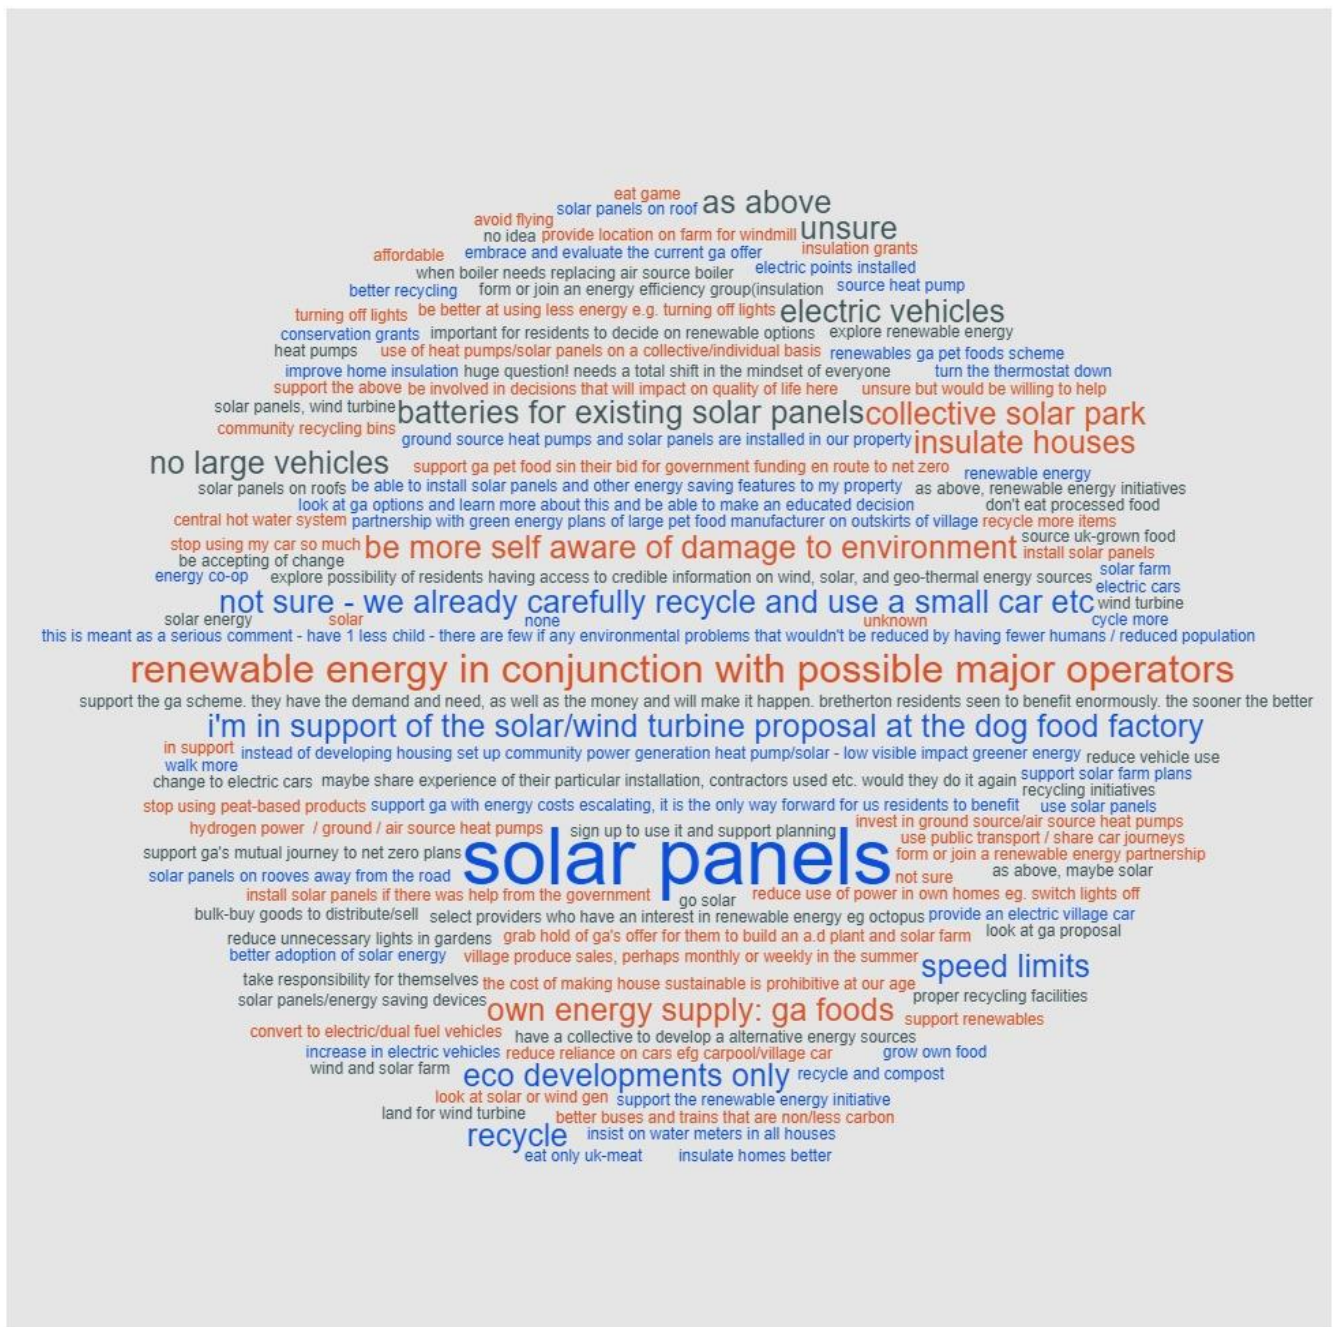

Question 53 What measures could Bretherton Parish Council explore that could reduce the impact of our carbon footprint?

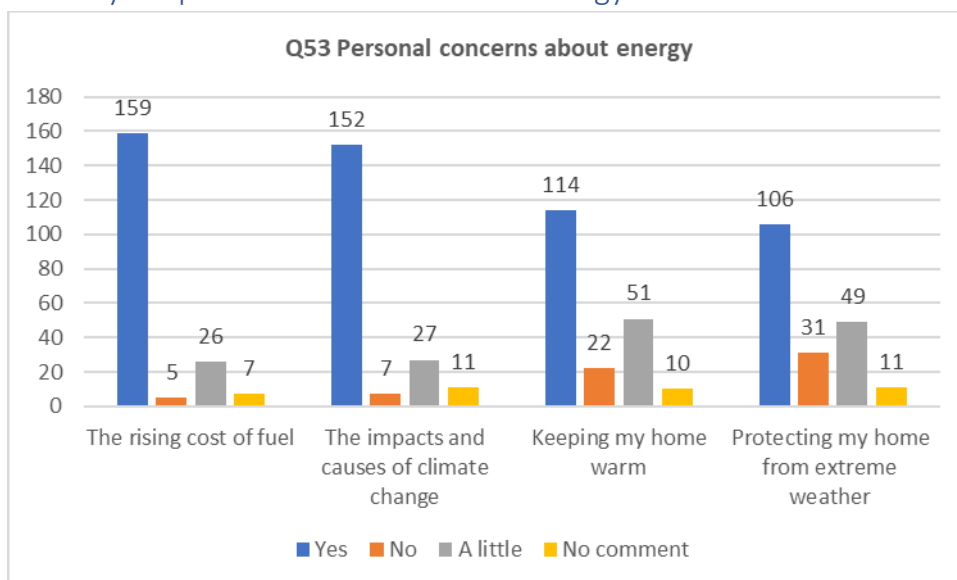

Bretherton Residents' Questionnaire Results October 2022

Question 54 What could you personally or the residents of Bretherton collectively do to make the transition from a carbon-based world to a renewable energy world?

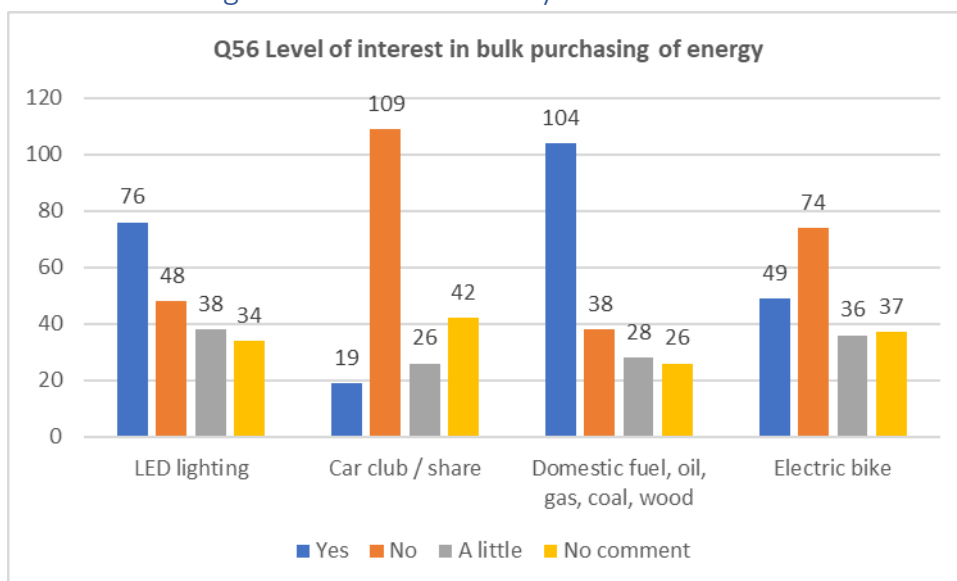

Question 55 What are your personal concerns about energy?

Please comment

massive hike in fuel costs
not possible to insulate
lpg gas has gone through roof
possible flooding always a concern
i live in an old house with a smallish garden
it is very difficult and expensive to change to a heat pump
climate change should always be prioritised over other issues
some more tree planting likely to help drainage and high wind damage prevention
we need to act now and let bretherton be the pioneers in lancashire by working with ga pet food partners
our home is grade ii listed and we are restricted in what we can do to make it more efficient
rising cost of fuel for a rural village will also cause high food prices
yes chorley council have declared a climate emergency
i am concerned about climate change as i am young
very poor energy rating in older properties
more up to date info would help
old houses are costly to heat
fuel costs way to much
none flooding

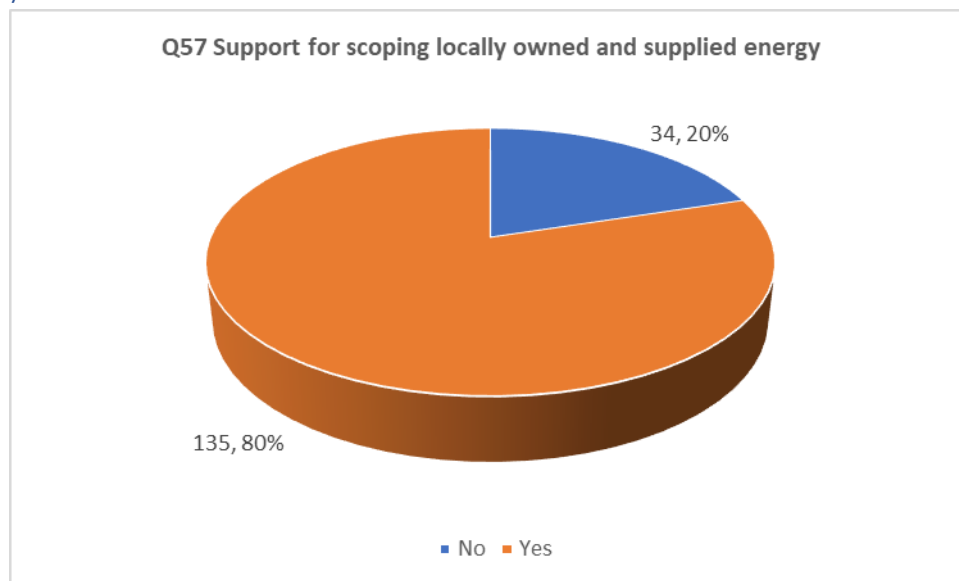

Question 56 Bulk purchasing of energy: which ones of these bulk purchasing opportunities might you be interested in if it was organised at a community level?

Please comment

none
work with g a
answer given refers to wood
support efforts are being made by ga
please introduce an electric bike scheme - they are amazing
must be a lot of us with wood / coal fires. a deal with sustainable options / suppliers
all sounds lovely but the greatest difference will be through generating our own energy
this club could and due to sale of surplus power would have money to help residents with all the above items
this is hard to understand but purchasing needs to be balanced against any impact on the community
i have oil fired heating, very happy with it as a back-up to something more renewable
the ga scheme provides low cost electrical energy to the bretherton energy club
i would use e bike to go to shops instead of using car
would be very complex to organise
would love and electric bike scheme
good idea

Question 57 Would you support action to explore the scope for energy supply to be owned and produced locally?

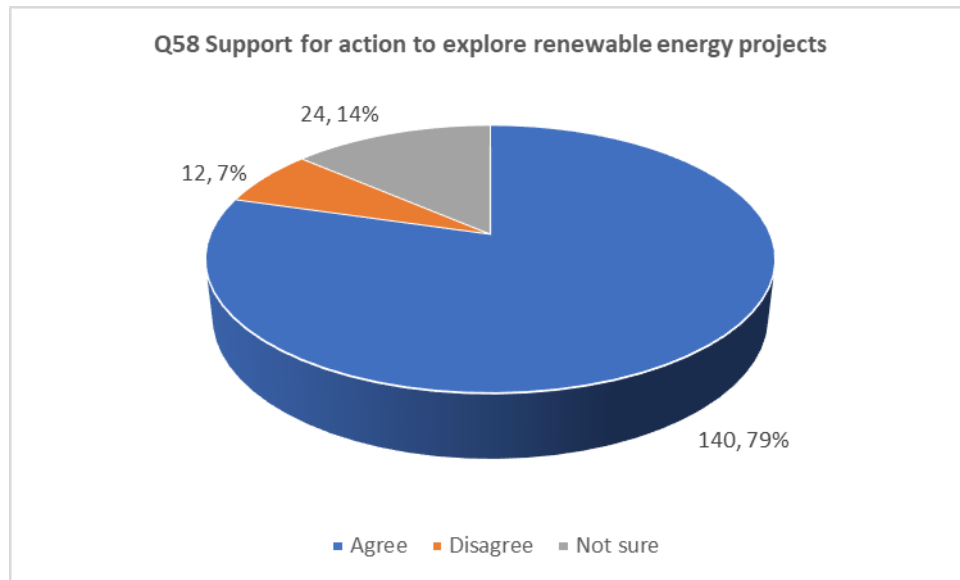

Please comment

A word cloud of responses to a questionnaire about a solar panel scheme. The words are arranged in a roughly circular shape, with colors ranging from orange to blue. The most prominent words are '100 percent' in large orange font at the top, and 'not sure' in large blue font at the bottom. Other visible words include 'i have solar panels', 'would support a residents scheme', 'follow ga pet food partners' proposal', 'if there is a fair and just way to do so', 'maybe depending on what is decided', 'absolutely', 'totally', 'provided it was done in an environmentally sensitive way', 'this will be a distraction from the core responsibilities of the parish', 'i support the ga scheme in principle at the location currently proposed', 'it is dangerous to allow an energy monopoly to be created', 'none', 'definitely, having been to ga's open day, it has made us realise how lucky are to have them in the village! and potentially provide this energy', 'because it is so difficult to make changes as an individual, it is worth looking at community scale options', 'yes the proposed ga scheme is excellent for the village. we are so lucky to be offered this opportunity', 'the village is served by several "cable lines" for electricity. is this feasible', 'i am an electrical engineer so personally interested in this area/field', 'it depends what it is and the impact on the countryside', 'as long as this does not impact the look of the village', 'hopefully the ga scheme will be supportable', 'as long as we can trust people involved', 'yes only if it will be much cheaper', 'yes, if via alternative supply', 'solar', 'solar farm/storage', and 'it is ugly and dangerous'.

i have solar panels
100 percent
would support a residents scheme
follow ga pet food partners' proposal
if there is a fair and just way to do so
maybe depending on what is decided absolutely
maybe, we need to be very careful with this totally
provided it was done in an environmentally sensitive way
this will be a distraction from the core responsibilities of the parish
i support the ga scheme in principle at the location currently proposed
it is dangerous to allow an energy monopoly to be created
none
definitely, having been to ga's open day, it has made us realise how lucky are to have them in the village! and potentially provide this energy
because it is so difficult to make changes as an individual, it is worth looking at community scale options
yes the proposed ga scheme is excellent for the village. we are so lucky to be offered this opportunity
the village is served by several "cable lines" for electricity. is this feasible
i am an electrical engineer so personally interested in this area/field
it depends what it is and the impact on the countryside
as long as this does not impact the look of the village
hopefully the ga scheme will be supportable
as long as we can trust people involved
yes only if it will be much cheaper
yes, if via alternative supply solar
solar farm/storage
not sure
it is ugly and dangerous

Bretherton Residents' Questionnaire Results October 2022

Question 58 Would you support action to explore what renewable energy projects in our area could viably be developed by and for the benefit of our community?

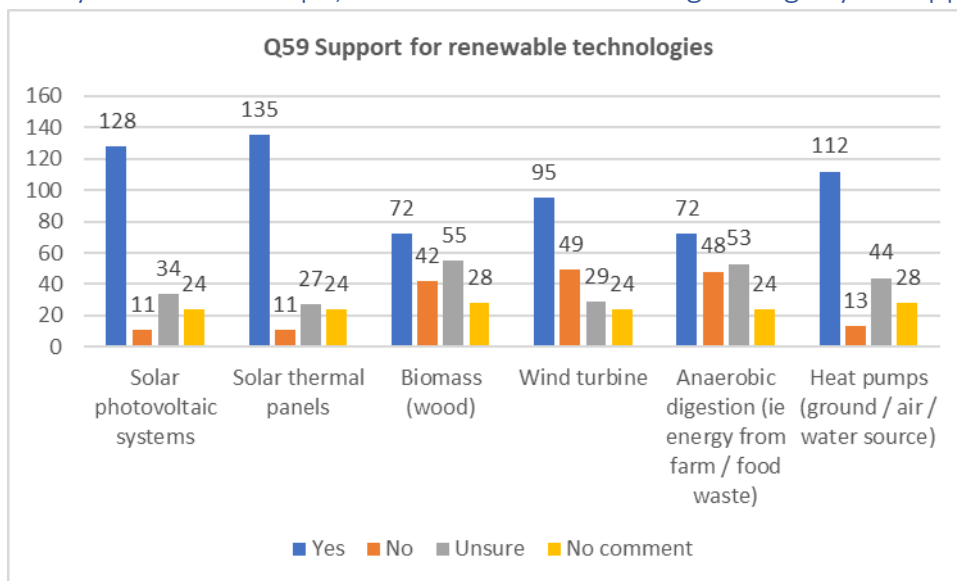

Please comment

not fracking
100% support solar
yes sympathetically
partner with ga pet foods
solar farms only - no wind turbines
if done, as i said before, fairly and justly
t have a significant impact to the environment
caveat - must not impact countryside or rural appearance of village
work with local businesses / farmers like ga pet food to make this possible
this needs very very careful consideration as there could be unwanted consequences
the ga scheme would provide twice the current electrical power. this would allow the conversion from oil and gas to electrical heat pumps
this must be controlled and owned by the village
i would support any renewable energy projects however as long as it doesn't
energy projects should be nationally managed
would support a village residents scheme
yes if we can trust people involved
solar/air source heat pumps
so long as no wind farms
none maybe if solar
work with ga

Bretherton Residents' Questionnaire Results October 2022

Question 59 If a community owned renewable energy project could be built to 'an appropriate scale' and 'sensitively' in our landscape, which of these technologies might you support?

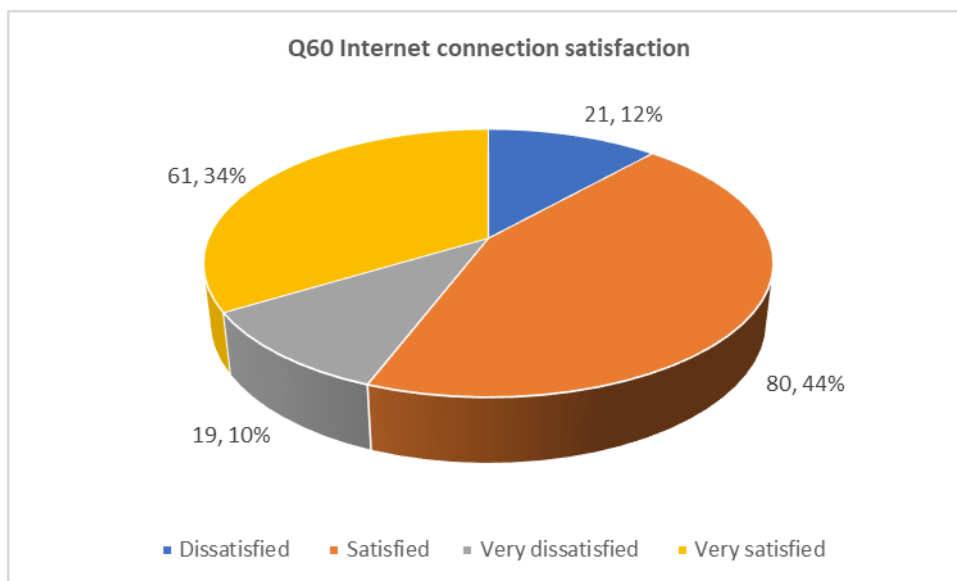

Please comment

wind turbine must not be tall
i need more information to comment
we have solar panels
not informed enough to comment on some
dependant on cost and location / visibility of equipment
the costs need to be proportionate sensitively landscaped
also any initiative needs to involve the community to learn more
wind turbines on croston already impact bretherton views / sound
i need to understand the impact on countryside and rural nature of village
don't know enough about biomass (wood) or anaerobic digestion to comment
i would need to know more about biomass and anaerobic digestion on a large scale
wind turbine would be far too big and noticeable and would affect the feel of the village
wind is the cheapest and most reliable form of energy in south west lancashire
the scale of anaerobic digestion is too large and impactful on the village setting
wind is by far the most reliable and cheapest form of energy here in lancs
definitely not wind turbine as it has an adverse effect on birds
in favour, as long as the environment is not compromised
electrical power is much easier to manage than thermal
air source heat pumps are small and efficient
anaerobic digestion as a last resort
none no details to comment - sorry
would not welcome noise or smell
local recycling point
100% support

Utilities and Other Services

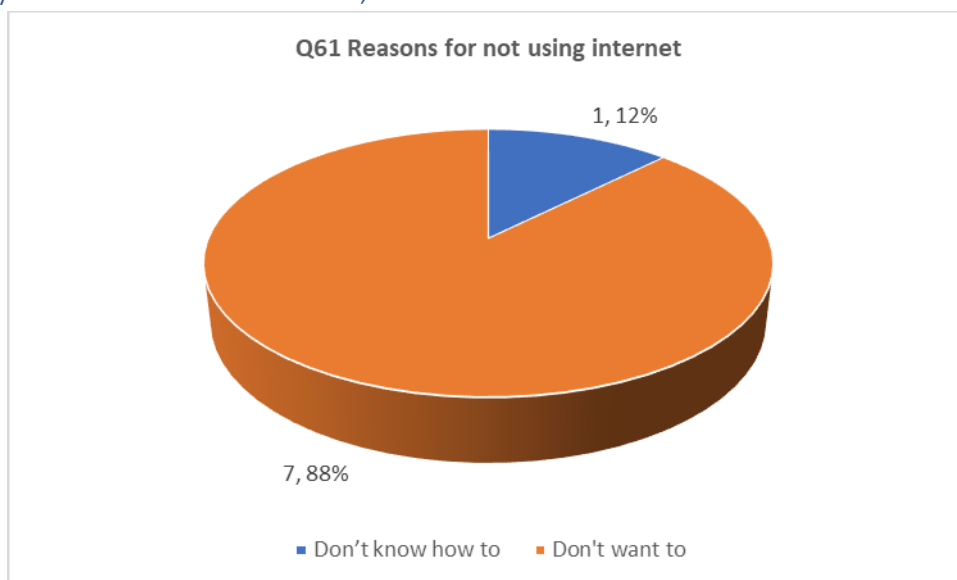

Question 60 If you use the internet, are you satisfied with the connection speed you get in Bretherton?

Any comments on the internet service in Bretherton?

i use 4g aerial instead
we now have access to full fibre broadband
not in business so happy with the speed
regular drop outs of service during working day
the new internet stopped halfway up north road
we have not had fibre fitted yet. it's 5 mb at present
since the upgrade in 2020 yes! it was awful before just upgraded to fibre
internet connection is extremely poor, i'm lucky i don't i think some still struggle
however we have paid to get fibre direct into our home none
was very poor for many years but significantly improved recently
will need upgrading soon as 4g and streaming services get bigger
better wi-fi was a significant recent improvement personal and business
as the speed is variable it is sometimes slow but when working fully it is ok
huge improvement since fibre was made available. still patchy but still so much better
mostly ok at home but often no mobile signal or broadband connection when moving around village
the provider i wish to use has not made it to bretherton
told by united utilities although water pressure not great it is just on the legal limit they have to provide so there's nothing we can do
houses on flag lane receive copper only lines from croston - bt won't install fibre that far so internet speed is pathetic
my personal internet speed is bad and the reception on my mobile phone is terrible and very inconvenient
absolutely stinks that 95% of the village has 1000mb broadband while the rest has 20mb
it is very bad can't speak on the phone very easily without it keep cutting out
has improved enormously in last 12 months but still occasionally drops out
i used to have system with a third party now used a bt supplied system
i have no phone line up until about 3 months ago my answer would have been different
n/a bt refuse to extend fibre beyond the blue anchor towards croston
we pay for highest speed fibre broadband direct into our home
got better lately since covid what happened to barn 4
t rely on it or work from home
not worth standing charge for guaranteed 0.5mb/s
poor speeds since open reach upgraded never worked as well
had to upgrade to bt fibre hub - very expensive
we use bt which is excellent but expensive
ok since the implementation of fibre
can have bad moments / days
ftp has been a game changer

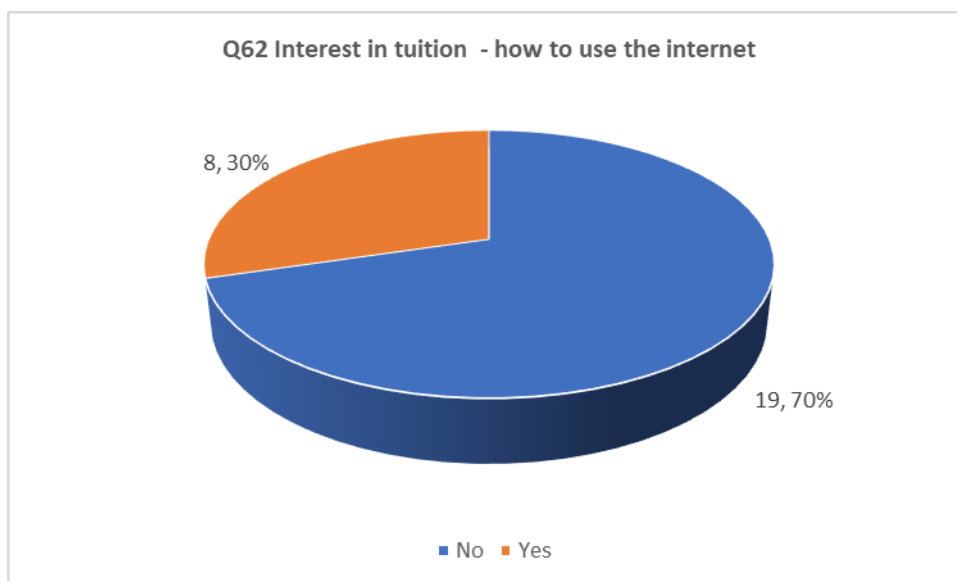

Question 61 If you don't use the internet, what is the reason?

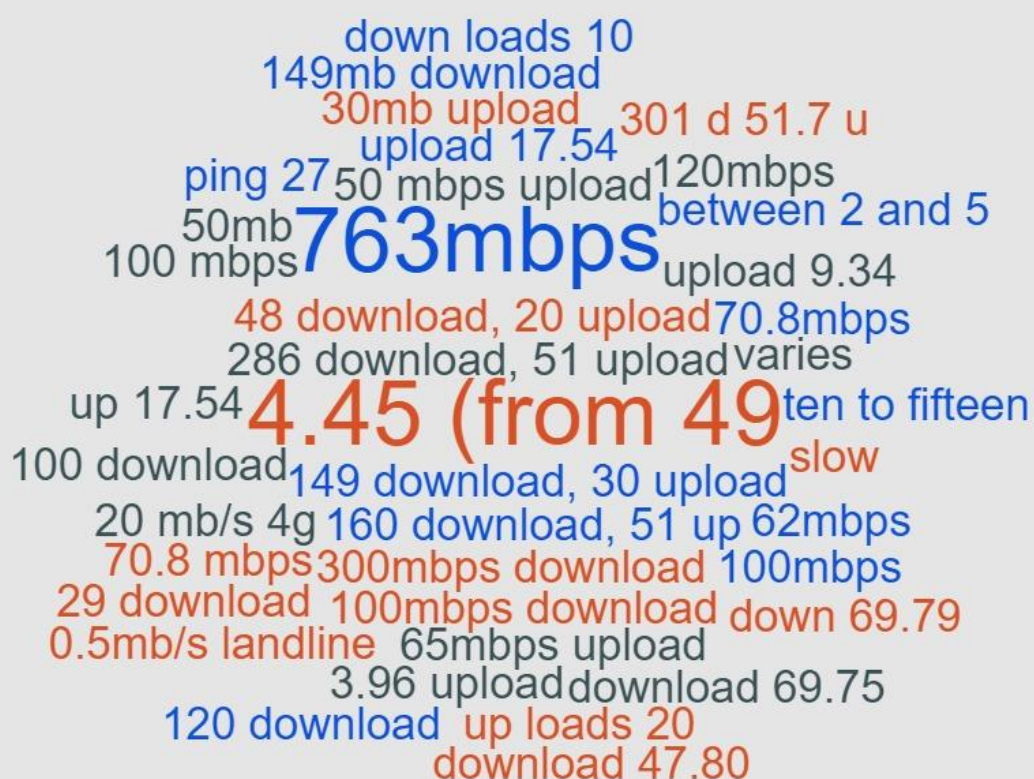

Other, please list

Only 1 response received – Don't know how to

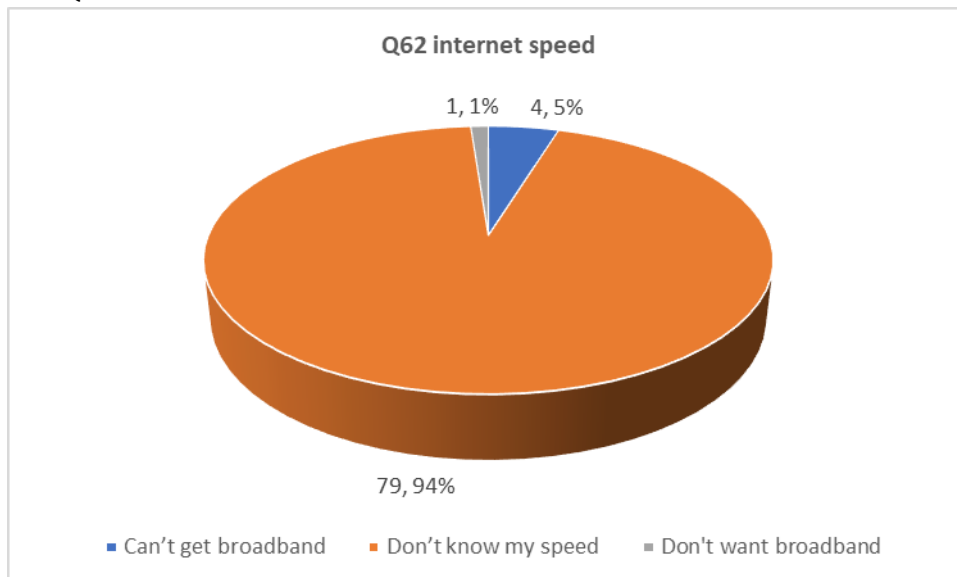

Question 62 If you don't know how to use the internet but would like to, would you be interested in lessons in Bretherton?

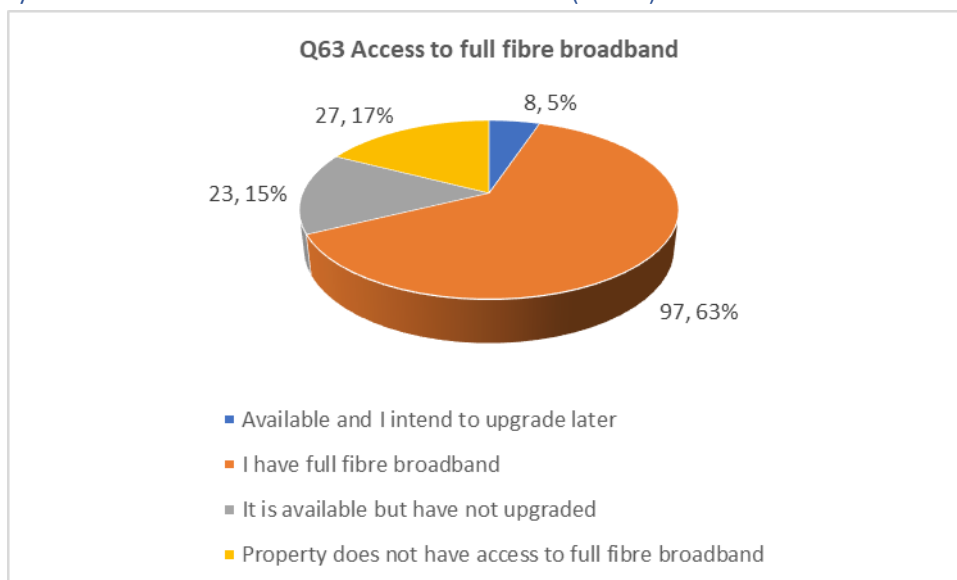

Question 62a (there are two question 62s on the questionnaire) What internet speed do you usually get on a weekday?

Or tick a box below

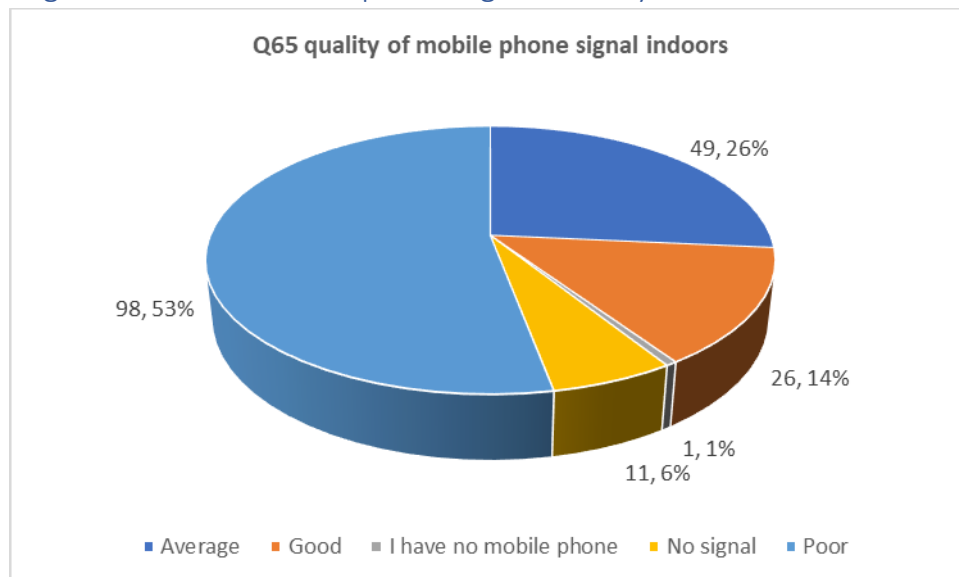

Question 63 Do you have access to full fibre broadband (FTTP)?

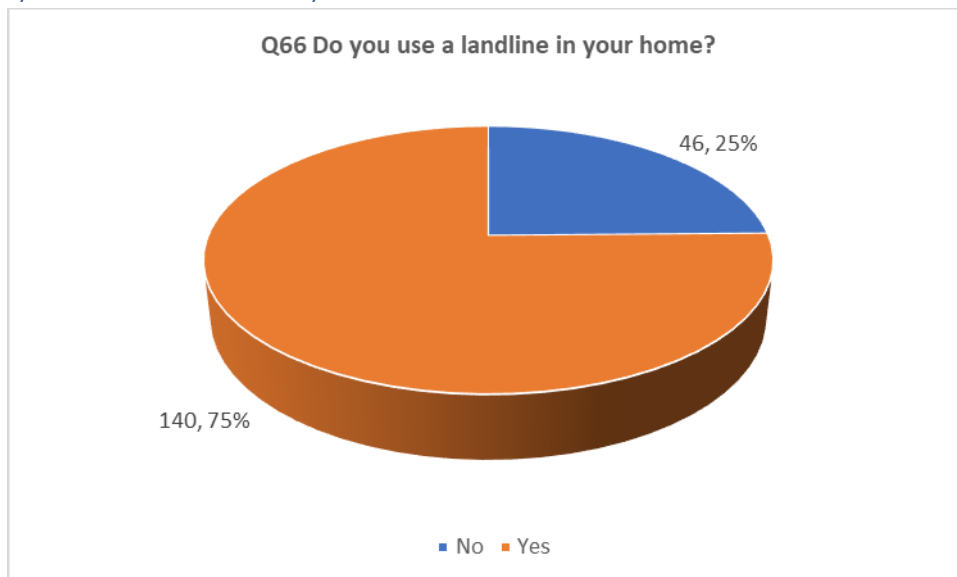

Question 65 How good is the mobile telephone signal inside your house in Bretherton?

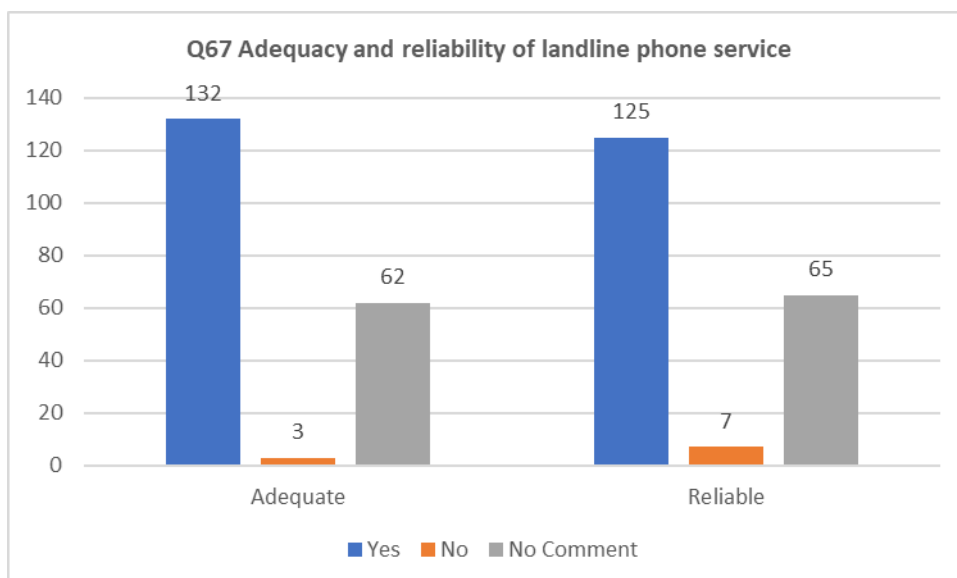

Comments

unreliable signal
use wi-fi calling inside
better signal needed
not good in most of the house
position dependent in house very unreliable
only get good signal in 2 rooms
have to go upstairs to get a signal
connectivity does vary over periods of time
signal with virgin has improved in the last 3-6 months
varies between no signal and poor depending where in house
phone always cuts off rarely make a call from start to finishes redial
depends on which bit of the house i'm in! could be a lot better
please can we get better mobile phone signals
we use a wi-fi connection for mobile phone calls
can only use when linked up to wi-fi calls
none good 3g/4g/h+ coverage outside
not adequate for business calls
i have to divert all calls to internet calls
calls outside can also be bad
5g mast(s) needed
varies around the area
4g not available

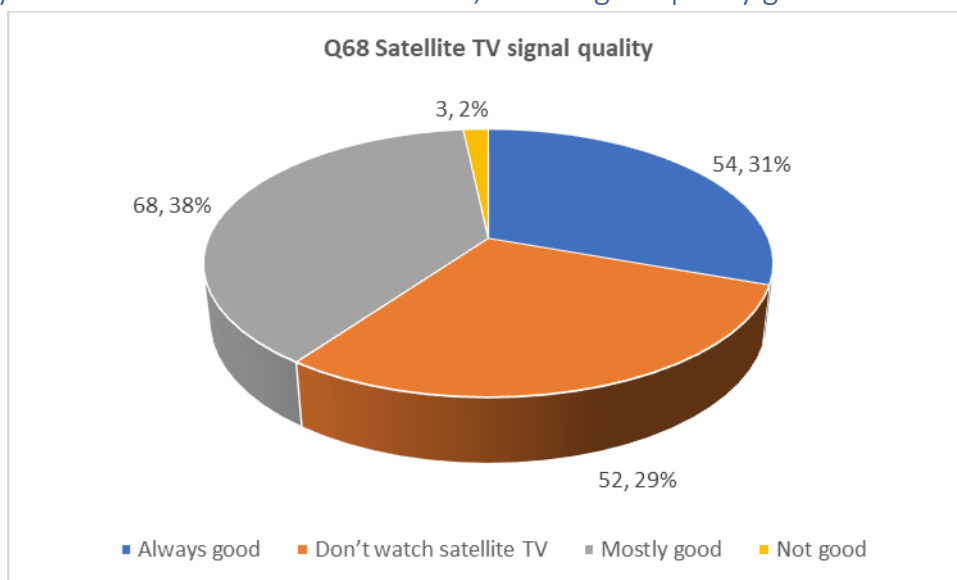

Question 66 Do you use a landline in your home?

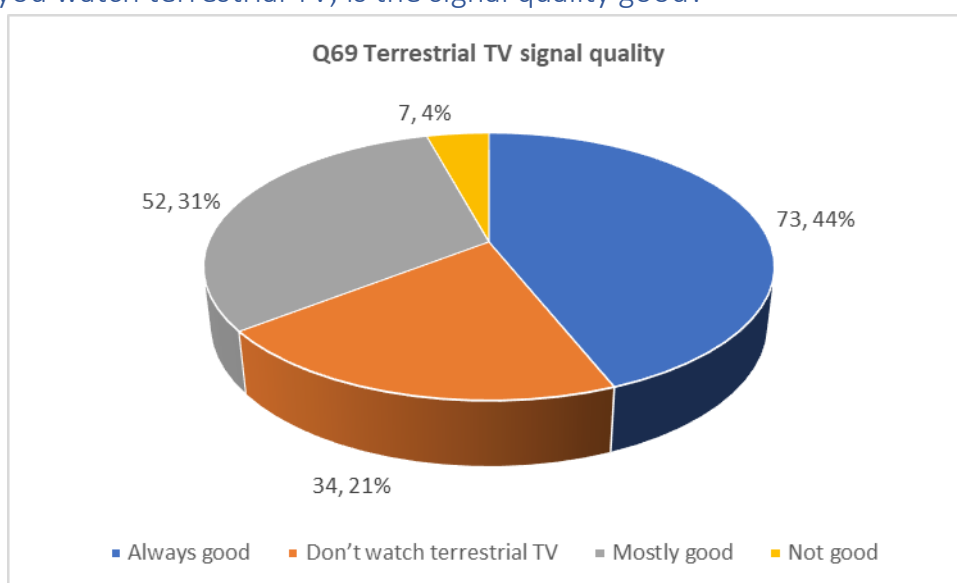

Question 67 If you use a landline phone, is the service adequate and reliable?

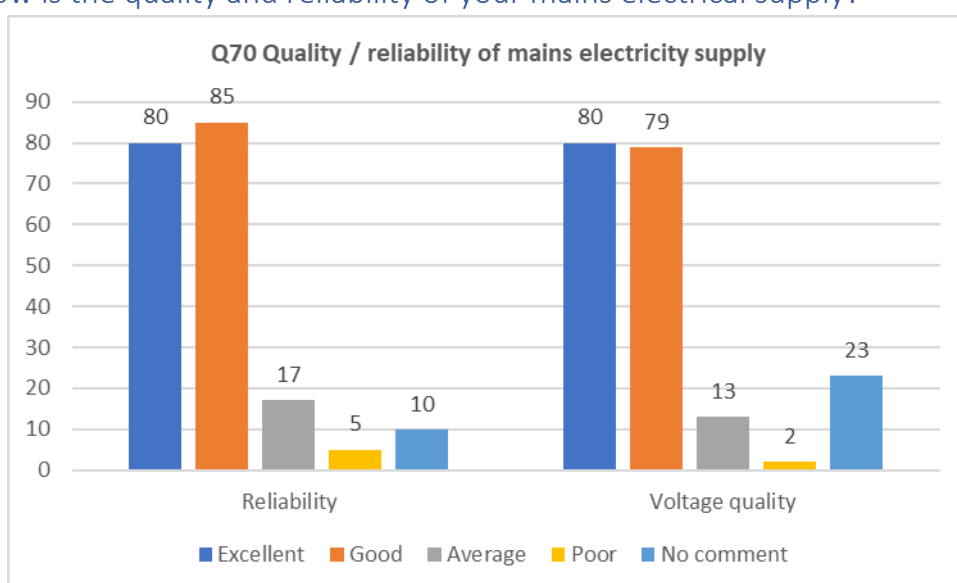

Question 68 If you watch satellite transmitted TV, is the signal quality good?

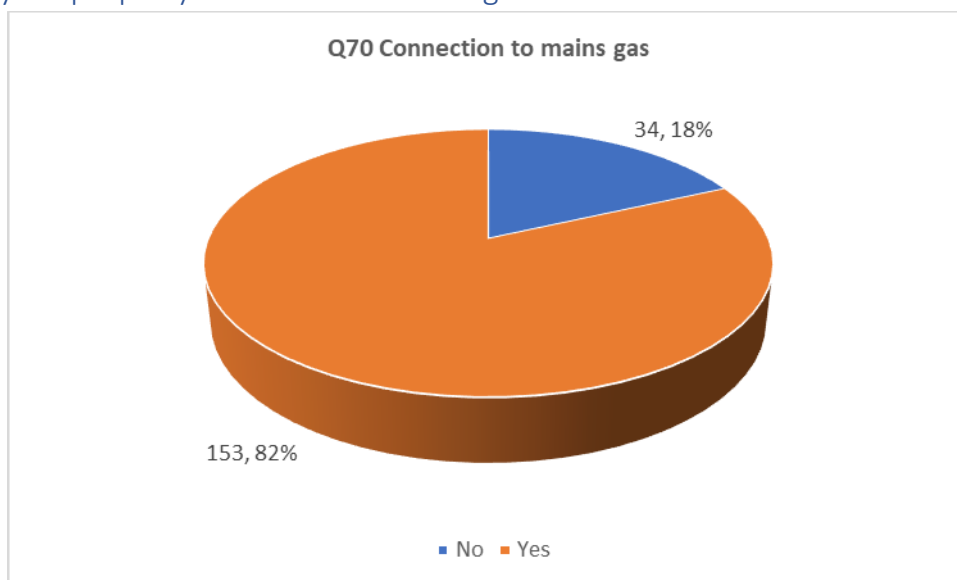

Question 69 If you watch terrestrial TV, is the signal quality good?

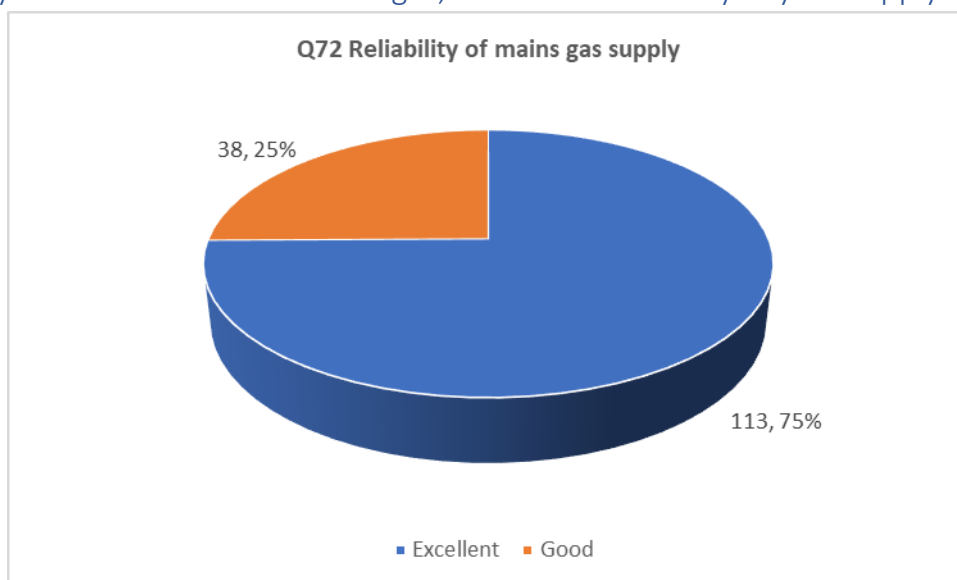

Question 70 How is the quality and reliability of your mains electrical supply?

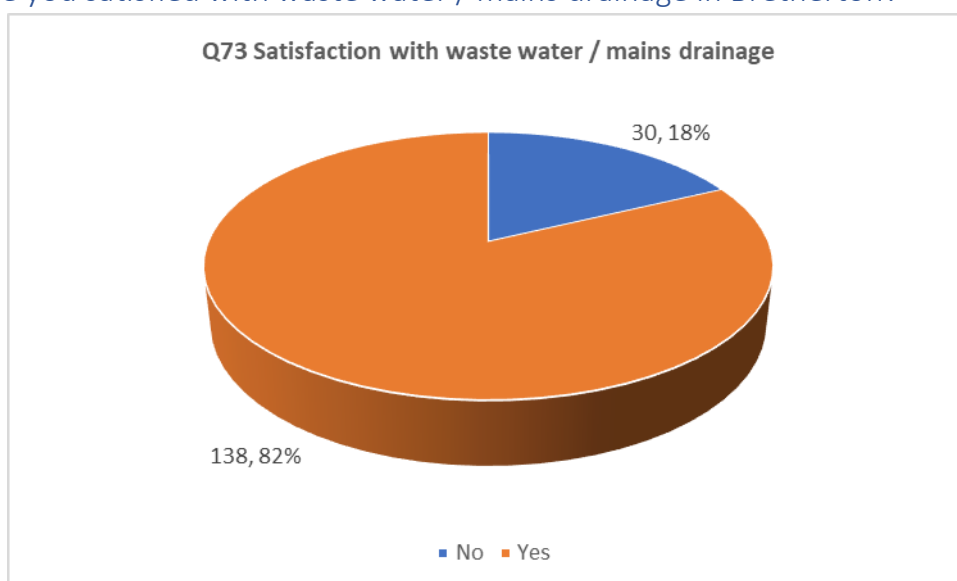

Question 71 Is your property connected to mains gas?

Question 72 If you are connected to mains gas, how is the reliability of your supply?

Question 73 Are you satisfied with waste water / mains drainage in Bretherton?

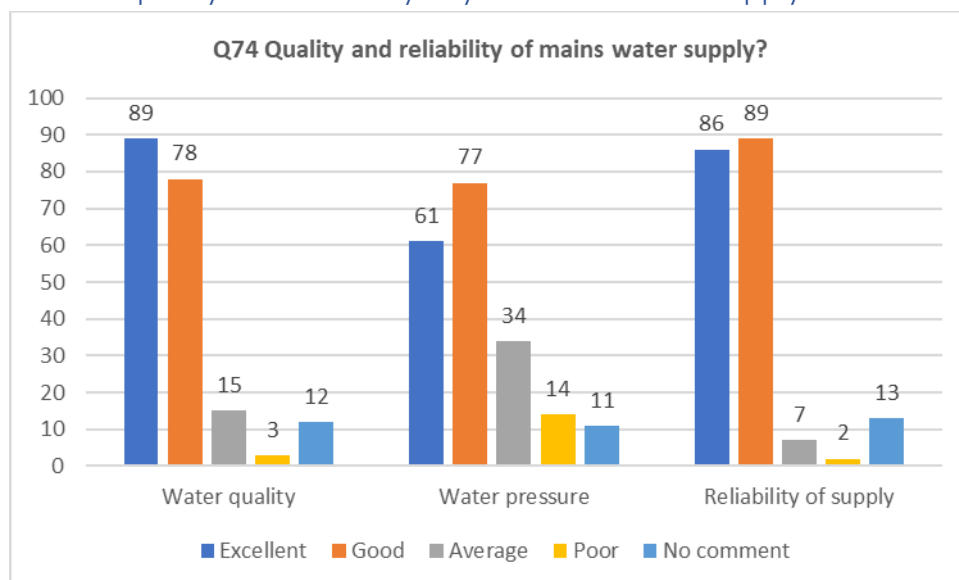

Number of properties not connected: Twenty-one respondents are not connected to waste water / mains drainage

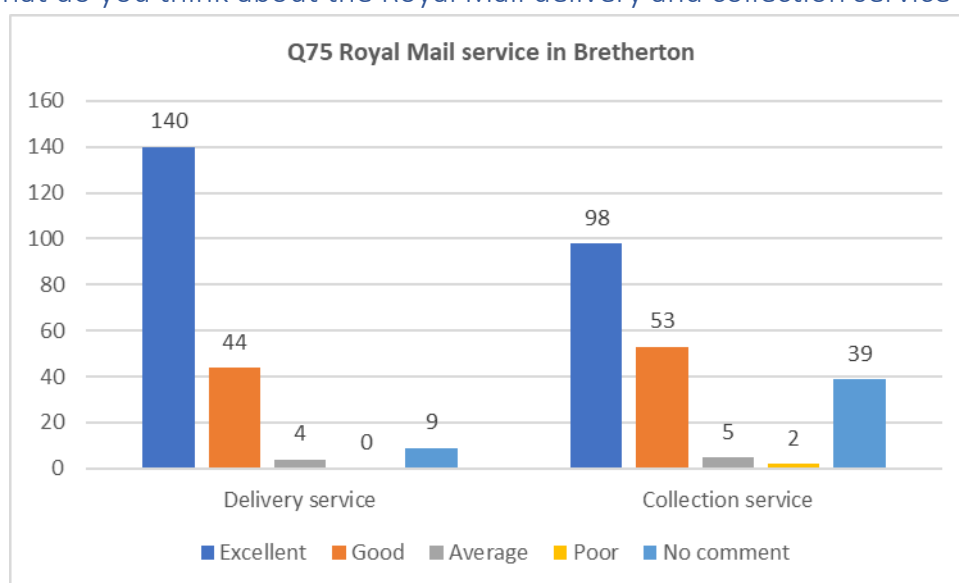

Other comments on the waste water/ mains drainage in Bretherton

i have a septic tank
overflowing in several areas
some drains on road get blocked
in heavy rain, the drains do not cope
need for pumping from station on marl cop
combined drain sometimes backs up in heavy rain
cloakroom toilet glugs ominously during heavy rainfall
often slow draining sinks/toilets can block occasionally
more drainage options for houses on / facing back lane
waste water sewer not adequate for periods of heavy rainfall
the system is not set up for modern use - it needs replacing
when there is heavy rain the sewer on south view overflows
pompan brow drains need regular cleaning to prevent poor flow
there are occasional problems of "blockages" further down the mains
increased housing and hard standing means more risk of flooding and back up
the waste water drainage is no longer adequate and overflows / backs up regularly in heavy rain
sometimes unpleasant drain smells outside property
road drainage poor in places particularly near school
the amount of uv van in bretherton at the pumping stations each day is concerning
the pumping of water overnight on marl cop is very annoying and disruptive
grids need clearing pump on marl cop does not work, tanker used to move sewage
long standing and very regular problems with drains south view
water backs up in the cloakroom toilet during very heavy rain
the pumping of waster on marl cop overnight is very loud
frequent visits by tankers to utilities building on marl cop
there have been issues with blockages on south road
pumping in marl cop is noisy and happens too often
heavy rain can cause back pressure in the drains
its just ok lots of unpleasant smells though
drains often back up in high rainfall
smelly drains & toilet occasionally
pump noisy day and night
overflows in several areas

Question 74 How is the quality and reliability of your mains water supply?

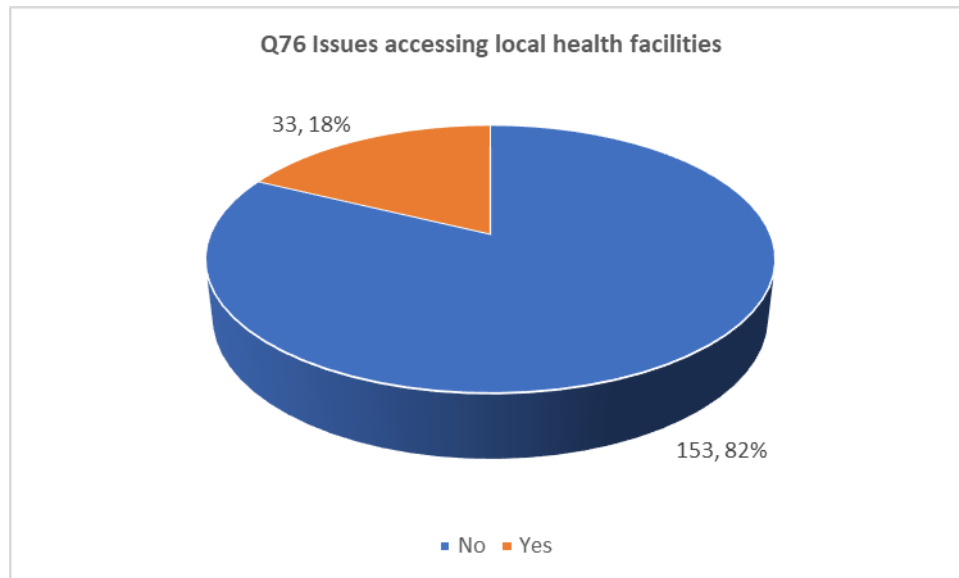

Question 75 What do you think about the Royal Mail delivery and collection service in Bretherton?

Bretherton Residents' Questionnaire Results October 2022

Question 76 As a small community, Bretherton does not have an NHS health facility in the village.
Do you have any issues with access to local health facilities in neighbouring areas?

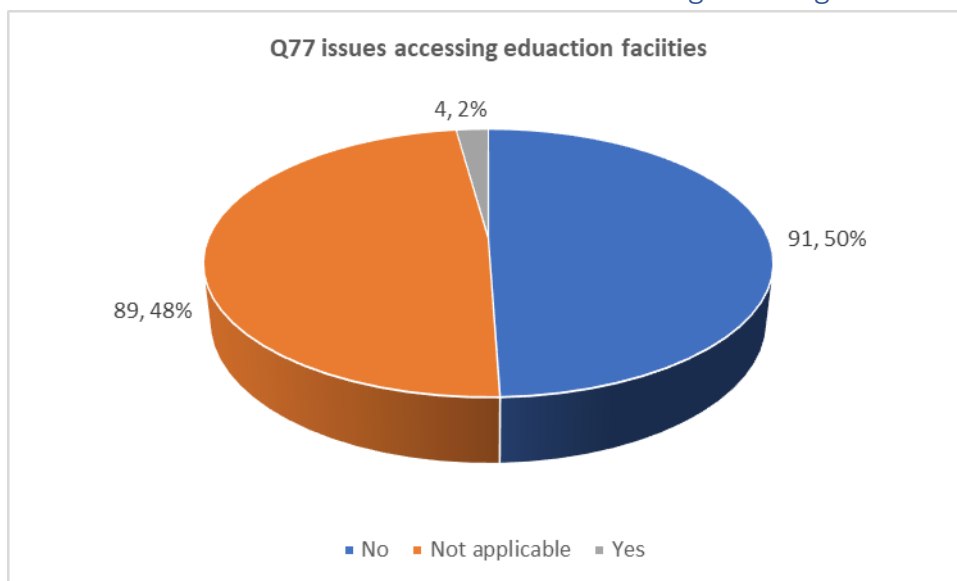

Comments

travel to the health centre is difficult
 had to stay with old doctors and dentist
 yes, difficult to get face to face appointments
 hard to access gps in croston medical centre
 not currently, but could become an issue in future
 i have struggled to get doctors/nurse appointments
 recent takeover in croston has led to a poorer service can be difficult to get gp
 not fair we cannot join tarleton practice as very near nhs facilities are very good
 sometimes getting gp appointments/blood tests is delayed serve a big area
 sometimes difficult to get an appointment on the same day use croston facilities
 i have had to stay with my old gp some distance away (coppull) doctors poor manners
 live on my own it has become more difficult to get an appointment to see a doctor
 it would be good to have an occasional surgery/clinic in the village croston is very near
 could be a problem for those less mobile - does need a car to access access has declined recently
 cannot get to see doctor
 i get appointments quickly **probably good for older generation**
 we have a private doctor now as nhs not fit for purpose, also use bupa service doctor at leyland
 croston medical now shares with other villages which can be too far if you cannot drive
 but the recent merger of gps in croston has affected the level of service by phone and availability
 none
 we can drive to the surgery but the time will come when this is not possible. we will then be forced to leave bretherton
 our doctor is in croston and even if we got a surgery in bretherton we would continue to go to him
 croston village surgery offers an excellent service, can always get an appointment if needed
 need better public transport or a service/facility in the village one day each week
 croston medical centre - trying to speak to reception by phone takes half day
 doctors are unfriendly and always changing. nurses however are brilliant don't drive
 dr ahmad is excellent only practice available is croston which is over used and can't access care
 hearing facilities are in leyland an arrangement for some surgeries a week for those with no car
 village surgery is excellent excellent service from croston - the village surgeries - dr ahmad
 croston medical centre terrible difficult to get through to croston hc and get an appointment
 struggle to get appointments trying to make an appointment over the phone is testing
 to date croston medical centre has always been excellent
 very difficult to get through to croston medical centre
 use croston but can be difficult to get an appointment
 since covid access to doctors etc is certainly not easy
 always have to wait in queue on phone for ages
 would have if unable to drive the service in croston has gone backwards
 can't get through on the phone any more
 croston village surgery very helpful
 would like a surgery direct access

Bretherton Residents' Questionnaire Results October 2022

Question 77 Bretherton has a kindergarten and a primary school, and access to secondary education and adult / further / higher education in neighbouring villages and towns. Do you have any issues with access to education facilities in Bretherton or neighbouring areas?

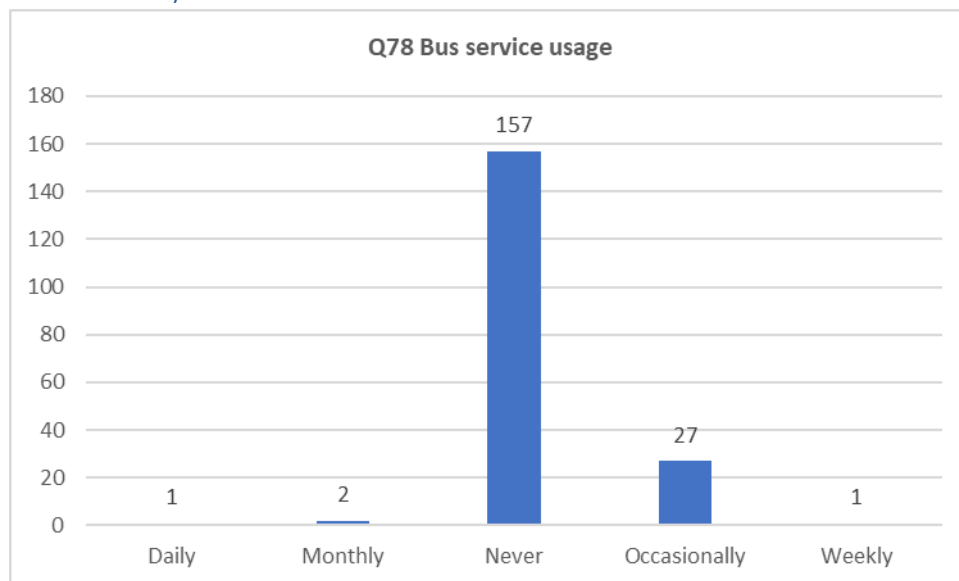

Comments

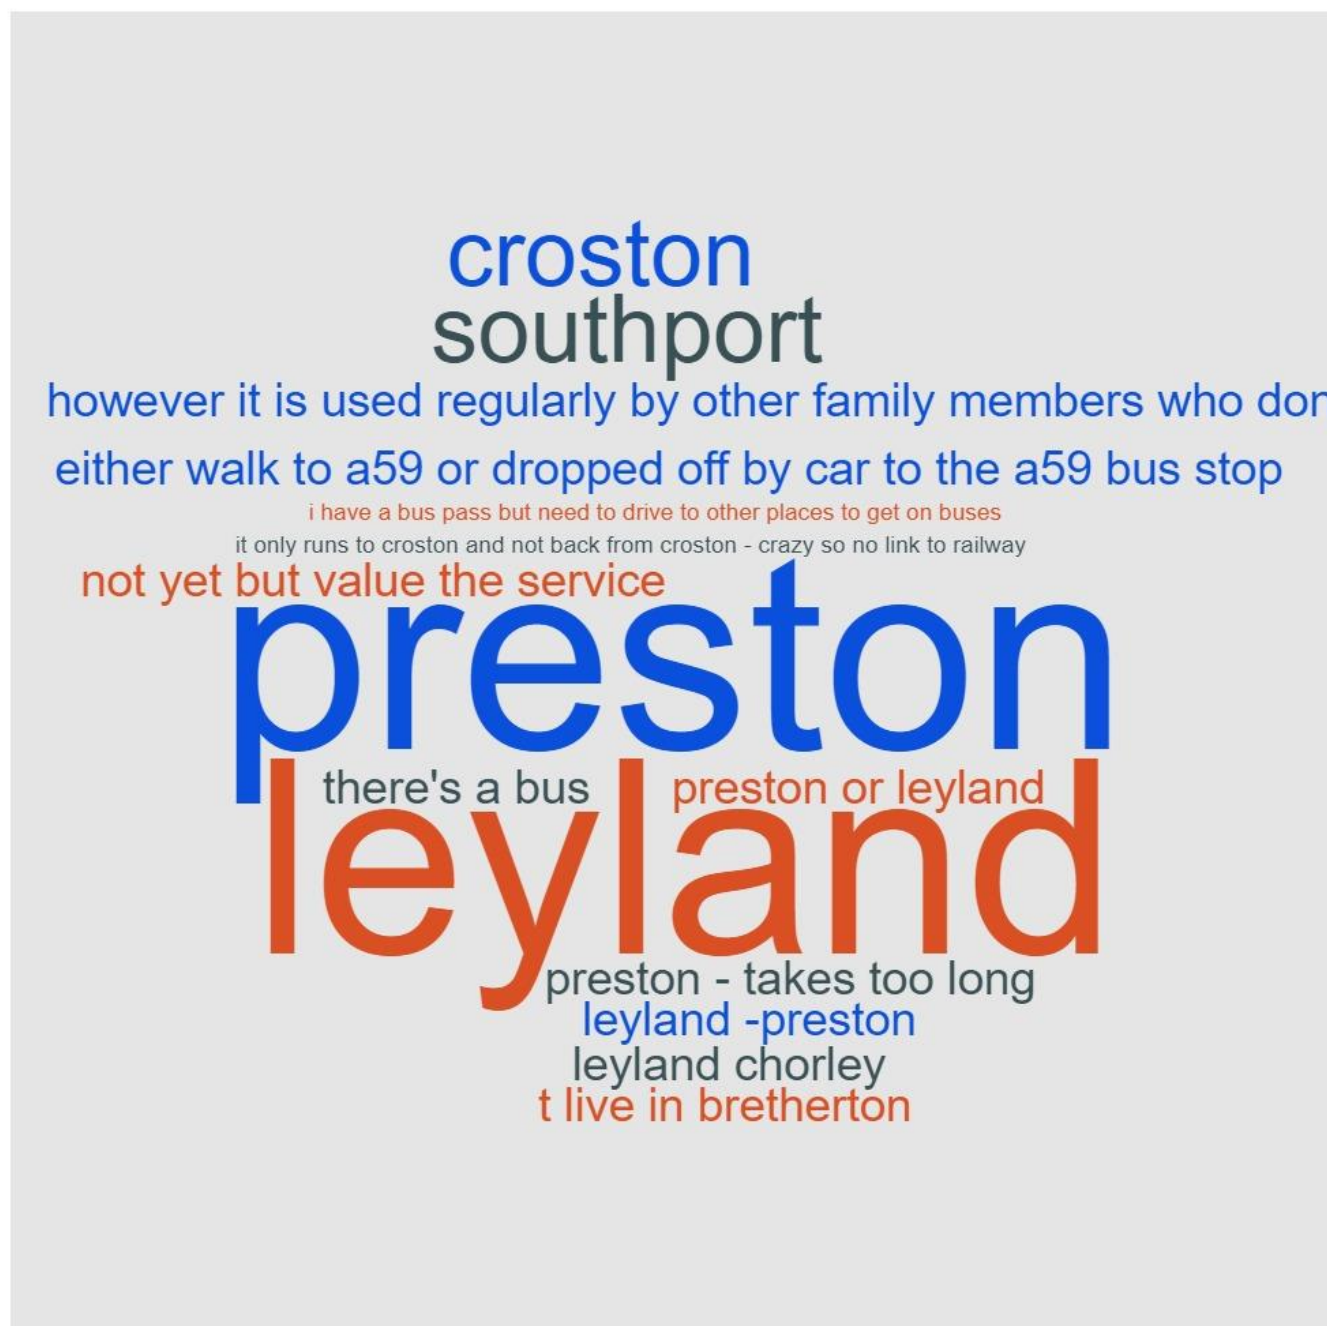

unlit footpath to croston
trouble getting to newman, preston
no pavement on north road to walk to school
i had to go private then move my child to heskin
access to colleges outside runshaw was poor, limiting choice
not affected personally but i am concerned about the lack of places for bretherton children at bishop rawsthorne school
would be fitting to have a saturday or sunday "forest / farm/ horse" school
walking on carriage drive can be a problem avoiding cars and it is being used as a through route
could see difficulty if had children and no transport
bretherton and bishops are excellent school
the free bus is a must to croston bishops
we have excellent educational facilities
cost of school bus
none

Transport, Parking, Roads and Highways

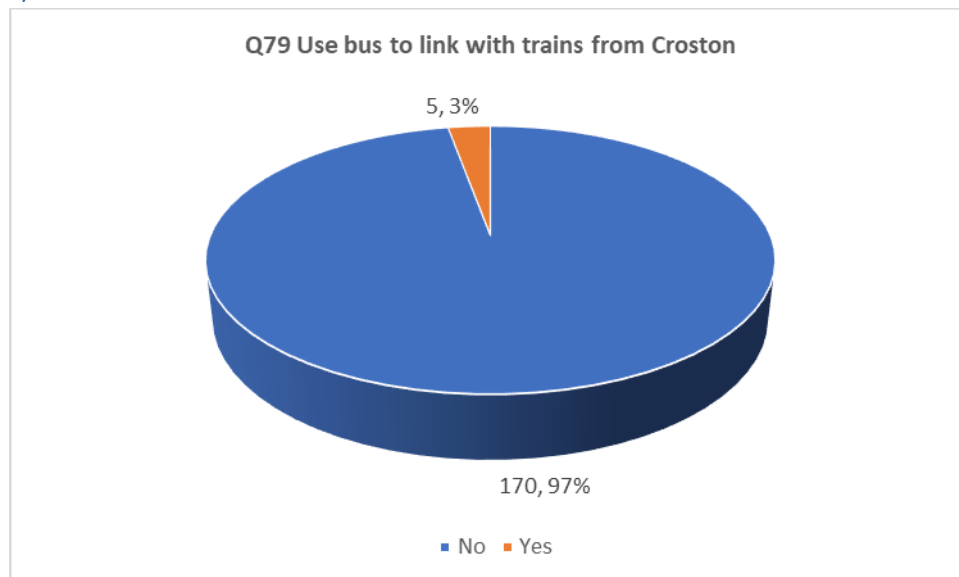

Question 78 How often do you use the local bus service?

If you use the bus service, where do you travel to?

Question 79 Do you use the bus service to link with trains from Croston station?

If so, could the links be improved in any way?

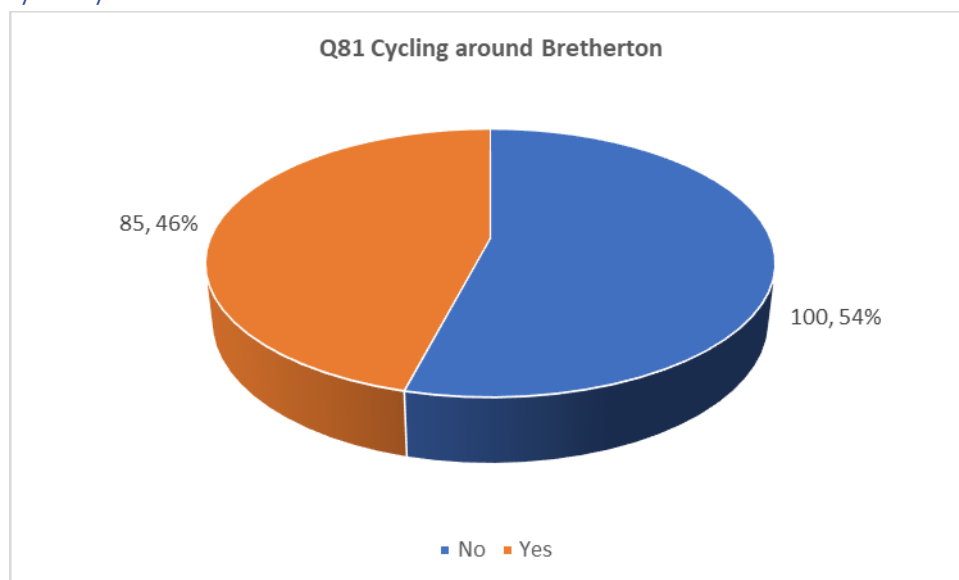

only used once
more frequent
timetable to meet trains
a credible return trip don't be ridiculous
timings could be better co-ordinated
maybe run the bus at a time to suit the train
coincide with train times and other bus services ie x2 and 2
yes, would like the bus back home - only goes one way
the timings do not always match, but would use the bus if they did
would use occasionally if there was a bus from north road that connected
i have used the train to liverpool from croston and feel that the links could be improved so that no one can ever be stranded for two hours at ormskirk
not used the bus to access croston station yet but expect to in the future- holidays, visiting family
but would if it connected well, with rail stations and other bus terminals
bus to preston and southport
not at the moment but perhaps in the future
if i didn't drive, i would use this service
none because it only goes one way
a return service is needed
didn't know there was one
may do in future

Bretherton Residents' Questionnaire Results October 2022

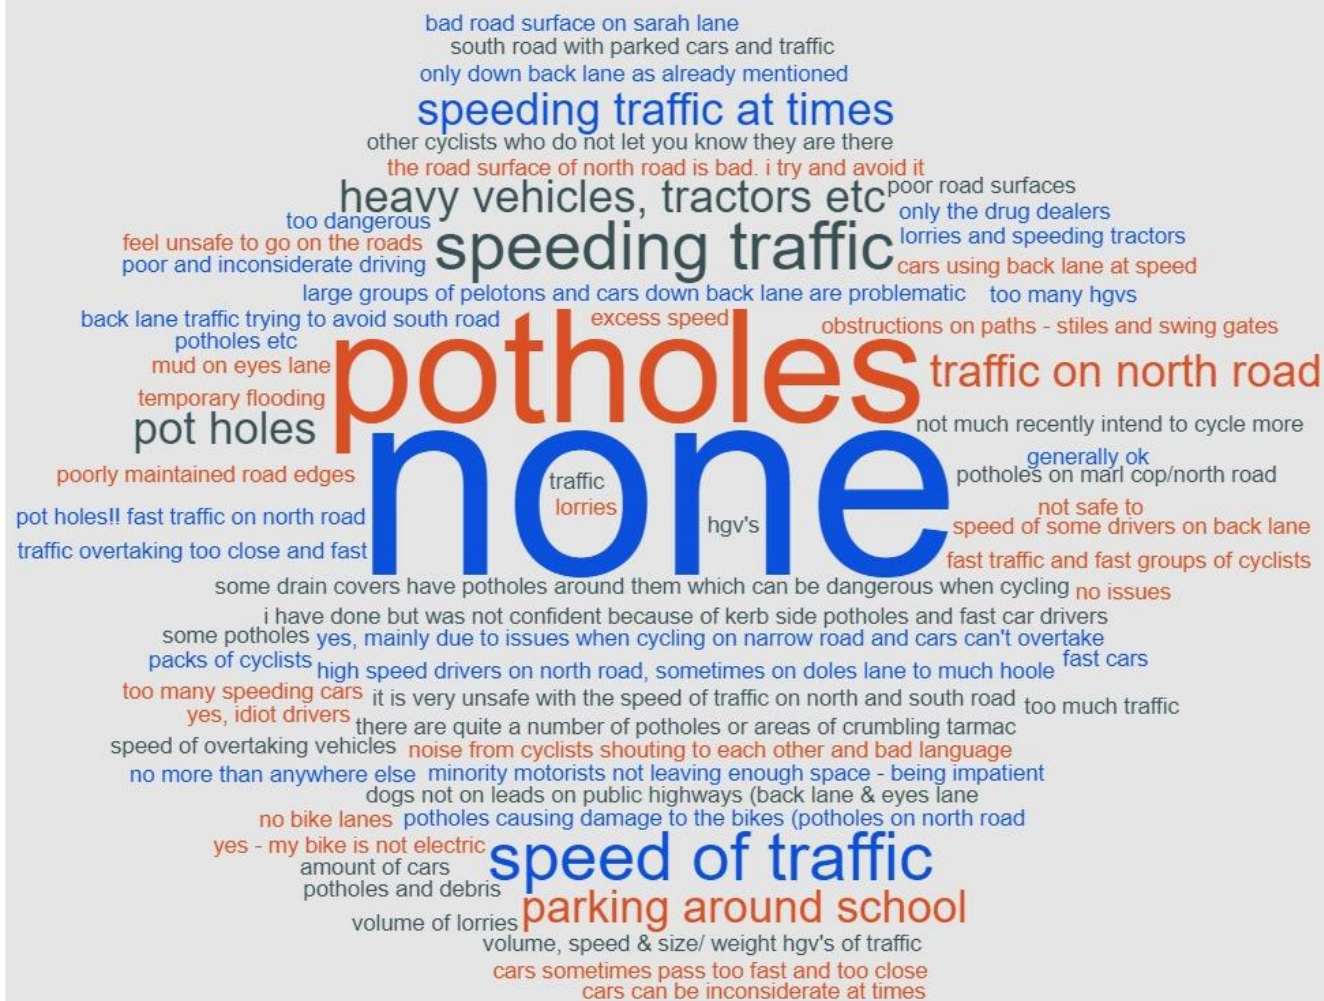

Question 80 How could the bus service in Bretherton be improved? Eg routes, timetable, cost, bus stop location, access, reliability

linked to train and to the 2 and x2 on a59
faster journey to preston and return route
limited routes available never used
not able to comment as i rarely use the service lower cost
is there any demand? the bus is always empty t feel the service adds value
take in the route onto the a59 to connect with services x2 and 2
shorter routes/shuttle bus **increased routes/timetable** direct route to preston
no idea a new stop at leyland end of north road would help more bus stops and more routes
route should run from croston to bretherton and return bretherton to croston no buses in north road
don't know perhaps a quicker shuttle service to neighbouring towns how often does it run and is it busy
bus stop on north road more services using smaller buses - electric ones if possible
routes and timetable route is very lengthy to town. understandable but time consuming the cost incurred cannot be economic
a route to a59 to enable access to other routes more often
i would use this service if it was a direct route to preston, leyland or southport for shopping stop by request
there's limited ways of getting back to bretherton if having a night out even locally - no taxis, no buses
a friend was going to get the bus to bretherton from preston but the length of time it would take is crazy
a shuttle service between, for example, croston and longton or eccleston and tarleton via bretherton would be helpful
i do not have time to use an infrequent service, it would take too long to get to leyland etc and back as compared to travel by car
more connectivity **when we do see the bus it is usually empty - not sure of the reason** smaller buses
personally i don't marked bus stops
could the service be turned at gas pet foods so passengers can board or exit services at the a59 bus stops to allow connection with the x2, 2 and 2a or extend the route to tarleton to turn there
the 112 service route needs to be redrawn so that it is possible to have a realistic return service from bretherton to croston, leyland and not the current magical mystery tour
connection to tarleton or much hoole would allow onward connections via no2 bus to preston, southport, liverpool, much better than a trip to chorley or leyland
to get to leyland first you have to pay to get to croston then pay again to get to leyland so walk to croston to save money
residents need to be made aware of the bus service - leaflet drop maybe, and pick up points on north road as well
bus to chorley my son has used the service to travel to work in leyland. the journey is very slow/long i believe
unless the price of petrol or diesel trebled the rich people in bretherton (most of them won't know) too complicated to connect here. if viable options were offered, could commit then
don't know what i do know is that it would take me far too long to get to preston timetable
more buses bus stop locations are good
unknown don't know the name of the company who runs the bus service frequency
cost - it is too expensive a bus service through to longton and preston would be useful
not currently applicable to me routes / bus stop location but i still would unlikely use it
genuine return service takes too long to get to preston compared to train regular to station
times more frequent routes not run around for such a long time for a return
limited routes/availability the bus route from bretherton is a mystery to me
only used a handful of times a bus both ways to preston not a one way loop
t go on the bus only 1 route and takes hours to get to preston
don't know the bus times different areas to travel to - routes quicker
routes- it takes too long to get to preston
a timetable would be useful

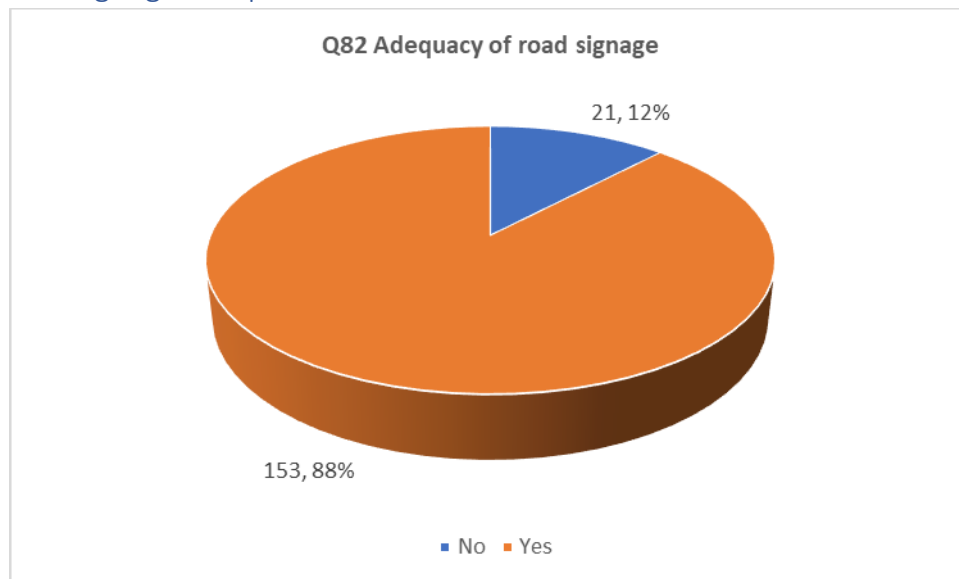

Question 81 Do you cycle on the roads in and around Bretherton?

If yes, do you encounter any problems?

Question 82 Is road signage adequate in Bretherton?

Comments

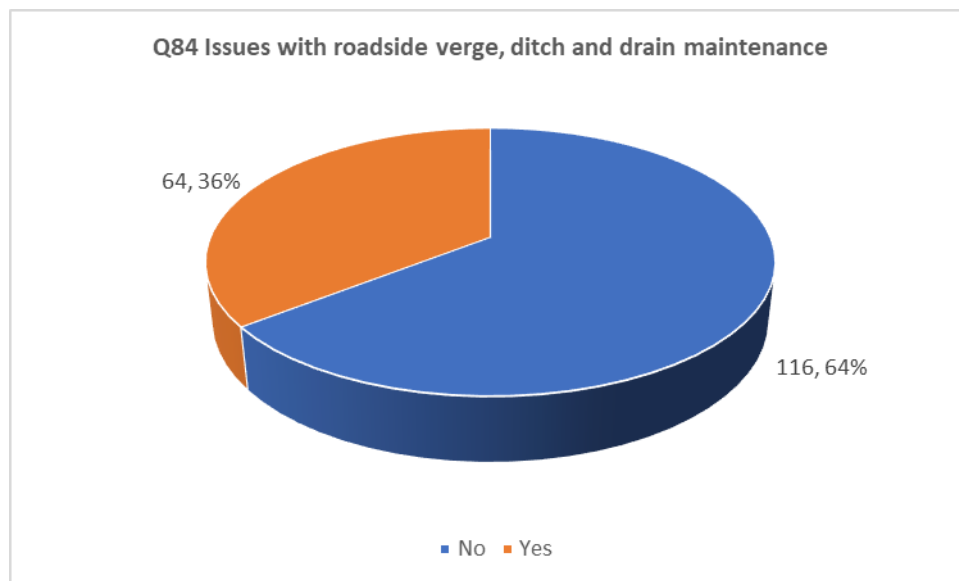

are there any signs
speed signs too small
not enough speed signs not clear
repeater speed signs would be useful
access only" areas should be tightened up
speed limit to be displayed clearer and more often
trees need to be cut away from signs and signs cleaned
we could do with s "slow , ducks crossing sign on south road
heavy traffic on a59 needs to be directed away from bretherton
hedges obscure signs or signs are damaged when hedges are cut
need warnings on s-bends entering village that people may be crossing
need duck crossing sign on south road by old bakery - seen several near crash incidents
a slow down sign as you approach the junction with north rd and south road would be useful
the motorway should be clearly signed at carr house so that traffic does not come through the village
junction of back lane/eyes lane not marked. drivers not aware to give way at end of back lane
signage at the toll bar routing traffic to the m6/m61/m65 along the a50 similar as it is at longton
good more "drive carefully" signs none but need cleaning
more or less
sharp bend sign at fleetwood farm poorly lit and not easily visible
lack of maintenance means road signs are not always visible
but many cannot be seen because of overgrown hedges
need more animal signs on carr house lane
t get observed speed limit signage is routinely ignored
could do with a sign for the football field
better speed signs parking outside school
more warning signs
doesh

Question 83 What do you think of the standard of winter gritting, snow clearance and leaf fall clearance in Bretherton?

Bretherton Residents' Questionnaire Results October 2022

Question 84 Are you aware of any problems with the maintenance of roadside verges, ditches and drains in Bretherton?

Comments?

ditches have got better this year
i am aware of some blocked by trees
county council seems to avoid doing anything
culverts - need maintenance
japanese knotweed along back lane & other verges flag lane - flooding
private households should be obliged to reinstate ditches
south road - collapsed drain drain of the school house
north road/ carr house lane junction always seems to flood marl cop needs resurfacing
notice the weeds on the pavements not removed by council anymore
ditch by fleetwood farm completely full and does not link to main system
outside primary school / old school house large puddle and on toll bar roundabout
verges are left to homeowners or volunteers
none
drains do become blocked but were cleared once reported on the lcc highways website
ditches need maintenance
drains need maintenance
surface water network - needs maintenance
roads are generally poorly maintained with potholes and broken surfaces
localised flooding drains need maintenance. carriage drive junction - blocked drain floods
ditches filled in temporary flooding driving towards croston and on back lane
road drains - need maintenance
flooding on footpath pumping station on marl cop cannot cope in heavy rain
blocked drains cause flooding surface water from road not properly managed on b5248
south view - long standing drain issues never sorted
ditches in fields behind houses on south road need to be cleared
water build up end of north road/ carr house lane
lots of crumbling roadside verges/ditches
road gutters - need resetting
watercourses need maintenance

Have you any other comments that you feel would be useful to the Neighbourhood Plan Steering Group?

the focus should be to meet needs of lower income
the parish council / village should work with local businesses
what is the beige crusty stuff i get in my kettle/ round by taps
community will have to work very hard to achieve our joint aims
infrastructure upgrades must be tied to any future developments
need a small industrial estate to encourage the village to be sustainable
just please please consider keeping the overall look of the village thank you for taking the initiative
individual hedges grow over pavements reducing foot traffic in these areas
there should be no housing development unless road safety is addressed good luck
regular maintenance of footpaths/hedges/riverbanks so easily available on walks village pub like the wheatsheaf in croston
encourage a small scale residential with 30% affordable so the village does not 'die' the highways around bretherton are poorly designed
bins needed down back lane parking around school at going home time is a problem (but this does not last long)
detrimental impact on services within the village if too much housebuilding is allowed pavement on north road is an issue
drainage grids often blocked with mud from farm vehicles, causing flooding on roads chorley and icc place a very low priority on this area
bretherton is stunning village but like an elderly lady she needs more care on existing roads please keep bretherton a village
to develop around the recreation ground you would need to knock a house down or come in at the back please protect our village
more bins around some of the lanes to encourage people to pick up their dog poo and dispose of it correctly no thank you
fortunate to live in bretherton. hope the village is able to continue to be a welcoming & happy place. thank you most things are minor
we live in a beautiful village and it is important to maintain this and enhance with improved care of the environment community gardens? allotments
the neighbourhood plan should 'encourage and support' the ga scheme at every opportunity. the climate will not wait this is a really good idea
residents should always receive clear information about any proposed major development and an opportunity to respond
concern - field behind bamfords fold highlighted for housing development subject to a council-chorley local plan 2012-2026
more friendly and open with newer residents and realise that they want to be apart of village life and aren't aliens coming to invade
supporting residents with prow closure on working farm with machinery which is dangerous especially when there are alternative routes
the facilities are fantastic in the village. they just need to be used. this is why we need more residential development and make bretherton sustainable
distribute new housing to avoid a one-street village
concerned about future planning on fields (north/south road)
some of the questions were difficult to understand eg 59 - wouldn't have been able to answer this without google/ prior knowledge thank you
public footpath route signs (they've recently got them in croston) would encourage people to explore on their own doorstep
things people can help with would be great to get rid of houses that are not in keeping with the character of the village e.g. mari cop and north road
tackling fly tipping the largest landowner and the biggest business in bretherton are effectively the same entity and have huge power
pavement on north road is a disgrace corn mill-cars can be parked too near the junction which makes it difficult turning into south road affecting vision
litter thrown from cars bins more input on design on planning applications - use of materials in keeping with general look of village etc etc
help our children to live here any developments must take into account what impact it has on the access and egress onto the main roads
essential to reduce speed/traffic in village places such as bamfords fold just so over parked it is dangerous and i dread walking down there
care of house number development there are probably more dogs than footballers who would want to use the recreation ground
work with eg ga pet food partners and their proposal for their mutual journey to net zero renewable energy plans
thanking you for eliciting views issues with low flying aircraft especially possible flying lessons for landing and take off
like wrea green make it a feature to attract folk only lived in the village for about eight months there are some that i cannot answer
weight restriction on vehicles i feel more local people should be involved instead of central to the counting group
ditches around the village need regular inspection developments need to be considered against lack of facilities and traffic volume
help everyone get affordable energy this is a natural and peaceful area and this is the beauty and uniqueness of it
more litter bins i do think a lot of housing developments are far bigger homes / expensive
traffic free walking areas - sarah lane/back lane
the ga scheme is a fantastic opportunity for all residents of bretherton
the quarterly newsletter is very good good idea to have a social media / facebook group for bretherton
our village roads are already carrying too much hgv/tractor traffic
i would like to walk to school with the kids but it is simply not safe
improve signposting to children's play area and football field
please do not add additional phone masts and transmitters
more to be done on volume of cars down back lane
